Terrent, Correst, Dar Donas Cath, Answer and A The attention of the General Assembly was called, somewhat at length, to the existing condi-tion and further requirements of our school system, in the annual message of last year. As , is about five and a baif mills, and for building purposes about three and one-sixth mills on the dollar. Including the city of Philadelphis, the entire cost of tuition, i.e., was \$2,047,661.92; the building expenses, \$331,413.85; and the whole ex-pense of the system in the State, for the year, \$2,579,075.77. Though the school year ending on the first Mon-day of June last, was one of unusual difficulty in monoy affairs, yot the system manifests an enour-aging activity in all its departments, while the rate of taxation, both for tuition and buildings, would appear, from the official report, to have somewhat decreased. But, it is by a contrast of the present condition of the system with that of 1854, when the agencies now operating so bench-cially were created, that results are nous plainly soon. Within that period, the whole numbor of pupils has been increased meals. There results, with the others which the official report will ex-hibit, unerringly point to the duty, as well as ne-cessity, of the utmost care and attention, on the part of all public agents, to this primary social institu-tion-primary in importance, no less than in the careor of each citizen. To strongthen, to retain pure, and to properly direct, this tountain-head of social influence, is, it seems to me, the great duty of the law-maker, in his highest and most respon-sible capacity, as the framer of the future of the State.
