No family should be without these invaluable curatives. They are the only remedies perfectly adapted for domestic and private use. With them the percent is armed and prupared against the first approach of discase, and can meet it at the threshold and keep it at bay. A trifle of medicine, rightly directed in the first hours of disease, perfectly cures that which, by delay, can only be relieved by long and tedious hours of suffering, if at all. With these at hand, you are not obliged to await the coming of that often distant, as well as expensive luxury, a dottor; nor to be druged or poisoned, or blistered, or bled, but may yourself administer the simple specific, and restore the ruddy current of life again to health and joy. There cannot only no injury arise is any case from their use, but the general influence upon the constitution, beyond all question, is most beneficial.

His SPECINTOS have now been before the public four years, and are in use by thousands, in every part of the country, with the most uniform and satisfactory re-sults. Pages of testimonials can be exhibited, showing the general satisfaction given, and the many very grave gilding, neatly bound, and handsomely print d, a small volume which we horrowed from PENNINGTON'S book store, entitled "New and Comprehensive Dictionary of the English Language : as spoken and written." Autho Hyde Clarke, a London newspaper reporter Publisher, John Weale, of High Holborn, and serious, and often long-standing, diseases which have been cured by their use. No class of remedies has thus far ever been known which have given the London, who has brought out a vast number o valuable architectural and scientific works. Mr. Hype Clarke is a surprising man, who has always aimed at the reputation of master such brilliant and wonderful cures.

They are alike removed from the poleonous, dangerous, and repulsive does, of quarkory or old school practice, the inconvenience of water-cure, or the intricate and berpisving obscurities of the unual Homeopathic books and medicines. Consisting of simple predfile for the various diseases to which they are readed put up in the form of six ple sugar pellets, and repared to ingredients between the ready resource of the parent rurse, and are the comfort of the complaining or the well. ing the grammar of a foreign language at breakfast, getting through the best work in that language before dinner, and writing a history, biography, romance, and epic poem-still in the same hitherto "unknown tongue"-before he put his night cap on. It happens that Professor Goodeich edited Webster, and that Professor Goodeich edited Webster and Isoum Library. 5 History and Prospects of Parthat Dr. Wordester, who abridged Webster liamentary Reform. This was written by Str a great many years ago, since produced a rival work.

It would be easy to make an amusing article out of Mr. Hyde Clarke's characteristic book. He piques himself on writing wit with wisdom—on being synical as well as instructive. Here, for example, is one little article, which at once shows his system and his peculiar way of treating words:

PRIL & for PRIL' to & also for PHILADEL'-PHIA, &. * a city of Pennsylvania; PHIAM, * native of Philadelphia; sectarian of the family of love; PHIAN, a relating to do. or Ptolemy Philadel phus; PHIARISH n saying or practise of Philadelphia; Phia LAWYER, na notorious hark; Phia CATECHISM, n making seamen work on Sunday. How can the Philadelphia lawyers ever survive this sarcastic definition! In the innocence of our heart, we always believed that the phrase "would puzzle even a Philadelphia lawyer", was complimentary, arising from the fact that the lawyers of this city, from the importation of the earliest, have always been remarkable for sagacity, sound also appear this week, with eighteen illustration law, and no ordinary share of common sense. Indeed, we have heard (and do believe) that which are on file in the Recorder's office, from an early period, are so remarkably well drawn, that lawyers from other States, who have come hither, with the hope of finding flaws in them, have usually returned home, fully satisfied that (to use a technical phrase) each instrument "would hold water."

FEMERIBEE.—That you have it in your power prompily and pleasantly to remove such complaints at the beginning, and so prevent gray diseases.

ERMEMBER.—That Humphreys' system of Homtopathle Specifics divest the private practice of the system of all perplexity and intrinsor, so that everybody may use them with advantage.

HEMEMBER.—That the cure of a single chronic allment, such as Piles, Cetarrin, Hasdachs, or fail Sheum; will more than ten times pay for the cost of a full case.

ERMEMBER.—That two or fire deliars invested in value to you every year, in religious times its value to you every year, in religious times the vention of disease, and absolute relief. By the way, the origin of that phrase is cuious. Whenever an erasure occurs in a deed, CASES AND CURES.

DYSPERSIA.

A young lady of twenty six had been troubled with indigeniou for several months, so as to render great care necessary in the selection of her food. After exting the stomach became acid, food rising in her month with witer, and an impleasant, heavy, lead-like sensetion in her stomach, continuing some hours; frequent headache, bowels constipated, and a depressed montal condition. She commanded taking the Dyspepsia Pilis; one morning and night, and in less than a weak every symptom of her discase had vanished, and she kell like a hew being.

A gentieman somewhat advanced in years, strong, robust constitution had lately been a good deal safely and taste in the mouth, and attended with a peculiar vertigoand whirling in the head, so much so as to render his riding in a carriage, or even mounting an eminence, quite daspectous. After trying several things ineffectually, he fell tipon the Dyspepsia Pilis, which afforded prompt relief. A pill every night and morning worked like a sharm, relicting all his vertigo and other unpleasant symptons. (and we freely confess that, to ourself, a good novel is a great delight,) who have read WAR-REN'S "Ten Thousand a Year," will recollect that, in the trial at Nisi Prius, in which the renowned Tittlebat Titmouse, Esquire, brings an action of ejectment against Charles Aubrey, Esquire, for the recovery of the estate of Yatton, the said Titmouse obtains a verdict,

because one of the title-deeds produced to establish the defendant's right to the property had an evident erasure unaccounted for. and delivered" before witnesses, who had Also, a volume of Poems by George Cakes, and fike a charm, relieving all his vertigo and other unpleasant symbolish.

