As an evidence of the extent to which they have received the endorsement of the sublic, we may state, that unwards of Thirty Thousand of them are now in daily use in the United States, giving perfect astisfaction to their owners. This result has been effected in the teeth of the most dotermined and violent opcosition from the greater part of these in the Watch Importing Trade in the large outse, who have systematically used all their influence with their outourers to discourage their dealing in an article which threatened, by its superiority to displace the foreign watch to a great extent. Many of the Jew-ellers and Watchmakers of the interior, a large propor-tion of them foreigners, seconded the efforts of the Watch Importers, being perfueded by their counsels, and misled by a contracted and imperfect view of their own interest; by the far of loss on their stock of m A NTHRACITE INSURANCE COMPA-

Watel Importers, being persinded by their counsels, and misled by a contracted and importent view of their own interests; by the far of loss on their stock of im-ported watches, and the apprehension that their profits might be diminished through competition in a well-known domestic article, with other groundless preju-dices arising from a succeficial inquiry into the subject. Notwithstanding this, however, the watches have stead-ily gained in the estimation of the people, the retailers have been constrained to keep them to supply the de-mand, a d by degrees, we are happy to add, their pre-judices and alerma are being disapated. Uur present system of making the different parts of each watch the exact counterpart of every other watch of the arms series, leads to aunifornity in quality which own allows and alerma are being process. If one of our watches is good, all are good, whereas each foreign watch is only a probability by itself, depending upon the skill and ficelity of the particular workman who may hipper to be employed upon it. In addition to these primary conditions of success, every watch issued by the Company is made of the most choice and enduring materias, carefully finished by the various processes to which they are subjected, and then put together, in-spected and severely tested by the best workmen in the factory. Buch has been performed, that out of the large number of watches sold, not more than a dozon or two have been returned to the Company for exchange, from any cause whatever. Every watch is suparatised by a guarauty that is good for something, and by parties that can be readily readed. Foreign watches, of the most inferior desorp-tion, are often *fully guarantied* by their makers, whom it is impossible to call to account under any curoum-stances. Allock, and on MONDAY this in the evening. This old institution has always paid in full, on demand, without notice.
