Mmaking a total which has been ap-proved and certified of acres..... 9,393,497,77 The Commissioner is very elaborate in his dis-cussion of the question of minerals. No country

cussion of the question of minerals. No country on the globe can compare with this in the posses-sion of mineral treasures everywhere developed as the administration of the land system advances over the broad surface of the public domain. Besides the precious metals, with quicksilver found in such the precious metals, with quicksilver found in such abundance in California, which alone has yielded since the first gold discoveries over \$600,000,000, we have regious rich in those metals in New Moxico, Nevada, Washington Territory, and Colo-rado. Copper, tin, lend, and coal, are profusely distributed over the great valley of the Mississippi, and westward to the Pacific. In regard to the precious metals in California. New Mexico, Nevada, Washington Territory, and Colorado, we have not such data as will enable this office to propose a properly guarded system by

Colorado, we have not such data as will enable this office to propose a properly guarded system by which the Government understandingly can dispose of auriferous, or of quicksilver lands, in a manner that would be just to public and private in-terests. It is, therefore, not now proposed to with-draw them by legislation from the state of isolation from sale in which the law has placed them, or from being freely worked, as at present; yet in this trying conjuncture of public affairs, when multiplied demands upon the treasury weigh upon it with unprecedented pressure, it could not be deemed unreasonable, after the hundreds of multiplied to be taken free of cost.

deemed unreasonable, after the hundreds of millions of dollars allowed to be taken free of cost, if the Government should hereafter subject the product of such mines to a moderate seigniorage, which it is believed would bear upon capital with-out prejudice to the individual miner. In reference to lands embracing copper, tin, lead, iron, and coal, it is suggested that where ei-ther mineral is the predominant element in the smallest legal subdivision, such tract shall be sub-jected to public sale, according to the principles laid down in the acts of 1846 and 1847, with the qualifi-cation that the uniform minimum shall be \$2.50 per acre at the public sale; that thereafter they shall be liable to private entry at same minimum, say for two years; after which they shall be liable to sale at the ordinary minimum, but not subject to the declining process of the graduation law. In

In two years, and which they shart of matter in the set of the ordinary minimum, but not subject to the declining process of the graduation law. In the geological reconnoissance of the late Dr. Evans in Oregon and Washington, immense discoveries of coal fields in that region were made. This great industrial agent is also distributed by the liberal hand of nature throughout the gold region. The recent discoveries of coal fields net far from San Francisco, and of that scarce and valuable metal—tin—but few mines of the latter having been discovered, although known in the early history of man, yet which is now found to oxist in the southwestern part of California, within thirty miles of the sea—furnish powerful incentives to capital, promising rich rewards to the enterprising. Instructions, by further legal enactment, would enable the Department to deal with these large and delicate interests more satisfactorily than can be done under existing laws. under existing laws.

SYNOPSIS OF THE REPORT OF THE POST.

MASTER GENERAL.

It appears that the whole number of post offices in the United States on the 30th of June, 1861, was 28,586; and that the cutter number of cases acted upon during the same period was 10,635, including appointments made by the President of the United States. The whole number of appointments made by the Postmaster General, 9,235, and the number by the President during the same pe-riod, 337.

rical, 337. The aggregate earnings of the different transatlantic stranship lines during the year ending June 30, 1861, steamship lincs du wéré \$392,887.63.

were \$302,887.63. The expenditures of the department in the fiscal year ending June 30, 1861, amounted to \$13,606,769 11. The expenditures were \$14,874;772.89, showing a de-crease, in 1861, of \$1,265,018.78. The gross revenue for the year 1861, including receipts from letter carriers and from foreign postages, amounted to \$8,329,296 Ap

10m lefter values and 100 means for 1861, as present-to \$5,639,2206.40. The estimated deficiency of means for 1861, as present-ed in the annual report from this Department, December 3, 1853, was 55,656,98, and there is an excess of estimated ciency, \$4,551,566.98, and there is an ex