COUGH AND BRONCHITIS.

Bad colds neglected or frequently repeated often lay the foliadation of Consumption, Bronchits, and premature decline. Though there are many remadies advertised as prompt and speedy curse, yet none as safely and yet speedily and surely effects cure as this. Often a single pill, taken at night, has entirely relieved the dystem of a severe and threstening cold by the morning. Coubes AND Colobs.—A sentieman, a fublic lecturer; took a severe cold the latter part of last month, while travelling and lecturing in northern Rennsylvania, though addressing public and incertainty of the cold of the specific, he was entirely recovered, and entirely accovered, and entirely accovered, and enabled, to pitture his calling without livery, and also when each and every one of such witnesses did themselves respectively sign the instrument. We have sadly fallen iway from the old practice! Formerly, when almost every man had a seal appended to his watch chain, or a seal ring, with his armorial bearings, or, at least, his initials, that seal [For The Press] vould be placed as a terminus to his signature, which it also individualized and corroborated. But now a lawyer's clerk, who draws up the inconvenience. No public speaker should be without them.

Ban Coup.—A married lady of 40 had taken a violent cold, which settled on her lungs, causing severe cough, psin in the side, and considerable fever and hoarseness. Such colds were usually very lasting and troublesome, but by taking the Specific Cough Fills four times per day, in three days after was entirely well.

A young man of 22 had a cough and hoarseness for afteen months During cold weather his voice was lost so as only to speak in whispers, put induced on coughing, cough dry, or raising only a triffs in the morthing, quite feeble and emaclated. Had taken several mediciples, with but little or no benefit. He commenced with the Cough Fills—one pill three times a day—and soon found himself improving, his cough milder and softry, noatzeness passed off, strength and appatite improved, and in a few weeks was entirely well, having taken no other medicines. deed, sticks on it a water where each signature ought to be, and puts a square bit of pa-

I have no doubt you are laying the world under great and issting obligations."

A gentleman of fifty years, well and favorably known at Deihl Delsware county. New York, had been a martyr to the piles for twenty years. Sometimes, from successive hemorrhaspo, pain, and suffering, he was reduced to the verge of the gravo. For years he had dragged out n missrable existence, a confirmed invalid, disqualified for any business, and life almost a burden. It is needless to add that he had tried all sorts of remedles, from all sorts of doctors, to little purpose. He consulted me two years ago, and I recommended our Pile Specific, with occasionally a Dyspensia Pili. Since the above was written, an experienced Philadelphia lawyer" has favored us with his view of the origin of the "puzzling" proess, so often applied to his craft in this city. After the Federal Constitution was framed. the Supreme Court sat for some years in Philadelphia, as it now sits in Washington. Numerous judgments and reversals of judgments in other Courts all over the Union, were given in Philadelphia during these years, with the reasons for such decisions, and though the Bench was not exclusively Philadelphians, these judgments gave such an opinion of law in this city, that, in other States, only a very difficult case was considered likely "to puzzle even a Philadelphia lawyer." Professor Mitchell's Lectures.

MR. EDITOR: In looking over the report you give of Professor Mitchell's lectures on astronomy, could not but be struck with the similarity o his theories and views with those of Andrew Jac son Davis, delivered sixteen years ago; and, al-though Dr. Mitchell's exposition of the m is conper over it, which he presses down with a sidered "sublime," "marvellous," "wondrous, ommon wafer-stamp! How a staid red-tape and "yet not in the least militating against Reve lawyer of the olden time would have been lation," I have never seen thy endorsement by surprised at this free and easy way of doing the secular press of Mr. Davis's views, notwith standing the ideas and the theory are precisely the same; only that Mr. Davis's are expressed with

pared down by erasures on its surface (cutting away the texture which had been written upon), "wotlift not hold water" as well as a parchment which had not been so maltreated. This, we have always understood, was the origin of the term that a bad deed "would not hold water," meaning an instrument frauduloutly altered after it had been executed. By a natural transition, or rather extension, the phrase is now applied to legal instruments so carelessly or badly drawn that objections raised to them might easily be sustained. Now, these deeds are precisely what Philadelphia lawyers have the high reputation of not drawning upon. On what authority Mr. Hyde Clarke gives his definition we are at a loss to knew. His idea of a "Philadelphia Catechism" may have arisen from a decision as to working on shipboard on Sundays, delivered, not long since, by a Philadelphia Judge.

There are not a few other odd definitions in his somewhat curious Dictionary to which we have notspace to drawattention now. However, we shall bear him in mind, and point these magnificent dimensions of Webster's Unabridged Quarto.

MURDER AND SUICIDE BY AN ARMY OFFICER.

The Davenport (Iowa) Gasette gives the particulars of a bloody affair which cocarred at Brooklyn, Poweshick county, Iowa, on the evening of the lith of February. It appears that on the verning before, a man got out of the stage at Brooklyn. He said he held the post of second lientennt at Fort Laramie, and was on his way to Washington city on furlough. He stopped at Dr. Conway's, and said he was airaid to go on to the oldy, as some men were after him to take his life. It was ascertained that he had the delivium trems. He staid there all day, and about five o'clock in the evening. Hen. Hawes, Cornelius Publicant of the wearing and one or two others, were sitting in Conway's bar-room with him. He was walking about the room, when, without saying a word, the lientennt drew a pistol, and shot Hawes through the heart. Hawes coalamed, "O, my God!" and died instantly. Putnam immediately caught the stran ye around the arms, and pushed him out into the street, when the officer put a pistol to his own tuttering a word. The papers found on his body showed that he was all he represented himself to be—that his name was J B. Roane, and that he was a widower, and has a daughter about fifteen the appears to be about thirty-five years old.
