To proceed to Mount Moriah Geme tery. At Frankford, on the 24th instant, Mr. WILLIAM GREENLEY, in the 4th year of his age. The relatives and friends of the family, also the Narazauset Triba. No. 43, of Red Men, and Wingohooking Tribe. No. 33, are respectfully invited to attend the funeral, from his late residence, in Lesher street, above Orthodox, on Wednesday, afteanoon, 20th instant, at 2 o'clook. HENRY B FUPTH, SOURCE,

THE Clinic of the Femnle Medical Colly on WEDNESDAY and SATURDAY, from 11 to 1
o'clock. Female Professors will always be found in attendance to examine and prescribe for patients. dl-ln sat 3 o'clock.

Suddenly, on the 25th instant, in the 25th year of his age. DEWITT C BLACK.

The relatives and friends of the family, also the members of Fame Connoil, No. 16, and Liberty Degree Connoil, U. A. M., and Kenslugton Lodge, No. 11, I. O. of O. F., are respectfully invited to attend the funeral, from the residence of his father, H. Black, Germantown road, below Dlamond street, this (Tuesday) afternoon, at 2 p'clock.

On the 26th instant, SAMUEL IRONS, in the 51st year of his age. We particularly solicit the attention of Railroad officers to the advertisement headed "Hallroad Dangers." It is plain, direct, forcible, and honest, and abould arrest the thought of all Railroad On the 26th instant, DARLOGH LANGE, in the year of his age.

His relatives and friends, and those of the family, are respectfully invited to attend the funeral, from his late residence, No. 720 Bayard street, this (Tuesday) afternoon, at 1 o'clock. To proceed to Odd Fellows: officials. The improvement there noted has bee thoroughly tried; some hundreds of the machines ar in use in all the cars of some of our best managed lines; and it is the opinion of all who have examined it that emetery. **

On the 25th instant. MARY LOUISA, only daughter samuel and Mary Resaler, aged 4 years and 8 months. The relatives and friends of the family are respectit will be universally used. It is offered on the mos BAILROAD DANGERS .- For the last twenty years BAILROAD DANGERS.—For the last twenty years, or perhaps since the system of Railroad's ras been established in this country, there have, in all probability, been losses by an ident to the extent of twenty millions of collers. These have been clear, absolute losses to the community—as much so as property destroyed by fire or sunkin the ocean. But these disasters have been of a peculiar character, and, in the main not those of fire or flood; they have arisen from the ordinary conditions of, a relicued train in progress; they have been caused by the inherent momentum that, is a necessary property of great mass so of matter in molion.
A Railroad Train is exposed to peculiar danger from this cause. Its track of iron and level grade are both made for the purpose of allowing its free progress, and the very ease and freedom of motion aggravate the danger of momentum: this (Tuesday) afternoon, at 1 o'clock, without further notice.

On the 20th instant, ANNA MARIA, daughter of william E. and Margaret Esber, aged 10 months.

The relatives and friends of the family are respectfully invited to attend the funeral, from the residence of her father, Girard avenue, west of Girard College, this (Tuesday) afternoon, at 20'cock.

Buddenly, on the 28th inst. OHARLES B., youngest ron of Thomas J. and Sarah Simpson, in the 16th year of his age.

The relatives and friends of the family, also Amorican Section, I. O. of O. of H. and T. No. 13, are respectfully invited to attend the funeral, from the residence of his parents, No. 007 Vincent street, late Lilly alley, above Green street, this (Tuesday) afternoon, at 2 o'clock. To proceed to Odd Fellows' Cometery.

On the 26th instant, BENJAMIN J. ERNVIEN, in the 50th year of his age. the very case and freedom of motion aggravate and manger of momentum.

Again, a Railroad is intended as a means of rapid transit for persors and property, and the component parts of a locomotive and ears for travel on rails rapidly, are made necessarily heavy and strong—if otherwise, they would soon shake to pieces. It follows, then, that weight, eare of motion freedom from obstruction, and rapid transit, all conduce powerfully to create momen turn. From accryate calculations it is found that the effective momentum of a train of six cars and an engine is qual to a force of 700 tens. The truth of this statement is painfully serverident at a suddon oil sion of obstruction. This FEARFUL DANGER WHICH IS 50th year of his age.

The rolatives and friends are invited to attend the funeral, from his late residence, in Abbugton township, Montgomery county, this (Tursday) morning, at 10 o'clock. P. A. Fitzgerald, Esq , will Lecture in HISSURG, YORK, and BALTIMORE. d28-61* Geo. D. Prentice, Esq., of the Louisville Journal, will deliver the Sixth Lecture, before the Literary Congress, at MUSICAL FUND HALL, HURSDAY EVENING, Dec. 30th, at 8 o'clock. Subset: ... is qual to a force of 700 tons. The truth of this statement is painfully set-evident at a sudden on laton or obstruction. This FEARFUL DANGER WHIGH IS MYRR PEESINT to a right is only new-ever, understood to some extent, and each car is provided with brakes, or blocks, arranged to press against the wheels by the action of the brakeman. This plan works very well for the wunst stoppa; es of a train, when sufficient notice is given to the brakeman by the engineer; but for those cases of danger which have arisen, and will arise, in spite of the mostrigid scrutiny, it is notoriously inefficient, as all experience proves.

