FOREIGN NEWS. ENGLAND. ENGLAND.

It is said that the Confederates are building or at teast atting out in Explich ports a number of thins to be exployed in the American war, and as a proof, it is alread that the captain and officers of the privateer Sumpter have strived at Southampton from Gibraham. We hope there is no truth in the first part of this statement. It is the outy of our Government to preserve for the future, as they have done bitherto, the same neutral attitude which they have taken from the commencement. They would not, we know, violate the neutrality whitingattinde which they have taken from the commencement. They would not, we know, violate the neutrality wittingly, but they may be remise or negligent, which, under the circum stances, would be nearly as had as complicity. In this matter, the American Minister in London, Mr. Adams, has a still greater interest than ourselves, and his vigiliance ought to be taxed to the utmost to prevent such a result as the one to which we have referred.—European Times. American agents are making inquiries in England for AMERICAN agents are making inquiries in England for iron plates for marine battery purposes.

EXPEMIMENTS AT SHORDENFERS.—Since the last experiments that with the new wrought-iron smooth-bore Armstrong guin, other trials have been made with the same piece of ordenace to prove its power. During the course of these it has been tried with a 50-pound charge of powder against a target of three five-inch plates of wrought-iron bolted together—a mass of wrought-iron, ju all, of fifteen inches thick—on. Is mearly as possible, four times the thickness of the Warrior's plates. Two or three shots were fired against this, and each broke all three plates, crushing the first, ripping and splitting the second, and ripping the third in such a way as to show that even fifteen inches of metal was an insufficient protection against ordnance of this description at close ranges.

CAPTAIN SEMMES, LATE OF THE SUMPTER .- Among the passengers by the Mooltan, which arrived at Southamp-ton on the 17th April with the Australian mail, was Capton on the 16th April with the Australian mail, was Vaptain Simmes, the commander of the Confederate man-of-war Sumpler, whose disting achievements in the Carlobean Ses have attracted such attention. After capturing and destroying almost a fleet of merchant shipping among the West India I-lanes and in the South Atlantic, the Sumpler scenared to Europe, and there inmediately commenced destroying Federal shipping in the British Channel and in the Bay of Bicary. Captain Symmes is a small, thin, but wiry man, with a weather-beaten countenance, of a most determined-looking character. Although not by any means an old man, his moustance and beard are quite white. He was very snaious to know whether the Confederate army had fought any great battle after retiring from Manassas, and what progress the Federals made at the month of the Mississippi. Amongat his oaggege was an inmense trunks titled, it was rumored, with beety selected from captured ships. Captain Semmes is related to Mr. Jeferson Davis, the Confederate President. The other officers of the Sumpler were also on board the Mooltan. They appear very young The Sumpler, it is said, has been sold at Gibraltar. One of the officers, however, to whem this statement was mentioned, denies its truth as to the saie of the ship; but, coyond this contradiction, and the restement that the Sampler remains at Gibraltar in charge of one or two officers, nothing could be elicited from them, they benn, of course, very uncommissioners as to the future movements either of the Inserting of the Sampler. themselves of their ship.

THE LATE SIR RUBERT PREE.—In a leading article of the Times, it was stated that the Liberal party forced upon the Duke of Wellington and Sir Robert Peel that concession to the cause of Catholic emancipation which Sir Robert Peel declares he entirely disapproved to the lates day of his life. The present Sir Robert Peel writes; 'el do not know upon what authority that statement is made, but, so far from disapproving the measure, fir Robert Peel has distinctly stated that, in passing Uatholic emancipation, he acted on a deep conviction that the measure was not only conducive to the general welfere, but imperatively necessary to avert from the force, but imperatively necessary to every from the Church, and from the interest of institutions connected with the Church, an imminent and increasing danger. The London Spectator repeats the rumor, to which it gave currency a week ago, that the Irish priesthood has received orders from the Vatican to postpone every consideration to the outling of the present Government, sed, of course, to the restoration to office of Lord Dorby and his friends, who are supposed to lean to Austria rather than France. THE Albert Memorial Fund amounts to £44 750.

