THE ALLEGIANCE RESOLUTION BEFORE THE M. E. CONFERENCE __SIX TH DAY .-- Great interest was manifested vesterday in the proceedings of the M. E. Annual Conference. The day has been fixed upon tor the consideration of the war question, and a majority report, a minority report, and a series of independent resolutions, had been submitted to the Conference. It was thought that a factions opposition would be made to the passage of pledges of allegiance, and the Methodisc hy men were cager to hear the names and arguments of those who wavered in their loyalty or were lukewarm in

their support of the war. The church was literally jammed. A tolerable congre-gation waited in the yards and aisles, and the doors were closed and bouted at an early hour. The religions services were conducted by Rev. E. J.

closed and boiled at an early hour.
 The religions services wore conducted by Rev. E. J.
 Way.
 The minutes of last session were read by the secretary, and approved by the Conference.
 The Reading district was then taken up, and the characters of those bot considered on Monday wore examinee. When the name of Rev. J. McCarter was called, a communication was read from him, stating the circumstances which led him to take command of the Ninety-thira Pennsylvania Regiment. He described the scenes around him, and asked that uo ministerial appointment be given him this year.
 As it was impracticable to grant his request, after some discussion, and a speech by the Riv. Dr. Hodgson; it was decided to "locate" him.
 Dr Catlon, Dr. Porter, and Hon. Mr. Willey, of the United States Senate, were introduced by the Bishop of the Conference.
 The report of the Committee on the Bible Cause was then read. It set forth the necessity of the distibution of the Bible; and stated that the Conference describes.
 Rev. Joseph Hoklien, the corresponding secretary of the American Bobbe Society, then andresset the Conforming the subject. He arged the necessity of the minimaterican Bobb Society, then addresset the Conforming the more of proseculing the work, and edso gave an account of the workings of the States of behavers and Marylaud. He effected some valuable suggestions as to the the treatment be become very oppressive, and so great was the pressure around the reporters' table that it materials interfered with their operations.

All AlcComb, one of the Combinities on Keedolutiona, said he do not endorse the fifth resolution of the ma-juity report. Bey, Pennel Combe withdrew his resolution relating to uitra At olitionism. He theught that the only way to show sympathy with the Government was to shop its policy. There are two kinds of loyaity—ene who con-tend that the Union on to be preserved, but that the Constitution should yield to circumstances. He was surprised that the majority report conceded that a State has secceded from the Union. A document like this should bave no supposition about it. Such mistakes were not to be remedied by any excase. The President any stata no State has or can arcede, and on this policy this question depends. We say that the people formed, and they only can destroy, the Go-vernment. The satety and influence of many members depends on the resolution which you adopt this morning. Some are where it costs somathing to olyal. No reaso-lution could be too strong for him, but if a paper which en be micromstrued, you place these brethren in an awk-ward position. He donier these brethren in an awk-ward position. He bay apper over at least six times, in order to place the Conference in a proper position. He wished to protex those men who had stood up through for and sword itor truth and liverty. I be bolieved that every member would vot for his second resonation. The key Dr. Durbin raised a question of order as to the order of taking up the papers, which was not sus-tande. Bey. Mr. Karsner thought that the report of the com-

Bev. Mr. Karsner thought that the report of the com-mittee might be altered at their pleasure. Rev. Mr. Commingham said that he wished to give reasons why the substitute should be discarded. First, because it would be a discontresy to the committee. The echo had not died away from the reading of the reports of the committee, when the suthor of the substitute sprang to his feel the li he was wiret than seven med. Secondly. It was not what the Conference wanted. It is a nondescript animal with two ears, ten talls, and a political platform in its stomach. Why not let Congress go home, add let this bolomon decide this question? He hoped it would not be repeated. The rules of order must be preserved. Mr. Cunningham continued: He thought that no words could suffice to brand this rebellion. Here pas-sion is reason, and summenses is treason. Bhall our country live? is the only question. How THE DIRECT TAX WILL AFFECT OUR MANUFACTURERS.—A special committee of the Philadelphis Board of Trade have had under considera-tion a bill reported by Mr. Soveas in the Huussof Repre-sentatives—"a bill to provide internal revenue to sup-port the Government and pay intorest on the public debt." The committee refer particularly to the dis-criminating character of the tax bill. It is expected to produce \$102,000.000 annually by direct taxation. Of this sum, independently of the prope of income tax, there is charged upon manufacturing industry \$75,000,000. Besides this manufacturers are to pay license fees, and their queta of income tax, whils the moreantile dissu-sease altogether, excepting on their income and profits, and a trilling license fee. And the agricultural interest, which is three times as large as that of manutactures, is also almost wholly untaxed, except on the single article of obacco. The whole value of manufactures in the United States now sums up at about nineteen hundred millions of dolars. mbl-skweit* PETER STREEPER, near the premises. FOR SALE, OR EXCHANGE IN PART FOR CITY PROPERTY—A large COUNTRY MANSION, beautifully situate 1, command-ing the ajacent country, together with a Cottage, Gar-dener's House, Farm House, Stables, Barn, Ice and Spring Houses, and nearly fifty five acros of land, near Abington Station, on the North Ponnsylvania Bailroad, about in e miles from the city. The whole value of manufactures in the OBEC States new sums up at about nimeteen hundred millions of chilars. It appears that in large manufacturing establishments the fixed and ficating capital invested is often greater than the value of the whole annual production. But, estimating the profits at ten por cent, the whole income of the manufacturers of the United States will be one hundred and ninctry millions, of which will be demanded seventy five millions; to this add three per cent, for in-come tax, and we have sevarity-eight million five hun-dred thousand doilars (out of one hundred and ninety million dollars,) probaded to be obtained from the manu-facturers alone. The tax on crude petroleum oil is estimated to produce \$2,500,000. But the production of the oil wells is 75,000 barrels a week, or annually 3,900,000 barrels. The tax on crude oil at \$2 per barrel would produce \$7,800 000. The taxes on incomes and galaries are estimated at \$3,000,000. Of this, the manufacturers are to pay \$3,-100,000, leaving \$4,500,000, for contribution by all other classes of the community, on incomes derived from fixed investments, from mercantile, professional, and agricul-tured profits, salarits and the like. This committee canuob believe the country is so poor. We have no doubt the fixed can \$15,000,000 than \$3,-000,000.

