Her best genimaris invoked to produce orations, which will be rescribed by their literary merit from the common-place character of ordinary patriotic anniversary speeches; and her municipal authorities unite with the citizens in zeasions offorts to surround these annual celebrations with as much celat as possibles.

On Wednesday last Edward Everett was it die diotes and the season of the common of the control of the common of the control of the citizens in zeasions offorts to surround at length in the Boston journals of Thursday morning. It fully sustains his early islaid at length in the Boston journals of Thursday morning. It fully sustains his early able reputation, and excited the intense admiration and enthusiasm of his audience. It is principally devoted to an examination of the charges made by Earl Garr in the English House of Lords in April last, that "in the United States, since the Revolution, and by the undue extension of the right of auffrage, our elections have become a mockery, our legislatures venal, our courte fainted with party spirit, jour laws coobwebs' which the rich and poor alike break through, and the country and the Government in all its branches, given, over the corriuption, violence, and a general divergage of public morality.

More Outreages by Cortinas in Texas.—A correspondent writes from Brownsyllle in a late letter; 'Cortinas visited the runche of a friendly Mexichy, on the right bank of the Rio Grande, last week, and killed Sonor Sillente, together with several of his family, for no other reason than they had refused to quarter rome of the men belonging to Cortinas Party. At the time of the assassination, Cortinas declared that he knew everything that was being done in Brownsville; he knew the troops intended to leave as soon as the yellow fever broke out, and then he intended to pay off his old soores. The Mexican troops, from Matamores, as soon as the news reached that place, set out for the ranche of Seior Sillente, for the purpose of aryesting the bandit, but as Cortinas was at the head of two hondred men, and is better informed than his pursuers, I doubt if they make any headway, 'even allowing that they desire to meet the rasal.'

There are about seventy-clerks connected with this department of the Government, and they will comply twenty rooms—ten on the first and ten on the second floor. The rooms of the Commissioner and chief clerk, which are opposite each other, have been fastefully and cloganity arranged. The Consus Bureau will likewise occupy rooms in this end of the building.
