friends, it is to be hoped that it will not occur again; if it be sharp practice, it is easy for the Philadelphia trade to give the guid pro quo, by not contributing to the Boston Trade Sale next

Of course, we shall have the pleasure, and the Trade will have the advantage, of seeing Mr. Bell, that accomplished and experienced book-auctioneer, pre-side in the rostrum, with his wonted ability, good temper, ta ct, and success.

The shareholders who own the Great Eastern have resolved to abide by the Great Eastern have resolved to abide by the original determination of taking her to Portland, Maine, and her departure from England was to take place on the 15th of this month. She is expected to cross to Portland in seven days.

The Dollar Mark.

The interest, among our readers, respecting the origin of the \$ mark seems unabated, judging from the number and variety of suggestions which we continue to receive. Many of these tell us no more than what we knew before, and that knowledge we placed before our readers. Here, however, is a new correspondent, " VIATOR," who has just returned from Brazil. He writes as follows :

The sign \$ was always a mystery to me, as pupil and teacher. I was taught in youth, and in after years so instructed others, to regard it as a contraction for U. B., the U being written over the S. But age, travel, and reflection have targht me dif-ferently. The "dollar" is an old coin, much older than our Government, older than the English in America. You have approached the truth, I thick, in the views you published yesterday. But it strikes me that it needs a little more unfolding. It is not in Brazil, with its mil-reis, but in Spanish Ame-rics, and in Old Spain itself, that we find the true explanation of the cabalistic sign \$. The Spanish word for dollar (and from them we adopted the coin and its abbreviation) is peso duro, or peso fuerte-"hard dollar." Peso is the word in general uso. And in Spanish accounts this is al-ways contracted by writing an Bover a P, and written, as in Portuguese, after the sum. This, I conceive, to be the true explanation of the enigms, as every Spanish scholar knows."

ESGLISH PICTORIAL JOURNALS .- From Callende & Co., South Third and Walnut streets, we have received the Illustrated News of the World, (with portrait on steel of the Right Hon, J, W. Henley,) and the Illustrated London News, both of the 27th August, as well as the last weekly number of All the Year Round. The Illustrated papers (as we had to remark yesterday in our notice of Harper's Weekly) literally form a current Pictorial History of the Times, and will save a world of research to future Macaulays.