Our loyalty. Rev J. W. McCaskey next took the floor. He presumed that the action of the Conference would determine the position of the Conference before the world. An ex-pression of some kind must emanage from this body. The minority report could meet with no favor. The question is simply between the adoption of the majority or the

sub-titute. He was in favor of the majority report. It is the best basis we can take for our action. The committee re-porting was made up of men of all sections. Some of them were born in infected territory. In the charac-ter of the committee there is a gnaranty of the wisdom

of their report. The general spirit of the substitute is objectionable, because it most fully introduces party politics There is a certain party which could make the substi-tute its platform. The object of this movement is to de-clare our loyalty to the world, for its notorious that sus-plation does exist in reference to members of this body. It is no wonder, when it is known that we have many arowed Secessionists in the renks of our commu-wion. The substitute does not probe deep enough.

ation. The substitute does not probe deep cound. It undertakes to decide great questions which have agitated the nation for years. Are we prepared to de-cide those questions ? The majority report is plain, pointed, and disclaims all arty connections. The substitute leans to a party, and dis is locally adverted.

The newority report is plain, pointed, and disclaims all party connections. The substitute leans to a party, and this is logically clear. It contains no resolution, except the fifth, perhaps, which no man who is not a traitor at heart can vote for. He was in doubt of the propriety of taxing the oath, but for what he had heard and scen since he had come to Conference, all doubt was now gone. The oath should be taken by all. : Ber. W. Cooper said that he thought that it was time to decide which paper is to be taken up. There is a speaking fever here, and I may get it myself, but I move to lay the motion to take up the substitute on the table. Prevailed. The majority report was then taken up item by item. Nev. Mir. Carrow felt constrained to depart from his old rule of silence. He stroketized the party of Weddell Phillips as a fod-def jing organization. Abolitionism was not his test of loy sity. Do said that P dward Buffin might have damed the Constitution in Charleston, as his twin product, Weddell Phillips, has done in Boston, and have been no traitor; but when he trained the gent against Fort Sumpter, he increase relation to a should be the tot be solvern-ment in the prosecution of the war. Committee on Rairoads of Councils have had hofore them the retitionsfor, and the remonstrance Against, the removal of the rairoad on Broad-street, hetween Market and South streets. Messrs H. M. Watts, James Dundas, and Caleb Jones, Eayrs, addressed the committee in be-half of the removal, urging that the road retarden im-provements to that section of the city, and its con-

This is to be a productive industry of manufacturers, how is the tax to be productive industry of manufacturers, how is the tax to be productive industry of manufacturers are persons of moderate means, who get their to mail by labor, and who desire to lay by something for oil age. Congress cannot fairly act on the supposition that they are taxing great capitalists only. They are dealing weth large interests, divided into many parts; and if they lavy upon the manufacturers nearly one-half of their incomes, they may cripple an interest essential to the independence of the country. It has been suggested to the committee, that, instead of this heat't Havation non productions.

of the country. It has been suggested to the committee, that, instead of this beary taxation upon productions, a moderate tax of one per cent, upon all articles sold by producers, and of one-half per cent, upon sales made by dealers of every description, might be effective and aufficient. This plan is worthy of favorable consideration. The proposed taxation upon natural oil is worthy of roto. The crude petroleum, or rock oil, is taxed at five cents, and refined oils ten cents a gallon. It is believed the duty should be placed, not upon the crude, but upon the *refined* oil alone, and that a drawback should be allowed upon its exportation. With such a drawback, it is thought, there could be sent from Philadolphia atom, to forgland, 150,000 barrels of related oil por an-tum. It is to be remembered that we have not a mo-ropoly of this spontaneous gift of nature. The wells at Evniskillen, in Canada, (forty miles east of Detroit, and fourteen from Lake Erie) are now said to be producing upwaids of 20,000 barrels in a week, and they have great expectations of increase.

PETROLEUM OIL.—Since January 1, 1862, there has been exported from Philadelphia to Eag-land 501,070 galloss of pitrolum oil, worth \$120,820, and to the West I dies, 418 gallons, worth \$170—making a total of 595,388 gallons, at \$139,999. The progress of shipments to foreign ports is watched with much earnest-ness; recent advices, however, do not seem to guaranty remuncrative riturns, and are sufficient to keep in exer-cles the cardionary policy of buysers. Through the past week a very fair amount of business has been daily transacted. A large amount of oil, about 25,000 barrels, has been shipped during last week, and most of this oil will go direct to Europe to fill provide contracts. The protuin rosition of the trade connected with the pro-pased tax bill, cannot full to avoit the nost lively a navi. based tax bill, cannot fail to excite the most livel ety, unsettling the market, and prices hardly supported.

PAYMENT OF WATER RENTS .- The **FAYMENT OF WATER KENTS.**—The ordinance passed by Councils, extending the time for the payment of water rents to the first of May, has been suproved by the Mayor, and water tenants have now an additional month to foot their bills, and avoid a mulet of five per cent, upon their amount. This extension of time is only a master of justice, as it would be utterly impossible, with the facilities of the Register's office, for all who desire to settle their accounts before the first of Awril to de so.