The Yelverton Case.—The celebrated Yelverton case is likely to eccupy the Dublin Court of Common Pleas this term, probably after the Easter Holidays. Mis. Yelverton's legal advisers have filed notice of a motion to amend the bill of exceptions taken after the trial. If leave be granted, the effect will be to somewhat simplify the case, by expunging from the bill all the exceptions relating to the Soutch marriage, leaving the validity of the cer-mony performed by Father Momey, at Restrevor, the only subject for consideration.

At a meeting of the Royal Dublin Society, on the 14th ult. a paper was resed on the quality of the milk sold in Dublin. There were twenty samples purchased in the poorer districts of the city and sounchs and an allyzed. The results were satisfactory. Water was the only adulteration found by the analysts. There was no chalk, no culves, or sheep's brains—"the quality was, generally specking, extremely fair." In three districts the samples examined were found to be absolutely pure, and two of these districts were among the poorest in the city. A COMMITTEE of privileges of the House of Lords has

ALTERATIONS IN THE LOUVEE.—In the ancient galleries of the Louve several additions and changes have Alterations in the Louver.—In the ancient gatterries of the Louver several additions and changes have been recently made. The circular sofa which was in the middle of the large quare room has been replaced by the horizontal painting of Hanne-sebald Beham, a Nuremberg artist of the sixtenth cquiury. That painting is divided into four parte, and represents as many opisades in the life of David; it is surrounded by a railing, with a ledge to lean on, and allows the examination of its complicated details. Many persons consider the seat on which the visitor could repose while admiring "The Marriage of Cana," was preferable. In the gallery of Apollo has teen placed the bronze group of "The Titans Struck by Lighting," which was formerly in the Solon de Saturne. It is placed on a round table, style of Louis XIV, on the top of which is a beautiful slab of porphyry, in he courte has be en a ided the "Bape of Dejanira," in bronze, and two magnificent pieces of goldsmitur work In the centre has been added the "Bape of Dejanita," in brozze, and two megniticent pieces of goldsmither work ornamented with miniatures and pearls. Lastly, at the bottom of the gallery, glass cases have been arranged on each ride of the window looking on the quay. They contain very curious specimens of goldsmiths' works of the middle ages. In that on the right is the chasse of 2t. Potentian, bishop of Sens, and in one on the left there are coffers, abatial and episcopal crosses, enamels of the sixteenth and seventeenth centuries, zc. We may incidentally mention that the word "credence" derived from the Genman credents (subcloard), and which is well applied to at tique dremers, seems bardly adapted to the glass cases in which these curiosities are exhibited, and which onlines be called credences in the catalogues.

The Oddor, Paris, had accepted a comedy by M. Artiche Housaige, Le Roi Soleil. It is described as bying a powerful satire on Louis XIV, his peculiarities, and his contiers. The dramatic censorship has prohibited its performance, on the ground of its being filled with political allusions. It is considered probable that the author will appeal to the Emperor.

A VIENNA LETTER SAYS "The fever of speculation runs so high here that it has even attacked the fair sex. For some time plast, groups of females have assembled every day in the neighborhood of the Bourse, whits others, more timid, remained in the houses near, where they received the visits of their brokers, who came to report the fluctuations in the market, and receive orders for sale or furchases."

THE COFFESPONDENCE FORM S. Petersburg, in the Nord contains some in-portant intelligence. The Grand Duko Constantine has been appointed temporary President of the Council of the Empire during the absence of Guiut Bloudor, and the commencement of his labors has been the signal for a great increase in the activity of the council, which is the laboratory of the recent great reforms. There is even a question of reconstituting this supreme body, which would be converted into a legislative assembly, the members of which would be natir normated by the sovereign and haif elected by the publes. Simultaneously with this charge the Senate would lose some of its judicial attributes, and would be reconstituted rather more on the model of the French Council of State. It is also expected that the laws relating to the press will be promulgated on the thousandth suniversary of the Russian engire. The committee ongaged on them is still sitting. The abolition of the preventive censure appears deceled in principle.

GREECE.

A LETTER from Atheos announces an important discovery for the history of art, which has just been made by Mr. Starck, an English architect, and member of the archaeological commission sent to Greece. Researches which Mr Starck has caused to be made at his own expense, have brought to light the ancient theatre at Bacches, upon the southern slope of the Acropolis. Notwithstanding the political perturbation at Athens, this discovery has caused a general sensation.

