The town elections in Connecticut, on Monday, soulted more favorably for the Republicans than ever before. Out of 105 towns heard from, the Relicans were successful in 63, the Administration in 35, and in the balance the result was either divided or did not depend upon politics. The Republicans made a net gain of seven towns. Mr. Choate's private library is to be sold at

WARHINGTON, Oct. 7, 1859. In the midst of the almost universal disastors which have fallen upon the Administration of Mr. Buchanan, the result of the election in California is regarded as an especial benefaction. It comes to the official lips like a draught of water to the fleeing fugitive hunted by the officers of the law which he has outraged. General Bowman rolls it under his pious tongue us a delicious plum; Sir William Brown-e—the titled editor of the Constitution—carries it about with him as if it had been a new decoration conferred by her Mejesty; Attorney General Black quotes Shakspeare copiously, in praise of California, and even Jonks grows in-spired over it. The only one who seems to look upon it in a commercial or mercantile sense, is Mr. Howell Cobb, of the Treasury, who, calculating the victory by the money it has cost draws many a profound sigh—for California, since Dr. Gwin has been in the Sonate, has been a constant mendicant at the doors of the Federal Treasury; not

the State herself nor her people, but her politicians who get what they ask for, so long as they wer and assist others to their share of As quaint old Senator Clarke, of Rhode Island, said on one occasion in the Senate, when a Califorvia Senator was pleading for a new appropriation for the "Golden State": "Mr. President: The Senator from California reminds me, in his daily appeals for appropriations to this body, of an infant at its mother's breast-he is all the time sucking or crying." But do these gentry in office here know that the contest in California was really made by the Administration men against the Administra-tion policy on the Territorial question, and that, in order to defect Broderick and McKibbin, Dr. Gwin and his followers were compelled to take the Douclass doctrine, without which all the money, and all the offices conferred by Mr. Buchanan, yould have been of no account? A Californian who arrived here by the last overland mail assures me that the following resolution, adopted by the Democratic anti-Broderick State Convention, was everywhere many the form of the go-salled Administration men, through the late content;

Resolved; That the organized Territories of the united States, although not endowed with all the attributes of sovereignty, are only held in the Territorial condition until they attain a sufficient number of inhabitants to authorise their admission into the Union as States; and, therefore, are justly entitled to the right of self-government, and the undisturbed regulation of their diffused or local states; and that avery attempt, by Congress or any of the States, to establish or assistant, prohibit or abolish, the seletion of master and sizes in a Territory, would be a departup from the organism we adhere; immorably, to the principle of "ponintervention by Congress with slavery in the fistes and Territories," as declared in the Kansas-Nebraska bill, and openly disclaim tellowship with the selection, or availance of that principle.

The State-Rights Democracy and the State Ticket.

Hon, Robert E. Wright, of Lehigh county, a member of the Democracic State Central Committee, appointed by a Convention of the State-Rights Democracy, held at Harrisburg on the 13th of April last, has issued an address to the Democratic party of that county, calling upon them to refuse to vote for the State ticket nominated by the Administration Convention of the 16th of March last. We copy the following extract to show the spirit that pervades the true Democracy in that that porvides the true Democracy in that honor and sprit of the Oligarchy intact; but quarter: be fatal."
It is a somewhat refreshing idea, that if Judge

Douglas were made the nomines of the Charleston Convention, by the votes of the South, the Southern slaves would insurrect, while if the Republicans triumphed they would subside. There may be partisanship in this, but is there any logic?

Public Amusements. our support are all eminently worshy of the place they occupy.

"Every true Democrat, therefore, will use all honorable efforts to have them elected, and by so doing will preserve intact the organization of the party, show the world its numerical atrength, and fill our local offices with able, honest men.

"But with regard to the State ticket, now before you, the case is very different. The vote which may be cast for it will not be merely a vote for men, but, because of the platform on which these candidates are placed, will be looked on abroad as indicating our views on the great question of Territorial Government, the only one which will enter into the national context of 1850.

"For advocating, in its broadest sense, the pears at this theatre on Monday night.

National Theatre.—This afternoon, the juve-

ritorial Government, the only one which will enter into the national contest of 1860.

"For advocating, in its broadest sense, the glorious principle of popular sovereignty and non-intervention by Congress in the local affairs of the Territories, the Democratic party trimphed in 1856. For denying all files, and for mother cause, the Republican party were defeated, and on this platform must we stand if we would hope to be successful in the next national campaign.

"Those who placed in nomination John Rowe and R. L. Wright, for reasons best known to them selves, have undertaken to put a new interpretation on this Democratic principle—one which has frittered it away anddestroyed its practical usefulness; and if this licket should be elected, the poople of other States will take it as proof that Pennsylvania has abandoned her political principle.

"No true Democratic principle—one which has increased in the public never tires. "The Dumb Man of Manson popular sovereignty, will vote this State ticket at the principle.

CITY ITEMS.

SOMETHING NEW.—We took occasion, some weeks are, to call the attention of the public to a new Patent Urn invented by Mr. James Spear, No. 1116 Market street, and attached to the celebrated Silver's Gashurning Parlor Stove. of which he is now the principal manufacturer in this city. The "Urn" surmounts the Slove, and answers at once the double purpose of making a handsome ornament, and rendering the operation of the stove much more perfect than without it. We then expressed our confidence in the value of this invention of Mr. Spear, and in order to test its merits more practically, we called jesterday at his warerooms and saw one of the stoves, with the Urn upon it, in full operation. The result confirms our predictions most perfectly. Indeed, so decinedly is this a real improvement, that we doubt if any other, but Mr. Spear's make, would this season be used at all if its merits were generally known. To be more explicit with regard to the nature of this admirable invention, we may state that a stove, with the "Urn" attached, may have its door kept constantly cloved, (except for feeding,) the consumption of coal being regulated entiroly by the register formed in the Urn; and the great advantage of this strangement is that the entire surface of the story is constantly kept at a uniform temperature, by which move than four times the amount of radiating surface is obtained over stoves in which the heat is regulated by opening and olosing the door. We look upon this as one of the incest substantial and seasonable inventions out, and advise all who are in want of stoves to call at Mr. Spear's and examine it for themsolves.
