CULTIVATION OF THE TEA PLANT .-- The Dinese tea plant has found in several localities in the Southern States a congenial soil and oli-mate. The plants introduced by the late Dr. Junus Smith, at Greenville, S. C., are remarkably junus Smith, at Greenville, S. C., are remarkably thrifty. Dr. Davis, of Cottage Hill, near Mobile, has also met with complete success in cultivating the tea plant. His light and sandy soil seems to suit it admirably, and after some eight years' trial, he has found the plant perfectly hardy and free from blight or any other disease.

THE POPULATION OF JAPAN.—The number of inhabitants of Japan is to a great extent a mat-ter of conjecture. Some writers place it is solve as 15,000,000, while others have estimated it as high as 40,000,000. From a calculation based up n the revenues, and their equivalent in rice, there seems to be good reason for assuming that the estimate of 25,000,000 is not too great. THE Supreme Court of New Hampshire, in reply to interrogatories from the Legislature, say they are of the oplinon that the Legislature has no power either to lesson the number of jurymen, or to provide that less than the whole number can render a verdict.