From every Italian province, also, at the joint expense of the town corporation and of the State, a certain number of intelligent citizens and manufacturers will visit the London Exhibition, and so prolong their stay as to have leisure to view the manufactories of Manchester, Sheffield, Birmingham, &c. The State abone contributes a first sum of 100,000 feanes for that purpose. It is confidently expected here that the Prince of Center and will honor with his presence the opening of the London Exhibition, and it is also hoped that the Palace at South Kensington will be visited, probably later in the eason, by the Prince of Petimont, Humbert, beir to the throne of Italy, attended by the Marquis Pepoli, the Minister for Agriculture and Commerce."

A DIPLOMATIC MISSION to Persia is expected to set out from Turin in a short time. It is to be accompanied by a scientific deputation, including military gentlemen and a photographer. It is thought likely that this diplomatic transaction—a mere formal pageantry—will entail an out-lay, not of 200,060f., but of more than 800,000f.

The accident, resulting in the death of Mr. Robinson,
occurred in the evening, and was accessioned by the
roping in of a number of coal care from the time of the
railroad to the coal yard. The decrased was passing at
the time, and such was the velocity with which the cars
were driven in, that he was caught and dragged under
the wheels of the cars, and received such severe injuries
that death ensued.

Witnesses tescified that the mules were attached to the cars, and they were driven into the yard at great speed. McMurtrie for plaintiff; M. P. Henry for de-defendant. THE SUGAR MARKET.—The capture THE SUGAR MARKET.—Ine Capture

The ordinary course of business having been finished, the editor, D. W. Hunt, read the magazine in which the editor, D. W. Hunt, read the magazine in which Lumerous elequent and humorous articles were contibuted by the members; after which, the subject was debated, "which is the most pleasing to the eye, the works of nature or art?"

The programme is alternately changed from week to wtek; constaining one werk of essays, declamation, voluntary exercises, etc.; the other, questiors previously given to be snewered, reading of magazines, and debate. Next fall, the institute purposes giving a course of public literary entertainments, and the prospects of success siar are very flattering.

The members are all active, intelligent young men, from sixteen to thirty five years, of respectable standing; none but highly moral and respectable persons will be elected. The society would be pleased to receive additional members. Application for propossis or particulars can be made of Dr. Landis, president, at 218 North Ninth street, any morning during the week. BURNING OF RAILROAD PROPERTY.

At half past eleven c'clock, on Tuesday morning, the one-story frame tool boliss and the two-story frame from freight watchouse, at Perrymansville station of the Baltimore, Wilmington, and Philadelphia Railroad, were destroyed by fire. There was no freight of consequence in the warehouse. In the tool house, several laborers' ears and a quantity of tools such by the track repairers were either destroyed or damaged. The loss altogether is estimated at \$400, which is covered by policies of insurance. It is thought the fire was caused by sparks falling upon the roof of the warehouse from a freight engine. The express train from Philadelphia was delayed one hour at Perrymansville in consequence of the fire, the fiames bursting across the track in such fury that it was dangerous for the passenger cars to pass by.

The daily man timber has finally found its way to this city, although the sales thus far have not been heavy. The distributional hardwood business is quite active this season. Bucks county comes in for quite a large share of it. A large amount has been shipped fr. m Point Pleasant and Lumberton, to New York, for transhippent to the Pacific saart. There is no valuable hardwood in California, and it must receive its upplies from the East. The increased demand is caused by the light stock on hand there, and demand is caused by the light stock on hand there, and the recent heavy freshets. White oak plank, he worth \$35 per thousand feet, is there retailed at \$150. This price would sound enormous were it not known that the freight thence is \$25 per thousand and that a large per centage becomes damaged on account of the length of the voyage and the heat of the climate through which it the voyage and the heat of the climate through which it passes.

An important case respecting the rights of lumbermen to recover the value of timber seized by other parties during freshets, has recently been decided. The action for damages was bought against an individual for converting to his own use 104 logs, sleeged to contain 25,000 feet, valued at \$200, belonging to plaintiffs, citizabs of in adjacent county. The jury found from the evicence that the sawlogs found at the mill by the defendant, by the agent of the plaintiffs, belonged at that time to the plaintiffs, and that they were part of the logs that came down the Susquehaumah river in the freshet of May, 1860, and that said logs had gone ashers on the land owned by defendant, and had been purchased there by the agent of the defendant from certain perses claiming to own the same, and that said logs were carried by the vessel of the defendant to his mill, for the surpose of being sawed up into plants, and the defendant when called upon by the agent of plaintiffs claimed to own the said logs.

