The trans-port steamer that arrived on Tussday evening acted very strangely yesterday morning, and my-self and two others, Mr Weolsey and little Sam. Pinney, resolved to visit the island and sift the matter. At sundown we succeeded in getting a bost, intending to camp on Santa Rosa, but after reaching the island concluded to crose the sound and pass the night at the "United States Live Oak Plantatieu," which has for a long time been in charge of Mr. Grifing. We did so, and at seven o'clock this morning we landed on the island, a mile and a balf east of where the frigates Sabine, Brooklyn, Wyandotte, and the transport steamer the most laconic terms and answered correspond-

New made tracks of men and horses were seen at every step. We crossed over rather outliously, and the first object of note was a ship's launch lying on the beach, containing the wearing sppa-rel of soldiers and some machinery for raising heavy bodies, probably casmon. The next object, and by far the most interesting, was the direct approach of eight small boats for the shore, while two others were beaching about, and all loaded to their utmost capacity with soldiers, sailors, and marines. BANDAGES FOR THE ARXY. We have received a number of communications respecting bandages. We are reliably informed that bandages should be made of soft, plible, unglased muslim, such as is sold at six to ten cent per yard. The muslim should be torn, not cut, into strips, and these strips sawed together at the ends with a coft flat seam When long enough, the bandage should be rolled as tighting and com-pacting as possible, and when rolled the loose threads should be removed from the ends of the roll. The length of the bandages should be marked with a pencil on each roll. with a pencil on each rol Bandages of the following lengths and width:
