It soon, however, came to blows, and both the General Government and neighboring pro- vinces prepared for the invasion of Counpeacity. That plucky little State, however, antheipated their movements, and marching a body of troops directly on the sapital, conquered a treaty of peace, which guarantied her in the enjoyment of her own sovereign rights. That was the state of things at last accounts. In the height of the difficulties an attempt was made by the General Government to get possession of the Bralliants, to arm her for a coast war, but she succeeded by flight in making her escape. The invaders afterwards got possession of a little launch, with the same object, but appear to have accomplished nothing. The brilliants also brings intelligence of a re- newed attempt on the part of the Constitutional Government of Juarez to put a stop to the sale of the yacateos, or native Indians of the peninsuls. The business has been carried on to a greater or less extent for years, but much more extansively the last year, under the portection of the local go- vernment, by virtue of a contrast made with the house of D. Joso Jeass Madrago, of Havana. Un- der this contract, Sr. M, was to advance, a tengetified times, the sum of \$40,000. for the purpose of carry- ing on the war with the Indians, then in insurrec- tion; and to roceive his pay in prisoners of war, at the rate of \$120 for every woman of the same age; \$50 for optifier no thet ages of 6 and 16, and all un- der that for, nothing. Under this contract time with great profit, notwith- standing four different interdicts, one as late as the 25th of Soptember last, and it is probable will oon- tione to be carried on, inasmuch as the federal Government has no means of stopping it. The In- dians are taxen to Lavana, and there, sold like Coolies at various phases under different contracts. They under thas no means of stopping it. The In-
