RELIGIOUS MEETING -A meeting of the CURE FOR IN-GROWING NAILS. -It is stated, RELIGIOUS MINUTING —A meeting of the members of the United Fresbyseries Charch is thus city was held just withing in the charch of the Dr. Dr. Dates, "not give the control of the control of the properties of the state of the control of the properties of the state of the control of the properties of the control of the control of the properties of the control of the properties of the control of by a correspondent, that contempation by hot tallow is an immediate cure for in-growing nails. He fays: The patient on whom I first tried this was a young lady, who had been unable to put on a shoo for several months, and decidedly the worst case I have even seen. The disease had been of long. standing. The edge of the hall was deeply under-mined; the granulations formed a high ridge, parily covered with skin, and pur constantly coxed mined; the granutations formed a migh ringe, parity covered with skin, and pus constantly coxed from the root of the nail; the whole toe was swollen, and extremely tender and painful. My mode of probogoling was this: I put a very small piece, of tallow in a spoon, and heated it over a lamp until it became very hot, and dropped two or three drops between the nail and granulations. The effect was almost magical. Pain and tenderness were at once, relieved and in a few days the granulations were all gone, the diseased parts dry and destitute of feeling, and the edge of the nail exposed so as to admit of being pared away without any inconvenience. The: cure was complete, and the trouble never returned. I have tried this plan repeatedly since, with the most satisfactory results. The operation on auses but little, if any pain, if the tallow is properly heated. A repetition might, in some cases, be necessary—although I never have met with a case that did not yield to one application. Admitting the theory of Dr. Lorintor to be correct; the modus, operated is very plainly to be seen. The liquid cautery insinuates itself in every interstice under the nail, accomplishing in one minute, without pain, all that can be effected by the painful application of nitrate of silver for several weeks.—Medical and Surgical Journal. by Christians throughout the world. The speaker wide and thinks that says accounts of this maryellous action left Providence among that people could have excited by various includes connected with the revival and the program were full of interest, and were listened to with profound attention. He concluded with a strong appeal to the Christians of America to asilate by their prayers and contributions to appeal to the christians of America to asilate by their prayers and contributions to good work now progressing.

At the conclusion of the discourse, Rev. J. T. Copper, D. D., offered a resolution expressing the condence of the meeting in the representations nidence of the meeting in the represent. Kilpatrick; and recommending his EMPROVEMENT ON CHESTNUT ETBEET. The splendid marble block which is boing built by Dr. Jayne on the site of the old Arcade is going Dr. Jayne on the site of the old Arcade is going forward rapidly, and the front already gives promise of cartraordinary beauty. The material is white marble, from the Lee quarries, New Rogland, and it contrasts handsomely with the granite half west of it, and the more sombre-looking Commonwealth haidling on the east. The new structure has a front of one hundred feet, and it, will be four lotty stories in height. One important feature of the atores is the fact, that they will be in a great Commonwealth for the fact, that they will be in a great Commonwealth for the fact, which will be laid in concrete, less upon from girders and brick about, and the brook into the stores, which will have a clear greep through from Chestaut street to Jayne, a distance of one hundred and fitty feet.

COTIVE FIRE. - A fire broke out about DESTRICTIVE FIRS.—A fire broke out about three o' clock yesterday moraing in the third story of by idding No. 230 Quarry street. This building is word by Mr. Jasob Lenned, and was principally used as a manufactory of reeds and hurdles. The fhird and fourth stories were entirely burned out, and the other portions of the building were delayed with water. Mr. Lenned estimates his loss on building, stock, machinery, &c., at \$2,000, which is covered by insurance. J. P. Wilkinson, turner in wood, occupied the second floor. His less is shout \$1,000, inon which there is an insurance of \$304. The flames were confined to the building in which they originated; but the poor people who occupy the courts and alleys which abound in that heighborhood were greatly alarmed. The gright of the fire is still involved in mystery.

WALK OF LIFE — We talk of human life as a journey, but how variously is that journey performed!

There are those who come forth girt, and shod, and mantled to walk on relvet lawne, and smooth terraces, where every ga'o is arrested and every beam is tempered. There are others who walk on the Alpine paths of illef-gainst driving misery, and through stormy sortows, over sharp afflictions; walk with bare feet and naked breast, laded, manaded, and chilled; whilst there are still others whose pathway lies between these, two extremes, who preserve the even tanor of their way, and buy their garments at the "One Price". Manufactured solely No. 69 North FOURTH Street, and for sale by Company and Street, and for sale by Company and Street FROM PROFESSOR BUOTH.—"In my opinion the HARTELL JAR combines more advantages than any others for Preserving, being wholly of glass, cleanly, strong, and durable, cloning air-tight, and opening and shutting with facility.

"HAMES C. ROOTH" of glass, cleanly, strong, and durable, closing air-tight, and opening and shutting with facility.

FROM DR. ATLEE.

"I have used the Hartell All glass Jar in my fami y for the preservation of Fruit, and in comparing it with others previously employed for the purpose, I consider thighly preferable, and particularly so to motal jars or lare with metal lops. It is perfectly are tight, and free from all possibility of taint, as is the case with metal. It is secured with more ease, rapidity, and certainty than by cement or solder, and opened readily, while the fruit is kept in the most admirable manner. Having tested the Jar well, consider that it meets all the indications that can be desired.
