By PHILLY HENRY GOSEE. F. R. S.

"To open the path to the myriad wonders of Creation which, slicesher unseen by the unassusted eyo, are made cognizable to sight by the air of the microscope, is the aim and scoppor this volume. Great and gorgeous as is the display of Divine power and wisdom in the things that are seen of all, it may a tely be affirmed that a fer more extensive prospect of these glories lay unleaded and unknown till the opticians's art yevealed it. Like the work of some mighty scole of Oriental fable, the brazen tube is the key that uplocks a world of wonder and beauty before invisible, which one who has once gazed upon it can never forget, and never cease to admire."—[Extract from Preface.
