SOMETHING REW.—GAS BURNING COOK STOVE.—I would respectfully call the attention of the public to one of the greatest improvements ever introduced in Cooking Stoves and Runges—the burning of the gas arising from the coal, by which means is saved 50 per cent. in fuel and also more intense heat thrown to the bottom of the oven. We effect the burning of the gases by means of a hollow centre-plece, perforated on the under side, which admits the air in a heated state to mingle with the gases, thus aiding its combustion, and causing a flame to pass around the oven equal to a wood fire. This improvement also preserves the centre piece from sinking down on the fire, thereby saving the expense of repairs. One of the Stoves OAN ME SEEN IN OPERATION at 1116 MARKET Street. CHESTNUT GROVE WHISKEY.—A desire to lessen the consumption of impure spirits, knowing their injurious effects apon the constitution, has induced the offering to the public of an article which the analyzation of Professor Chilton, Analytical Chemist, of New York, and Mesers. Booth, Garrett, & Camac, of Philadelphia, proves. beyond all question, to be the most pure and consequently least injurious spirits over offered the American public.

OERTIFICATE OF DR JAS. R CHILTON.
I have analyzed a sample of Chestunt-Grove Whiskey, received from Mr. CHARLES WHAETON, Js. of Philadelphia, and having carefully tested it, I am pleased to state that it is entirely free from polsonous or deleterious substances. It is an unusually pure and fine flavored quality of Whiskey.

PHILADELPHIA, Sept. 9, 1858.

\*\*DEAR SIR: We have carefully tested the sample of Chestaut-Grove Whickey which you sent us, and find that it contains nene of the poisonous substance known [as Fusic Oil, which is the characteristic and injurious ingredient of the Whiskeys in general use.

Very respectfully,
