the possibility of danger to the surrounding buildings.

The noble structure of Mr. Mitchell is, however, in rains, together with the immense stock and machinery which it contained. Nothing butter few which it contained in machine which it is statistic. The content is structured to discuss a few in the proposition of the content of the commission was prize statute by a sabsoquent affirmative statute, rest on a rule in the containing statutes as familiar as it is well established.

The Freshet at Easton, Pa.—A Man Drowned.

[From the Easton Express, Nov. 5]

For come days past a large number of boats have been lying in the basin and along the Lehigh cennal, at this place, waiting for the completion of the repairs on the Delaware Division canal. Yesterday morning, three of them, that were tied to gether and fasteved at a point below the Lehigh bridge, were loosened, and an attempt was made to out the down into the basin, at Hufftown, but the boats got too far out into the current, which boats got too far out into the current, which boats got too far out into the current, which boats got too far out into the current, which boats got too far out into the current, which boats got too far out into the current, which boats got too far out into the current, which boats got too far out into th

city. Coke.

P. S.—The writer has no interest in any property around or in the violnity of either Independence Square or Penn Square.

Letter from Minnesota.

Captain Charles Charles Couerty's

The last named captain was drowned. He lived, we undorstand, in White Haven. The other two, after being threwn away from their beats by the water, clung to some drift wood, and were saved by persons who went out in batteaux to their assistance. Couerty's body had not been recovered this morning.

pale countenance, and nervous derangement, analyses of the blood show a deficiency of the red globules. Huddy complexion and a rosy tint of the skin, is always indicative of health; while a pale, wax-like skin and countonance—which evinces a deficiency of the red globules—accompanies a diseased organism. Preparations of Iron have been given for the purpose of supplying the red globules, but we contend that Iron alone, Sulphur alone, or Phosphorous alone, will not meet the deficiency in every case, but that a judicious combination of all these elements is necessary to restore the blood to its normal standard. This point, never before attained, has been reached in the Blood Food, and its discovery ranks as one of the most scientific and important of the age. Is effects in CONSUMPTION PHILADELPHIA BOARD OF TRAUE,
