Washington, Jan. 18.—There were indications to day on the part of the Republicans to have a night session, with the view, if possible, of bringing the contest for the Speakership to a termination; but a sufficient number of them were not united on that purpose. The galleries were consided to their utmost capacity by persons of both sexes.

The Senate has confirmed the nomination of Mr. Hughes, of Indiana, to supply the vacancy in the Court of Claims. Action on the Mexican treaty has been delayed, owing to the voluminous documents not being printed. The order for the latter purpose was made to-day.

Several Senators are preparing speeches to be delivered next week on the slavery question. Some of the most intimate friends or Senator Beward say he has no idea of making any during the present feverish political excitement.

FINANCIAL AND COMMERCIAL. The Money Market.

PRILADELPHIA, Jan. 18, 1851 The board to-day again suspended for sixty days ne penalties against such of its members as may e guilty of dealing in "puts" and "calls." In his the Stock Exchange have made a sad mirtake Their action is calculated to cast still more odium on stocks as a medium of speculation for it is impossible to perceive any real difference between an operator risking his one or five dollars against the market price of any stock and the ordinary operations of a fare bank. In reply to this, it may be urged that all speculative operations in stocks are gambling. This is no more true than that nearly all the operations of commerce deserve the name of gambling, for they are all, to a more or less degree, based on individual judgment as to future value and corresponding risk of loans, and though they may not be liable to such extensive fluctuations as Reading or Long Long Island, they still contain the elements of speculation, and differ only in degree. There is no real difference between stocks as a legitimate baris of speculation, and flour, whiskey, real estate, ar-1 dry-goods. By legitimate speculation in stocks we do not mean the operations of the outside rocm, to which eighteen months ago, and now by the saspension of this rule, the board of brokers have abandoned their speculative lusiness. Of the ope rations of this room, generally known as the "slaughter-house," we think the public hare suffcient knowledge to save the necessity of any more descriptions
The transactions there are a'most entirely based,

either directly or indirectly, on "puts and "calls," and are conjusted without order or rem larity, and sometimes in a spirit that makes the rule of might the sole arbitrator. When such is the policy of our stock ex-bangs, can it be wondered at that the bulk of operations in speculative stocks are executed in New York ' At the board meetings to-day, sound securities