THE CITY. THE CAPACITY OF THE FAIRMOUNT WATER

THE CAPACITY OF THE FAIRMOUNT WATER WORKS.—The extension to these works should have been completed two months ago; but it has unfortunately been delayed by a variety of circum stances—the chief difficulty being to have the ma-chinery prepared in time. A portion of it, it will be recoilected, was destroyed some weeks ago by the boiler explosion at Messrs. I. P. Morris & Co.s works. The destroyed castings, however, have been replaced, and all the machinery is now in po-sition in the structure. The ercection of the roof has consequently been dommanaed, and will be completed in a day or two. It consists of wrought-iron girders in connection with a series of brick arches, which latter aro compactly cemented together, and, having a rise of but eight or ten inches, are perfectly secure. The girders are supported by six iron columns, arranged along the centre of the authents of the arches, extending north and seuth, are filled in with the spoils of stome face a uniform layer of cement is spread, upon which a stratum of gravel is next deposited. The Markersomes are being the read is next deposited. The with a series of brick arches, which latter are compactly comented together, and, having a rise of but eight or ten inches, are perfectly secure. The girders are supported by six iron columns, arranged along the centre of the building. The channels formed at the abutments of the arches, extending morth and seuth, are filled in with the spoils of stone used in building the walls Over the whole sur-face a uniform layer of cement is spread, upon which a stratum of gravet is next deposited. The flag-scopes are being cut to the required shape, and REPORT OF THE MCMANUS DELEGATION .-

Hag-scores are being cut to the required source, and as soon as they are set the promenude will be finished. In dimensions it will be 113 feet by eighty-five, and will be surrounded by a neat mar-ble balustrade. REPORT OF THE MCMANUS DELEGATION.— The delegation accompanying the remains of Terence Bellew McManus to Ireland, have returned a report of the manner in which that duty was fulfilled, to the Phi-Indelphia Committee. They say: GENTLEXEN: Your delegation having finally discharg-ed their trust and committeel to the bosom of his native earth the relies of the martyred exile, which constituted their sacred charge, and being aboat to separate, beg leave to report briefly: The remains of McManus, on reaching the shores of his native land, were deposited in the Catholic Church of the Diocese of Cloyne, where the solenm service of the Catholic Church was performed by direction of the Bight Rev. Doctor Keane, the Bishop of the Diocese. Your delegation have the happiness to report to you find from the time they left the shores of America until the remains were deposited in Gluenevin, no incident so-curred and no word was spoken that was not in accord with the sacredhess of their trust. The utmost unanimi-ty prevailed among themselves, and between them and the committees of Cork and Dublin. They were received with curred the solar to the onst fervid assu-rances of sympathy were expressed to them by delega-tions from mest of the cities of Ireland, as well as from some of these of negland and Scotland. The Necesstry or A HOUSE of CorRECTION.

ble balustrade. Much has been said of the capacity of the new works, but its real extent is comprehended by com-paratively few. The old water-works have nine wheels, whose aggregate discharging capacity is 11,040,000 gallons per twenty-four hours. All of them are of course stopped at high tide, and during freshets. freshets.

freshets. The new works have but *three* wheels, while their discharging expacity per twenty-four hours will reach 18,000,000 gallons. A million gallous of water make an almost in-conceivable volume; and yet, we are informed by Chief Birkenbine, that at the recent burning of St. Paul: Obvieting street even a million Chief Birkenbine, that at the recent burning of St. Paul's Church, in Christian street, over a million gallons of water were poured upon the flames; fifteen fire-plugs being open two and half hours, and thirteen steam and four hand-engines being in service. In the effort to extinguish the flames which destroyed the Craig Mills, a few weeks since, two and a quarter million gallons of water were consumed, twenty-eight plugs being open three and a half hours. Hence, it may readily be perceived that there are abundant means of con-suming the twenty-nine million gallons of water which are hereafter to be pumped into the Fair-mount reservoir daily.

which are horeafter to be pumped into the Fair-mount reservoir daily. The new and handsome tower, built in the Nor-man style of architecture, into which the three 30-inch mains first conduct the water, that it unay be discharged into the basin, is seventy feet high, and will be surmounted by an ornamental summer house provided with seals for public accommoda-tion. Being situated immed ately opposite the principal avenue common to the two parks, a most beautiful view of beth will be obtainable from its summit. The steep declivity immediately east of the tower is being sloped, at an angle of about 45 degrees, and will be sodded. The work of filling it in is one entailing censiderable personal risk to the laborers, as it overhangs a rocky cavern per-haps fifty feet deep, which alone remains to mark the site of a former quarry. The plot of ground fronting the main entrance to the tower is being graded, considerable filling in being also here re-quired. quired.

