Affairs in and Around Washington. The Star of last evening says: STABBING CASH.—Yesterday afternoon a difficulty o curred at the Government Mess House, corner of H and Twoncy second streets, in the First ward between an ambulance driver, said to be named Duffy (nome accounts say he is a Bulti-morean named Win Jones), and a Government teamster named John O'Day. Duffy threw O'Day down, and scatbed him in the back, inflicting a terrible wound several inches in length. O'Day was laboring under such excitement that he did not know he was stabbed; but on blowing his nose a bubbling sound was heard. a bubbling sound was heard. Robert Johnson, the stable master, asked him to blow his nose again, when the sound was again heard, caused by the escape of air from the lungs through the wound. He then walked to Dr. Bmoov's office, but was greatly weakened by loss of blood, and from there he was taken to the hostital of the steamers from that point to the navy yard. They selected two iron steamers called the Union and the General Scott, now being built at Neafle & Levy's dock, and a packet steamer of the Buston with the limit of the steamer of the Buston and the General Scott, now being built at Neafle & Levy's dock, and a packet steamer of the Buston and the steamer steamer steamer scalled the Union and the Union and the steamer scalled the Union and the scalled the Union and be cannot possibly recover. He says the Confederates have advanced as far as Bush Hill and Claremont, about the vester of the vessel may be torn away. The Kensington is two years old, and one nundred and fitty burses were sent to Wash ordered him yesterday morning to laws forth. ordered him yesterday morning to leave forth-Another Homicida.—A private in Col Cass's Elevanta massachusetts Regiment was shot dead, at a drinking house in Biadeneburg, night before last. It seems that a squad of the regiment was sent out to arrest and bring into Camp Cartin a number of men belonging to the regiment, and who had been absent therefrom for several days. Among the number was the deceased. He resisted the guard, and in an attempt to escape from the house was shot dead.

The Board examined a few terry boats, among ethers, the Curlew and the Eagle, of the Glouesetts line, and a Schuylkill tug-boat, lying off the Arsenal. These were condemned, however, and not adverted to in the report.

At Wilming'on, they remarked two excellent yessels—the Morgan Ship, No. 4, and the Virginia Dars—both new side-wheel steamers. 21, Chas F Lennig. The Baltimore Police Commissioners | Wm 8 Willing, and Writs of Habeas Corpus.

On Wednesday morning the sheriff of Kings county, New York. Arthony Campbell: J W. Higgins, deputy, and F J. Dalton, proceeded to Fort Hamilton, for the purpose of serving an attachment upon Col Michael Burks, commandant at Forts Hamilton and Lafavette, for refusing to make return to a writ of habeas corpus, directing him to produce the persons of the Baltimore Police Commissioners. The officers went to the fort, and, making known their business to the officer in charge, were politely informed that they would not be permitted to visit. Fort Lafayette, or take any prisoners now in charge of the military authorities of that station. A guard was brought up, and the beats were strictly watched, so as to prevent any person from reacking the fort, which is known to be situated in the changel some distance from shore. The county officers, finding further. and Writs of Habeas Corpus. known to be situated in the channel some distance from shore. The county efficers, finding further attempts useless, returned to the city, without having accomplished their object.

The following is Sheriff Campbell's return:
I am unable to arrest the within named Col Michael Burke being commanded—the said Michael Burke being commandent of Fort Lafayotte and Fort Hamilton I have endeavored to obtain entrance and access to Forts Hamilton. Lewis Vanuxem. Michael Burke being commandant of Fort Lafayette and Fort Hamilton I have and exored to obtain entrance and access to Forts Hamilton and Lafayette, which are held by armed troops, and am not able to serve the writ; and have no power or means within my control sufficient for that purpose.

Anthony F. Campbell,
Sheriff of Kings county.

Dated Brooklyn, Aug 14, 1861

In making this return the lieutenant colonel gave verbatim the answer he was instructed to make by Lieutenant General Winfield Scott.

Not satisfied with this return, the county judge declared that the commandant should state on his return: 1 whether the prisoners called for were in his custody, and, 2, by whose authority he held them. This Lieutenant Colonel Burke declines doing, since he has received no instructions from his superior officer to make any return other than the one already given

Application was them made to General Duryes in Brooklyn, by order of the inevitable Judge Garrison, to ascertain what force could be obtained to serve will be desired. his superior officer to make any return other than the one already given.

Application was then made to General Duryes in Brooklyn, by order of the inevitable Judge Garrison, to ascertain what force could be obtained by the county to execute the writ General Duryes informed the sherifithat about fourteen hundred men could be raised, but that the county was in possession of no artillery sufficiently powerful to make an impression on the works, and that it would require between five and ten thousand men to take them

So the matter rests for the present. Judge Garrison is evidently perplexed by the firmness of Colonel Burke.

In order to insure the safety of the prisoners, the garrison at Fort Lafayette is to be immediated. the garrison at Fort Lafayette is to be immediately strengthened. We learn that the right wing of the regiment known as the Long Island Volunteers quartered at Fort Schuyler, received orders on Wednesday to proceed to Fort Lafayette for the purpose of reinforcing the garrison, and that Lieut. Col. Cross, with some 460 men, obeyed these orders promptly. The sheriff of Kings county, in his attempt to arrest the garrison, will find a decided obstacle in the way. It is understood that the sheriff has Judge Garrison's warrant for making the wholesale arrest, and was to have gone down with a posse yesterday morning for the purpose of executing it Explorations in Labrador. Professor Hind's exploring party has returned to Toronto, from his trip through the Labrador peninsula. The Toronto Globs says: the same as the one followed, perhaps for centuries, by the Moutagnas Indians. It lies, for a distance of forty miles, up the Moisic, which exters the Gulf of St Lawrence below Seven Islands. At that distance from the coast the Moisic becomes too im The route into the interior of the country was persons a torrent for the passage of any kind of traft, so that a traverse has to be made across the traft, so that a traverse has to be made across the country, and through small lakes, to the east knanch of the Moisic. Professor Hind's party constituted of Messrs Gaudet and Caley, surveyors, and Mr. W. Hind, artist, with eight voyagers and Indians. They accended the main and east branch of the Moisic as far as practic ble, in three cances.

'The region traversed by Professor Hind is destribed as yeary mountainous and with the avenue. seribed as very mountainous, and, with the exception of deep valleys, destinute of trees. As a subtitute for trees, moss of every variety, and of most luxuriant growth, o were the country. The species most common is the cariboo or reindeer moss, on which the snimal subsists throughout the year The count of from the coast to the table land has evidently sen peopled with sumerous bands of Indians a some not very remote period—the remains a "one not very remire period—herer mains of their encomponents, and the portage paths round rapids and between lakes being still easily discernible; but at present, the Montagnas and Nascapees, who formerly hunted in this devolate region, have either r-moved to the coast or followed the cariboo, on which they subsist in their migration to the north. The table land of the highest preprincips numerous very large sbrader peninsula contains numerous very large lakes, none of which are laid down correctly on any of the maps to which we have access; and large rivers exist in this yest peninsula, of which the names are not even known, much less their the names are not even known, much less their courses laid down
"Some conception may be formed of the character of the upper part of the Misse from the fact that one portage alone involved an ascent of eight hundred feet, over which canoes and provisions had to be carried on the shoulders of the voyageurs. The total length of portaging exceeded twenty miles in ascending from the gulf to near the height of land one hundred and twenty miles from the coast, and the altitude of the table land of the Labrador propinging was found to be about of the Labrador peninsula was found to be about two thousand feet above the sea.
