I am led to believe from excellent authority that the sing the animus of those who expect to man-British-Government will certainly condemn Mr. Ottway, the British minister at the Mexican capi sgo the sext National Democratic Convention. It is a somewhat original idea that the doctrine tal, for lending his influence to the same of Min-mon, inquestionably, the cause of intelerance. The French minister has taken the same side, so that France and England stand with the absoluenniciated in the extract from The Parses; should place all who savocate it "in co-operaand affiliation with the Black Republican party." Dr. Wylie is partor. The mext step in order was the main feature of these opening services, the preaching of the dedi-catory sermon, which was assigned to the Ber-Wm. T. Brantley. D D, of the Bapitsi Church. Before naming his text he said he had heard these services' announced as "dedicatory," and yet he did not feel himself called upon to preach a dedi-catory sermon. He believed the work of dedica-tion had already been parformed. It had been dedicated to the service for which it was intended in the very act of its erection, and in the tervices which had preeded him. The Word of God from which he would address them, however, was contained in the 15th verte of the 24th chapter of Joshua, viz. " Choose you this day whon yo will serve". The discourse which followed was an earnest and hud a sposition of Sarlpure, with special refer-ence to its power and application to the souls of the avolt of God Furd bran free to say that it was it in the power of all the ministers in the world to convert a soul. That work belonged to God, and to Him only. It was God's love which must seek and arrest the sinner and commence the good work in his heart, and it was God's grace slone that could carry it on after. It was commenced. . Yot it was true, that in a yery important seese. carry it on after it was commenced. Yet it was true, that in a very important sense, every man had something to do towards obtaining his salva tion. A man, for example, could choose whethe on the one hand, he would seek such a sociation

and read such books as in their tendency would lead him to infidelity; or on the other, whether he would read such books as were more likely, under he blessing of God, to lead him to salvation n Christ. d Christ. The speaker proceeded at some length to arguing

in Obrist. The speaker processed at some length to argue the unreasonableness of abstaining from (God's, service. The terms upfn which selvalion was offered were eloquently dwelt upon, as being such in their freedom as none could reasonably reject. And in 'view of this, he cautioned, all who beord bim not to make a fatal decision. There was no neatral ground in this matter. " He that is not for me is agaanst me," was the standard by which such decisions are tried, and if any man said with-in himself, " I will neither be for God, nor agalast him," he deceived himself. The longer, too, that this decision was defarred the more rapid become the stream which was bearing the sinner down to the guif of perdition, until, finally, the day would come when saivation would bece who composed that the great mejrity of those who composed that the great mejrity of those who composed the noring of life. The ispaker here introduced sortoin college statistics to prove that from sit-teen to twenty years of aga was the most pro-pilious time for the new birth - There might be, and were, he know, many cases of conversion at a much later period in life; yet there were facia-enough to supply the fearful probability that, un-less they chose the service of God in the moring of life, they were most likely not to do so at all. "Choose ye *then* this day whom ye will serve" was bis ernest admontion. Another point which should not be overlooked, as a mighty reason. for, asting promptly in this matter, was, that "to day" " Now" is 'the day

Was his defines a monitou. Another point which should not be overlooked, as a mighty reason for acting promptly in this matter, was, that "io-day" "Now" is the day of salvation The present moment alone was ours; we had no less upon the fature. At the close of his sermon, Mr. George H. Stuart, president of the Young Man's Obristian Associa-tion, made an address full of interesting statis-tios. Salvation, it was true, said Mr S., was of the Lord; yet, it was alco true. that at all times, and in all ages. God had condescended to bless, the humblest efforts of his children in their endeavors to ortand his kingdom. In his brief and inte-resting statement respecting this tent morement; we learned that much good hed already been ac-complished by it. The first tont was dedicated on the ist of May, 1863. For six months it had re-mained in this oild, during which time, it had been pitched in air different localities; and it was a remarkable fact that, at overy one of the sor-vices held in it, from first to last, there had been souls awakened During that interval, 416 meetings had been

"Why did you that? Why did you how not not not did in peace?" From that moment, he began to recover and grow stronger, and in a month he was enabled to leave his bed and work at his trade.