MATTERS AT THE NAVY YARD .- At the present time the force of workmen (employed at our navy yard reaches about 2,600 men. The work of building and

Interfaces AF The RAVY in ARD.—At the pro-sent time the force of workin femployed at our navy yard reaches about 2,600 men. The work of uniiding and repairing vessels is so much burried that a number of the employees work at night time, gas having recently been introduced into the different departments. Work is also carried on on Sundays and other holidays. Orders have been received to build another vessel of the same size and model as the Juniata, and the belief is that a second one will be ordered. The Juniata is fast approaching nam-pletion, and, if her machinery is ready at the time she is finished, the vessel will be launched within seventy days after the laying of the keel.
Yesterday morning the United States flag steamship Hariford arrived at the powder magazine and proceeded to unload her powder preparatory to coming up to the yard. The Hariford arrived opposite New Castle on Monday night, from the Cape of Good Hope. She sailed from Boston in June, 1853, and arrived at Hong Kong in October. While there, she went up the Yang-tan-kiang river about seven hundred miles, visiting Pekin and other etities. She left the Cape of Good Hope on tho 7th of September, and had a stormy passage from Ber-muda. The Hariford is about 2,000 tons, and her at man-ment consists of 16 9-inch Dahlgren guns. She has been constautly critising about the coast of China, and while there Captain Friedric Engle; captain, Chas, Lown des; lientenauts, Edward A. Barnet, Julian Myers, Richard L. Law, Alexander M. THE NECESSITY OF A HOUSE OF CORRECTION

THE NECESSITY OF A HOUSE OF CORRECTION. —The prison records show that during the coldest month of the winter sensor. February, the number of commit-ments is very perceptibly diminished, the vagrants pre-ferring the better fare, warmer sheltor, and more polatial appointments of the Almshouse. As soon as the weather begins to moderate they are content to return to the prose of prison-life for variety's aske. From April the number gradually increases until July. The necessity of still further accommodations for these shiftless-creatures once more suggests the advantages of a house of correction, and it is a matter of surprise to us that such an institu-tion was not established long ago. There were 1,072 pri-soners received in the untried department of the County Prison during November, and 978 discharged during the same period. By a comparison of the prison record for November with that of October, it will be seen that there or as a falling off of 184 during last month; and a falling off of 812 as compared with the corresponding month of

ff of 812 as compared with the corresponding month of

MILITARY FUNERAL OF A FATHER AND SON. —On the 26th nit. Mr. James Mills, an esteemed member of the First California Regiment, died at the Reguentat Hospital, in Maryland, in the 20th year of his age. un Sunday, the 1st inst., his father, Mr. John Mills, a mem-ber of Colonel Geary's regiment, also departed this life. Yesterday afternoon, at one o'cl.ck, the funeral of both father and son took place from their former residence, 1034 Parker street, above Washington avenue. It was largely attended by the relatives and friends by the In-dependence Lodge, No. 13, A. T. A., and by members of Col. Wistar's and Geary's regiments. The interment took place at Mount Moriah Cemetery. MARINE LOSSES FOR NOVEMBER. Up to Saturday evening, says the N Y Journal of Com-morce, there were 30 American vessels (exclusive of lake and river craft) reported during last month as totally lost or missing. The list comprises 4 steamers, 6 slips, 3 barks, 4 brigs, 12 schooners, and 1 sloop. Of these 15 were wrecked, 4 foundered, 2 burnt, 6 abandoned, 2 run down, and 1 is missing. The total loss, exclusive of cargoes, is estimated at about \$500,000. Partial losses are not included.