It is of no use for an officer to say that nothing can happen to it our? train. There is not a moment that a train is in motion but that it is exposed to danger which a perfect control would prevent, and there should not be an leatant of time in which a train is running, but that the facilities should be at hand for an instant, simultaneous and powerful application of the retarding appliances of every can.

It is not the custom on many roads to employ more than one brakeman to two or three cars, and on some not more than one to four or five cars. The laws of some States require a brakeman to each two cars. We hold that there should be one to every car, and that a mechanical brakeman is vacily more reliable than one of firsh and blood.

Durng the last few years an invention has been made and perfected by the undersigned, the object of which is to place all the braking appliances of a train in readiness for prompt and united action. The closest attention that we have been able to bring to bear on this subject, and an analysis of the various accidents that have occurred, lead most conclusively to this result, viz: that the means should sivays be athand throughout the train to arrest the momentum at every point where it values; 2. That the engine man, from his station, generally sees the obstruction or danger first, consequently he should be enabled, of his own volition, to apply in an instant every bak most needed, are inauporable obstacles to the success of such a device as a means of guarding sgainst, and initigating all the accidents to which a train is exposted. The invention referred to consists in the attachment of a reserved power to the brakes of each car, placing them all in readiness for united action, either from the engine or any point on the train. A description of the mechanism is unnecessary at this place; suffice it to say, it is extreme y simple, and perfectly efficient, and full and detailed engravings and description may be found in our circulars, to be had on application at our office any, it is extreme y simple, and perfectly efficient, and full and detailed engravings and gesoription may be found in our circulars, to be had on application at our office.

There is another, and perhaps the strongest, point in favor of the adoption of this precaution—namely, its great cheapness. For instance, take a road owning, say, lifty care; the first cost, at our present price, would be \$0.250; the interest on this a count at 7 (or say 0 percent, which is nearer the rate that railroad companies pay for the us; of money) is \$502 per year. A company having this attachment to their care would eave the wages of at least three brakemen, which would be, say, \$500 a year; while the simple insurance against accident to life and property which such a precaulton would give would be worth at least half the cost of the improvement. We submit that we make out a strong case in favor of the adoption of such a security. And now, then, in conclusion, we add that some hundreds of these Machines are in use in the United States, and they are on the whole passenger stock of all the following roads, to any or all of the officers of which we refer all pattless interested, in place of certificates, of which we have plenty: Hudson River, Cleveland and Toledo, Tarre Haute and Richmond, Old Colony and Vall River, Michichigan Central, Panama, &c. Further than this: We will furnish the nachloes for ALL THE PASSENGER AND BAGGAGR CANS OF ANY KOAD, AND GIVE EACH COMPANY FOR ITSELF THE OPPOINTUMENTY TO TEST ITS VALUE, FREN OF CHARGE. WE WILL GIVE FOUR MONTHS? TRIAL BNOORS SETTLEMENT, AND EACH COMPANY BIALL BE ITS OWN JUDGE OF ITS VALUE. Can WE do more than this? And does not exery officer assume as FEAR-FUL RESPONSIBILITY who neglects for a moment such as offer? We do not ask you to incur expense or buy palent rights; we offer you merchandiss of tried, perfected, and warranted value. We shall sand a copy of this advertisement to the office of every Company in the Union, and solicit on their part a recognition of the norits of this impro G-stucth-am H. R. OGGSHALL, Secretary.

718 ARCH Street, below Eighth.

RULTON'S INSURANCE, ADJUSTING, AND COLLECTING OFFICE, No. 608 OHESTNUT STREET, PHILADELPHIA.

PRILADBLERIA.

The undersigned having been practically engaged for a number of years in different expacition of the Innurance business—for several years in adjusting losses exclusively for the Insurance Companies—now offers his services to those sustaining Loss or Damage by Fire to properly insured, in making out their proofs of such loss or damage in full compilance with the intricate and cunning conditions of Policies of Insurance, in such a manner as to obvate ples or excuss for reduction or litigation by companies so inclined, or others.

He is assisted by the best legal counsel in Philadelphia, and will give particular attention to the Collection of Olaims against Insurance Companies.

It is known by many who have sustained loss by Fire to properly insured, and it has also been the experience of the undersigned, that policies are frequently declared partially or entirely void at a certain time after a fire occurs, in consequence of carclessness or mismanagement in effecting the insurance, or for some other cause, which, although an important fact, is scarcely even discovered or thought of, until it is too late. In order to avoid such disastrous occur-rence, the undersigned will also effect Insurance in reliable Companies only, and examine policies effected by others (in most cases) free of extra charge
