The News.

Hon. J. C. Breckinridge, Vice President of the United States, arrived in this city yesterday, and is stopping at the Merchants' Hotel. We have three days' later news from Europe, by the arrival of the steamer Europa at Halifar, yes orday, but owing to the breaking of the wires the telegraphic summary of her news is short. The British steamship Circassian, from Galwa the 12th, via St. Johns, Newfoundland, the 24t ult., arrived at New York yesterday. She brings Wonderful accounts are given in the California papers of the richness of the famous Washee val-ley, or rather Carson valley. silvar minley, or rather Carson valley, silver mines-far ahead of the world-renowned mines of Chili and Peru. The vein now being worked is situated just over the line of California, in Utah Territory, distant about 175 miles from Sacramento city., perfeely accessible by teams, over 400 of which are juired. Now, as no power has been delo-now handing over that route to and from Sait Lake. zated to the United States to govern the The mines were discovered by a man named Com-stock, and, as usual, he sold his claims for a small amount to different parties, who are now working them. One company, known as the Walsh Com pany, are getting out at the rate of two tons a day of the silver ore, besides several tons of the quarts stripped from the vein, which has been yielding, by the Mexican "Arasta" process, over \$400 per day; but the gold is lessening as they go down, and gradually merging into silver. The voin has been traced over a thousand feet. The Walsh Company have 1,400 feet; next comes Bryant & Raymond, who own fifty feet, for which they paid \$400 per foot, from which they have already shipped thirteen tons ore, worth, by actual demonstration, over \$3,000 per ton. From the Walsh wein there have been about twenty-eight tons shipped. This ore is sold for from \$2,500 to \$6,000 per ton, containing both gold and silver, but silver

Owing to financial difficulties at the West, the bonds of these States, which are largely held as a basis of banking, have been brought into narket more freely in November than is usual.

The public debt, direct and indirect, of the State of Missouri is \$19,658,000, the liqui lation of which is well provided for, and the interest will be punctually met. The guarantee bonds to railroad com-panies were issued upon condition of mortgages upon the several roads, and should these com fail to provide for the interest hereafter, the State will promptly, under any circumstances, pay the interest itself. Tennessee has provided a sinking fand which will secure the creditors of the State against any possible reduction of revenue to meet the final redemption of the bonds. Virginia has also made ample provision for the prompt pay-ment of semi-annual interest, and her bonds may be considered among the most reliable in the mar-ket. Yet, in the face of these facts, the six per cent. bonds of Missouri are selling at 84a85; Virginis at 93a95, and Tennessee at 90a91. The Jaque, of Matamoros, of Nov. 12, says that on the previous day one hundred and fifty Texan volunteers (Capt. Tobin's command) arrived at Brownsville. Cortinas had had news of their approach, and, therefore, during the night, came up the town and fired a couple of volleys, which induced the people inside to suppose that the rein-forcements, when they approached, were enemies. The consequence was, they were fired upon from Brownsville. Mr. Clayeck then crossed over the Matamoros, by swimming his horse across the river, and informed the authorities of that place of the true state of the case. This intelligence was then sent over to Brownsville, when the volunteer entered the town. Cortinas afterwards again approached, but efficient preparations were made to repel and pursue him. The same paper expre much surprise at Cortinas' proceedings. It says that he was keeping Brownsville in a perpetual state of alarm, apparently without any object.