DIRI William Morgan, Francis Cooper, George L. Dougherty, James Martin, James Duross, Matthew McAleer, Bernard Bafferty, Thomas J. Hemphill, Thomas J. Hemphill, Thomas Fisher, Francis McManus, FBA Row IMPROVEMENTS.—Proposals will be received at the office of the City Commissioner until Monday next, for the removal of the Shariff's office to that tately occupied by the Recorder of Deeds, including such alterations as will be necessary; also, for the re-moval of the office of the Court of Quarter Sessions to that now used by the Sheriff. MUTTER'S COUGH SYRUP. Prepared only from the Original Prescription of the is PROFESSOR MUTTER. AT FREDERICK BROWN'S, AT FREDERICK BROWN'S, Northeast corner of FIF TII and CHIESTNUT Streets, Philadelphia. This Bernedy is a safe and simple preparation from the receipt of the late distinguished Professor Mutter, with whom it was a favorite prescription. That he used it in his extensive practice, insures to the timid a certain proof of its pure and innoxious elements, and to those who know his character for skill and careful attention, to prescribe only such remedial agents as should secure restoration without producing subscupent evil, it will be welcomed as a real good. Under the guidance of a Phy-sician (to whom its combination will unbestattingly be made known), it will alwars be found very beneficial.

sician (to whom its combination will unhesitatingly b made knowuk), it will always be found very hereficial and in cases where a medical adviser is not at hand, i may be used with safety, according to the directions, it all cases of short or long duration. For safe at FREDERICK BROWN'S, Drug ward Chomical Store

of \$112,796.52. And in the disloyal States, in 1860, \$820,546.51, and in

1561, 5677,706 70—showing a decrease in 1861, of \$142,-839.81.

Leaving amount alleged to be due and un-

nd examined during the year was about 2,650,000. The number of these letters containing money, which were registered and seat out during the year ending June 20, 1861, was 10,580.

June 20, 1861, was 10,580. The number of deal letters returned unopened to fo-reign countries during the field year was 111,147, which, added to the number of domestic letters (103,850) sont out as above, gives the whole number sent out from the Dead Letter office for the year, 215,033. The result of successful investigation in 7,560 cases confirms the past experience of the Department that the failure of a letter to reach its destination is, in the vast mojority of instancer, the fault alone of the writer or sender. Out of the above 7,560 valuable dead letters, 3,095 were dirested, 612 were directed to transient persons, 257 to parties who hed changed their residences, 521 were ad-dressed, of fictions persons or firms, 83 were nucailed for, 10 without any direction, 2,136 were not amiled for wast of postinglers to deliver, 133 no suifactory rea-son was assigned. The Department, therefore, can justly he held responsible for the and diversed, but of the son was assigned. The Department, therefore, can justly be held responsible for the non-delivery of but 212 of

be held responsible for the non-delivery of but 212 of these letters. Much other valuable data is given on this subject, and it is worthy of remark that out of 76,769 letters, before alluded to, originating in the loyal States, and addressed to residents of disloyal States, 40,000 could not be re-turned, either because the signature of the writer was incomplete, or because the letter contained no cluo to his residence. The experience of the Department shows that a large proportion of domestic letters, written by educated persons, and particularly by women, are defi-cient in one or both of these respects. In view of these and other facts, the Postmaster General suggests that valuable dead letters, when re-turned to their owners, should be charged with treble the ordinary rate of postage; comprising due fats for return transportation to the Dead Letter office, one rate for registration thore, and one rate for return transporta-tion to the writers or owners. A treaty with Mexico has been concluded, awaiting the ratification hy Mexico, establishing a common inter-mational rate of twenty-fire cents on letters, with other useful provisions.

useful provisions. The Postmaster General has accepted the offer make in 1857 by Great Britain for a reduction of the inter-national rate between the two countries from twenty-four to twelve cents, which, however, has not yet gone into operation, as it awaits the response of the British office. the above abstract presents merely a few of the points

of the imperiant report. The Postmaster General gives at length his reasons for the change of contracts for disloyaity. Not only was it nnsafe, he says, to initiat the transportation of the mails to a perion who refused or failed to recognize the sanctiry of an oath, but to continue payment of public money to the enemics of the Government and their allies was to give direct aid and comfort to treason in arms. We could not thus permit this branch of the Government to con-tribute to **its own** overthrow.

tribute to its own overthrow,

not thus permit this branch of the Government to con-tribute to its own overthrow. The Postmaster General also gives his reasons for ex-cluding disloyal publications from the mails. To await the results of slow judicial presention was to allow crime to be consummated, with the expectation of subsequent publications for the expectation of subsequent, by prompt and direct interforence. Of the cases pre-soluted for his action, upon the principles which he names, he has, by order, exclude from the mails twolves of these treasonable publications, of which several had been previously presented by the Grand Jury as incen-diary and hostile to constitutional anthority. While the Postmaster General did not claim the autho-rity to suppress any newspaper, however disloyal and treasonable its contents, the Department could not be called upon to give them cironlation. If could not, and would not, interfere with the freedom secured by law, but it could, and did, obstruct the dissemmination of that it could, and did, obstruct the dissemmination of that it could not upon any known principles of haw or public right, be used for its destruction. As well could the cremon carrier be required to transport a machine designed for the destruction of the vehicles con-veying it, or an intkeeper be compiled to contertain a traveler when whom he knew to be intrading to commit a robweying it, or an intercept be compelled to entertain a traveller whom he knew to be inteading to commit a rob-berry in his house." Ile finds these views supported by the high authority

of the late Chief Justi 'e Story, of the Supreme Court of the United States, where opinion he quotes.

A. S. Mackenzie, S. D. Greene, C. H. Swasey ; boatswain, join Burrows; gunner, A. F. Thompson; suilmaker, John A. Birdsall; carpenter, G. W. Babbitt.
 On the passage home the captain's clerk, Mr. Hali, a pattre of Baltimore, died. Two of the scamen fell overboard, about five days ago, and were lost.

"THE BATTLE OF THE BILLET"-A MONU

"THE BATTLE OF THE BILLET"-A MONU-WENT TO BE BLEDED.-To-morrow a monument will be raised in the suburban village of Hathoro, in commemo-ration of the famous "Battle of the Billet," which was here fought. According to the biographer of Major Andre, eighty Americans were killed in action, while Colorel Davis' history of the battle fixes the total num-ber of our killed and wounded at Histy-fixe. Our forces were commanded by General Lacey, who willingly of-fered his life on the altar of hiscountry. With a view to the commemoration of that event, the Excitature incorporated an association, known as the Hathoro Monument Association, for the purpose of erect-ing the monument. Subscriptions to the annul of \$300 were raised, and the monument at once ordered from a prominent firm of this city. It is of fine Italian marble, and twenty-six feel high. It bears suitable inscriptions and motioes artistically lettered, and will be enclosed with a neat and handsome iron railing. The village of Hathoro, we may add, is one of the most thriving and attractive on Old York road-thanks to the fertility of its soil, and advantageous location. It contains seventy private residences, and about tivo hundred in-habitants. There are also a number of prominent public cliffices-among others, a Methodist Episcopal and isap-tist church, an academy, a library containing 7,000 vo-lumes, three stores, and who heles. The far-famed Pen-nypack creek skirts the village, and upon its banks stand a number of flour mills, which forward a considerable portion of their produce to the city markets. The cremonics will commence at ton o'clock this morn-ing, and will consist of approprive addresses by well-known speakers of prominence, and the discourse of ex-cellent music. The programme will close with an oration by Rev. J. Bellville, at 2 o'clock P. M. An interesting occasion it will undoubtedly prove. rally was stronger at the close than at the market gene rally was stronger at the close than at the opening. In the monry market there is no alteration, and any change can hardly be expected until we have more deci ded political results from the operations of the war. The following is the coal tonnage of the Shamokin Yalley and Pottsville Ballroad Company: Week. Tons. Cwt. For week ending Nov. 33.....6,718 03 Same time last year......4,825 13-

EXCITEMENT IN WILMINGTON-UNLAWFUL SEIZTRE OF ARMS.-Some excitement has been occa-sioned in Wilmington by the seizure of a quantity of State arms, by a company of regulars. Messrs. Charles M. Allmond and James M. Watson being the bondsmen for the arms, have forwarded the following petition to the Legislature : The subscri