The jury rendered a verdict for plaintiffs; damages \$27183.

\$271.83. It appears that by the freshet of May, 1860, there were lost from the boom in the Susquehanus river, logs of the value of about \$10,000, the property of different parties, and that many other suits are penning in the courts against different parties to recover the value of said logs converted by them to their own use. WAINUT STREET, PHILADELPHIA.

BEAD THE FOLLOWING CABEFULLY.

The difference between fact and fiction, of permanently curing the sick and suffering of their diseases, or advertising to cure and showing but little or no evidence of cures, can be well appreciated by the anxious inquirers after health, by attentively reading the following synopsis of certificates from the most reliable gentlemen in Philadelphia, who were permanently cured by Prof. BOLLES, 1220 WALNUT street, and after they had been given up as incurable by the most eminent medical men of this city:

Judah Levy, Bronchial Consumption, 614 South Front street. street.
Edward T. Evans, preacher of the M. E. Church, Dyspepsia of long standing, Laryngitis and Lumbago, 1633
Helmuth street, Alexander Adwire, Inflammatory Bhoumatism, Lumbago, long standing, 1312 Savery street, Eighteenth ward,
Kengington. James Nugent, Deafness for six years, and ringing and roaring in the head, Fitteenth and Bedford streets. George G. Presborry, Chronic Bronchitis and Ostarrh, formerly proprietor of the Girard House.

Thomas Harrop, severe Diabetis, Rose Mills, West Philadelphia.
George Grant, Rheumatic Gout, long standing, 333 Bheumatism, 1736 Cheetnat street, C. H. Carmich, Ohronic Dyspepsia and Inflammation of the Kidneys, Chestnut and Fortieth streets.

Hugh Harrold, Bronchitis and Disease of the Kidneys, 49 Fouth Third street.
B. P. M. Tasker, Chronic Dyspepsia, and Kidney Disease, 1022 South Fifth street.
James P. Greves, M. D., long standing and severe Lumbago, 216 Pine street.
Edward McMahon, Consumption, 1227 Front street.
Stanford Stillwell, Congestion of the Brain and Chronic Dyspepsia, 1826 Palmer street.
Charles D. Cushuey, Paralysis of the lower limbs (Paraplegy) and Dyspepsia, Western Hotel.
J. Ricket, Chronic Broughtitis, Constipation and Congestion of the Brain, 518 Callowhill street.
Osleb Lamb, Bronchial Consumption of five years standing, 1430 Chestmut street.
Bev. J. Mallory, Aphonia, Philadelphia.
M. M. Lanning, Nervous Prostration, Cadbury Avenue. H, BOLLEs has cured two thousand Chronic and Acuse cases within less than three years in Philadelphia, all of which cases had resisted the treatment of the most eminent medical men.

Please take notice that Prof. B. does not advertise any certificates of cures, except those cured in this city.

Prof B. has established himself for life in this city, and his success in treating the sick is a sufficient guaran tee that he claims nothing but scientific facts in his dis covery in the use of Electricity as a reliable therapout

overy in the use of Electricity as a reliable tiperspentic.

N. B.—It will be well for the diseased to recollect that Prof. B. has given a word of caution in his pamphlet to guard them against trusting their health in the hands of those in this city claiming to treat diseases according to his discovery. This caution may seem sowers on those using Electricity at hazard, but it is the severity of truth and designed for the good of humanity.

PURE COD-LIVER OIL. The repugnance of most patients to COD-LIVER OIL. and the inability of many to take it at all, has induced various forms of disguise for its administration that are familiar to the Medical Profession. Some of them answer in special cases, but more eften the vehicle neutralizes the usual effect of the Oil, proving quite as unpalatable and of loss theraponite value. The repugnance, names, &o., to invalids, induced by disguist of the Oil, is entirely obviated by the use of our CATSULES. OOD.LIVER OIL CAPSULES have been much used lately in Europe, the asperience there of the good results from their use in both hospital and private practice, saids from the unturally suggested advantages, are sufficient to warrant our claiming the virtues we do for them, reeling assured their use will result in beasaft and deserved favor.
