The second was to be for the Ladies' Gift, consisting of an elegant watch, richly studded with diamonds, and a superb chain. For this only ordinary saddle-horses were allowed to contend, and then, not without their owners first perged their intentions of giving it to a lady. This *la*-dies' gift entorphase was in excellent tasks, as by it Mr. Cassed enlisted the attention of *that* important branch of the human family. To secure this, is to secure addi-tional vigor to the enterprise, for there is really segme-thing marvellous in the energy of women. They live by the heart, and they cortainly carry their barsts with them into everything they do. Whatever the object of a woman's passion may be, whether, theology or the toils, or merely some poor writch of a male creature, glorified by her idolarrous fany into a bere of romance, the wor-ship abe gives to it knows neither bounds nor obstacles. So, in this case, the idea of ministering to them sepa-rately, please them, and we have no doubt that many a gallant was horrified by his lady making a request that be should enter his favorite hack in the race, and he bimself contend in the lits, and take his chance of bearing away the gift to lay at his idol's feet. Alas I that the spirits of I vanhoes should look down upon such a deger orate race; the bold spirit of the belted knight melted into the less demonstrative ac-tivity of him of the carpet. INCREASE OF ARMY ENLISTMENTS.— The recent order issued by Secretary Stanton, announc-ing that hereafter a premium of two dollars would be general increase of army enlistments. Any person who now obtains a recruit is entilled to that sum when he is accepted, under this order. It has proved an incentive to the recruiting efficer, as well as others who wish to labor for the premium by prevailing upon men to enlist. The most important feature of this order of the Secretary of War, however, is the announcement that overy person who enlists, either in the regular army or the volunteer force, for three years or during the war, will receive, im-mediately upon the metsering of his company fits eser-vice, the first month's pay in advance. Heretofore many men hare been deterred from enlisting by the fear of leaving their families without any support until they had aerved long enough to receive pay from the Government. The payment of the first month in advance is a dicided improvement, and calculated to encourage men to en-list. THE SHERIFF CONTESTED-ELECTION THE CHERIFF CONTESTED-DISECTION GASE.—Yesterday morning in the contested-election case of Thompson vs. Ewing, the court delivered an oral opinion on the motion to strike out certain specifications. In reference to the specifications chasging intruders in certain precincts, the court held that, if the evidence enabled the judges to determine that these officers who nettd were de facto efficient and acted under some color of title, such as the appointment by persons supposing themselves to have the authority, the court would refuse to go on with the specifications. If these officers were taken from the streets and walked into the poll without out evident for the streets and walked into the poll without any anthority, borond that of bistanders, the court would not regard the p. It as legal. As the specifications now stand, the court considered it proper to ascertain whether the votes were received by persons who had no color of title. They would not strike the specification whether the volue with the tructure by provide that and an order of the other would not strike the specification out until the evidence determined their title to act. With a sheet of the specification, which referred to the absence or title appendix the indicit the true the tion, and it would therefore be stricken out. The remaining specifications, if proven, might have an effect upon the election ; and in the listrict Attoracy case the court had allowed proof of the entire neglect of duties by the election officers, their neglect to receive challenges, &c ; the court would therefore allow the inquiry proposed by the specifications. In regard to the last epecification, referring to the same the first at the fast of the dickion was, that from the 163d to 191st the specifications are to be stricken out, the 191st