Legislature i The subscribers, citizens of Wilmington, respectfully represent, that on or about the twelfth day of February last, they gave bond to the State of Delaware, in ac-cordance with the provisions of its laws, for two breas six pound cannon, with certain equipments, and fifty short-range rifles and equipments. These cannon and rifles were used by Company B, Light Artillery, (of which Charles BI, Allmond was duly commissioned first lieuten-ant), in a commolious building style corner of Front and Tatnall streets, for the purpose of drilling said company, every member of which was a loyal citizen, and most of whom had taken the usual cath, as preacribed by the Mayor, "to sustain the Constitution of the United States, and the Constitution of the State of Delaware, and obey the orders of the Mayor." On the night of the 14th or morning of the 16th instant, a company of United States soldiers, who we understand represented thereselves to be a detachment from General Lockwood's brigade, en-tered the drill room of the Armory, and cook thereform the connon, iffles, squipments, ke., as well as a drum and fift, which drum and fife were the private property of the captain of the company. It is meet for us here to state, th at if Lieutenant Rigby, who we have since understood was in command of the detachment, had produced us an order from General Lockwood, for sait arms, we would have throw poolstacle in his way, but given them up, under protert—thereby relaxing up, so far, from our oblighton to the State. cribers, citizens of Wilmington, respectfully

PROPOSALS WILL BE RE-ceived at the office of the Deputy Quartermaster General, United States Army, No 1139 GIRABD Street, Philadelphia, until 20 clock M., on the Sth of December next, for furnishing one hundred four-wheel Ambulances, known as the Tripler pattern, to be entorsed "Propo-sals for furnishing one hundred four-wheel Ambulances, known as the Tripler pattern, to be entorsed "Propo-sals for furnishing one hundred four-wheel Ambulances, known as the Tripler pattern, to be entorsed "Propo-sals for furnishing one hundred four-wheel Ambulances, known as the Tripler pattern, to be entorsed "Propo-sals for furnishing one hundred four-wheel Ambulances, known as the Tripler pattern, to be entorsed "Propo-sals for furnishing one hundred four-wheel Ambulances, known as the Tripler pattern, to be entorsed "Propo-sals for function of the function of the state of the stills US 3%-inch toolts at each end. The sills are made at front end so 8to incline the furth-ward spreads. These as state to the state, the sill toop are grades are solid panetis of %-inch honrids, 30 inches filg (with mid-dle rail) from top of sill to top of rail on panels. There is a top rail shout 4% inches above; this rail is fastened to the stude. The body is 8 fort 9% inches in longth in the clear, froid outsile of tull piece to box in front, and a feet wide in the clear, front, or head-board, 15 inches high, feet high in centre from floor to ridge pue, end top made oval, 6 hows 2x% inches, fastened to nails and stads with screws outside. In second lower puel or 2 feet from front, on each side, these is a vickut floor 8% inches wide and 14% inches four. This toor is made of the lid of box with cushion; the hox is 18 inches wide, 11% inches in the clear, with partition in the middle; the lazy back is fastened to the lid of box, plain hand lock on side, to which is a attached an iron rod or lever alongiside of body; to the lever is a strap by which the driver locks the wagon. DOARD OF EXAMINERS, — THE BOARD TOF LINE examination of applicants for admission to the bar, for December and March terms, was resterday appointed by the courts, and consists of the following gentlemen of the bar: Fli K. Price, chairman; J. Altamont Phillips, John McIntyre, Edwin T. Chase, David Paul Brown, Jr., Henry J. King, Nathan R. Sharpless, John A. Clark, and Piorce Archer, Jr., secretary. NEW SCHOOL HOUSE IN WORM CHARLES. Inc new public school building, which is in course of erection at West Chester, is now under roof, and presents an imposing aspect. It has two stories, each fourteen fret high, and its ground dimensions are eighty-two feet by seventy. The drawings were furnished by Richard A. Gilpin, Esq. The building is to accommodate four hundred children.

PICKPOCKETS ON THE QUI VIVE.—During the rush at the Academy of Music Monday evening, the pick-pockcts were on hund, but they were checkmated by the presence of an efficient force of detectives. The latter succeeded in "running off" about fourteen of the ras-culs. The new detective organization works smoothly.

