The act was not Cook's, but Brown's. The mere soldier is never pushed for the outrages of his 'commander. And when you allow that the prisonor's great error was his en-listment under the leadership of Brown in the first place, then you must admit that everything else has followed in logical sequence. Obedience and fidelity upon a leader in a false and permisous oange are entilded to offset, in some mesaere, at least, the evi that has flowed from them. But the prisoner took certain waspons, hallowed by great and sacred associations, from the postgost of bis mind. The act was not plunder, for he plodged their safe return to their owner, and has faithfully kept that plodge to the full extont of his power. But his wayward fanoy was caught with the idea that a spell of enchantment hung around them, and that, like the relics of a saint, they would bless and prosper any cause in which they were invoked. The sword of Froderick the Great, and the pistols of Lafayette linked to the name and family of Washington! With what a oharm such associa-tions would strike the poetic temperamont of a young enthusiast embarked in an onterprise pre-senting to his perverted imagination the incontives of danger and glory; and if a new order of things was to be inaugurated, and storm and revolution were to shake the country and the world, like the heart of the Bruce or the cagles of Napoleon, these warlike incentives of heroes were to fasci-nate and allure followers, and hallow the battles in which they were lifted.