ST. PAUL'S CHURCH .- Before the ashes of St. Paul's Church had ceased to smoke, the work of re-constructing the sacred edifice was commenced. The re-moval of the ruins will necessarily consume much time, but no unnecessary delay will be brooked. The amount collected on Sunday last in aid of the building fund reached \$4.500.

to the lever is a strap by which the driver locks the wagon. A middle bar 34×24 inches is bolted on sills, for the hindside spring, 2 braces on tail end of body reaching from tail-piece to top rail. Framework of body to be of best white oak timber thoroughly seasoned, the bows to be of white set, j panels to be of poplar thoroughly seasoned. Curtains to be strapped, straps to be sewed on with harness thread well waxed Springs to be best quality spring steel. Back spring 4 feet 2 inches long from centre to centre; is de springs back 3 feet 10 inches centre to centre; the cross springs are 2% inches wide, 7 plates; the side springs 23% inches wide by 6 plates; side springs fort 3 feet 10 inches long cen-tre to centre. Axles of iron, to be case-hardened, 1% source, turned Axles of iron, to be case-hardened, 1% square, turned edgewise, with nuts on ends. Boxos 8% long, 1% x1%

Commissioner of City Property is having the parade ground in the First ward enclosed with a paling fence. Woodon trunks have been laid to partially drain the ground, and a large number of loads of dirt placed in the low portions of the ground. TELEGRAPH OFFICE REMOVED .- The Sus-

engewise, with nuts on class 2 without the spokes inches. Hubs of gum or locust thoroughly seasoned; the spokes and felloes to be of white oak thoroughly seasoned. Hind wheels 4 feet 8 inches high, without the tire, hubs 7 ½ xlu inches, spokes 1 ½ x2 inches at the shoulders, thre 2 inches wide and ½ inch thick, felloes 2½, inches deep.

deep. Front wheels 3 feet 8 inches high without the tire; hubs 7 x10 inches, spokes 2x1 ½ inches at the shoulder, fellces 2½ inches deep. Hounds and helf hounds, to he of white oak, of best quality, and without defects. Half hounds, 2 feet long; 5th wheel, 2 feet diameter, 1½ inches 1% 3 cross bars on 5th wheel, 2 inches square; cross bar on front hounds, 4 feet 8 inches long, the steps on each aide are fastened to this cross bar. PAINFUL ACCIDENT .--- On Monday afternoon A MARCH AUGULANT. - UN MORGAY affermoon a man named Arthur Daley, agod sixty yédfa, résilding in Jancock street, above Oxford, was run over, at Second and Oxford streets, by a member of Colonel Rush's ca-valry, and severely injured. He was conveyed to his residence. NEW BUILDINGS.—During the past month there were 116 permits taken out for the erection of buildings. The number of permits in November of the previous year was 135.

bit wheel, 2 inches square; cross bar on ront nonnes, 4 feet 8 inches long, the steps on each side are fastened to this cross bar.
Double trees, 4 feet long, ironed, same as those of om-mibuses, as is also the whole running gear, the double trees, and lead tree to be of white hickory, without defects and thoraughly seasond.
Tongue, 10 feet 6 inches long, 4 luch 22 inches square at back end; at front end it tapers to 12 inches square at back with eye in hi goed bar and tapers to 13 inches round; a hook with eye in hi goed bar and the length as doubletees, made light; tongue to be of white oak, of the best quality and free from defects.
EITTER OF AMBULANCE,
6 feet 74 inches long, 1 foot 10 inches wide; panels, 44 inches wide, 12 in ches to har; the cover of litter is fastened to panels of litter by a leather binding, and tacked all around; in each frame of litter there are to be sixteen mattrass springs; cross strips to be made of best quality oak. The expected receipt of the President's message in the tions in a measure at the first meeting of the Stock Board to-day, and for some securities the prices were ra-ther lower. The purchases of bears, who were short,

and the tone of the message, gave a slight impetus to stocks in New York, which had the effect of stiffening quality oak. The frame work for upper litters is composed of three
