Charles Themps in Jones Sworn.—I was present at the election, and they decided to take their votes.

They had taken two votes of officers, and the private solders contended they had as much right to vote there are he officers; one swore he was between the age of 2I and 22, and had been in the camp three months; he said his pan ents resided in the Tenth ward; the other pasty claimed to have his flicers voted the— Mr. Hirst. YANKEE GAMBLERS DUPED.—At the Suffolk Park, on Saturday, there was some little gambling going on about in spots. Feveral of the detectives of Philadelphia were there, and one of them, on looking over the shoulders of one of a crowd, was immediately "tackled" by a "cappers in." The detective "played off," and come the "genteel green countryman." One of the "cappers" put down a "five," which was covered by another "five" on a three-card monte table. The supposed gentleman from the country was politely requested to hold the stakes. He did not refuse. The sum of ten dollars was handed him by the "bettore," and he put the same into his pocket, and coolly walked away. He had not gone far before one or two of the party, who were gamblers belonging to Boston, Mass, hastened up to him, saying, "Look yer's mister, don't you go away with them stakes!" Just about this moment, a knowing one stepped up, and whispering something into the ear of the "cappers," they retired in much more haste than they advanced. "That's a detective who holds the stakes," was a whispered ejaculation that slightly astounded the party, and the next moment stakes of another kind were pulled up, and the entire crowd travelled in divers directions, like so many little spiders bursting from the maternal bag. The gamblers allowed it was a "fair beat," "done by golly." The detective handed the money over to a member of the Copper-shop Committee, with instructions that it be divided ejually between the two refreshment saloons. The Yankee gamblers are not so smart, after all. YANKEE GAMBLERS DUPED .- At the

The special committee appointed to purchase firewood reperted that they had received proposals from various persons, at prices ranging from \$5 to \$4 per cord, and that they had purchased 200 cords of sapting oak at \$3, per cord, and 50 cords of oak at \$3.50 per cord.

The yearlar months report of the visitors was read. that they had purchased 200 cords of saphing oak at \$4 per cord, and 50 cords of oak at \$3.50 per cord.

The regular monthly report of the visitors was read. It shows that 1,793 persons have been relieved, at a cost of \$768.84, which is within the appropriated allowance.

Mr. Erety offered a resolution that a committee be appointed to make arrangements, and advertise proposals, for a supply of butchers' meat for the ensuing year, and report their action to the Board. Adopted.

The Committee on Warming and Ventilation reported that they had examined the various heating and ventilating apparatus connected with the hospital and insane departments, and find the same sadly out of order. The boilers are situated under the respective separtments, in the cellars, and are placed so low that the drainage of the cellars accumulates in the fire boxes under the fines, thereby requiring additional fuel to make sufficient steam to warm the apartments and cook in the several kitchess. In regerd to the location of the boiler, your committee have, from the first examination, been impressed with the total unitures of it for the above reason, as well as the great danger arising from an extension which mean event continue for a context of the property of the context of the property of the property of the property of the context of the property of t

They would, therefore, recommend a system of bester drainage to get clear of the water under the boilers, or a removal of the boilers to the outside of the boilers, the latter plan being, in the opinion of your committee, the most desirable.

Your committee must not omit to mention that the small beliers, which were erected for the summer cookery, are not used at present, owing to the depth of water under them rendering it impossible to keep up sufficient steam for that purpose, and consequently large fires are kept up under the large boilers, which were intended only for whiter use, at a great expense of fael, solely for cooking. cooking.

The committee also reported that the foul and cold air ducts were also bady out of order, the floors requiring cleaning, and deprecate the present expensive manner of introducing hot air into the wards; and recommending the removal of the steam coils, which would save much expenditure of incl.

find it extremely difficult to procure comfortable and agree able lodgings during this interesting, but anxious and often trying and cangerous period. Many ladies, thus circumstanced, would gladly avail themselves of the advantages of an institution of this kind, could they be assured of the retirement, comforts, and safety that night be enjoyed in their own home, and be willing to pay aremunerative compensation for their accomm dations. While the conveniences and comfort of this class would be much enhanced, they would contribute materially towards the support of the institution. This class will constitute the first section.

2. Many destitute and worthy women—wives of inclass will constitute the first section.

2. Many destitute and worthy women—wives of intemperate or thriftless bushands—often endure the greatest amount of suffering at such time, when every sentiment of humanity and Ohristianity appeals loudly for relief. To this class of women the institution offers a most welcome and comfortable home.

3. To that class of females who have hitherto maintained a good reputation, but, like thousands that have gone before them, have been unfortunate, the doors of the institution are to be ferever open.

The managers say, this being the first attempt to institute such an establishment in America, by legislative authority, they are confident that it will be met by the same liberality that has distinguished the citizens of Philadelphia and Pennsylvania in supporting other public institutions

Philadelphia and Pennsylvania in supporting other public institutions

The promptings of humanity are no stronger in favor of Lyings in establishments than are the dictates of policy in support of Foundline institutions.—A strong prejudice, it must be admitted, exists in the miteds of some citizens against the latter kind of charities. When traced to its origin it is found to arise from the impression that they are refugees for the offspring of shame. Careful observation, however, proves this position to be in point of fact without four dation.

The officers of this new institution are as follows: President. Bichard Vaux; treasurer; A. B. Thomas, M. D.; managers, Joseph S. Brewster, Lee W. Buffington, M. D., S. Beasley Kingston, Charles A. THE FOURTH OF JULY AND FIRE-THE FOURTH OF JULY AND FIRE-WORKS.—The usual proclamation against the firing of noisy and dangerous fire-works in the streets of the city on the 4th of July has been issued. The present is worded somewhat differently from former proclamations. It begins "To the end that, the dwellings and other property of citizens may be protected from the misoblets that frequently happen from the firing of rockets, serpents, crackers, squibs, and other fire-works, and that the public quiet may be preserved throughout the city, more especially for the ease and comfort of the sick and wounded, who are entitled to the grateful consideration of their countrymen, "and then goes on in the usual style. These proclamations are issued annually about the first of July, and are disregarded just as regularly by every one in the city. The present appeal it is hoped will be better regarded than the usual threat of fine, and the sick soldiers will not be pestered with the din which is so common to the Fourth of July.

—The closing exercises of this institution were held on Wednesday last. The classes were examined in Intellectual Philosophy. Constitution, Mental Arithmetic, Physiology, Physical Geography, and the usual elementary studies. The answers were clear and intelligent, evidencing that much pains had been taken to make the pupils individual thinkers. The compositions which followed were of a high order of excellence. A few pertinent remarks were offered by on a of the Principals followed by an address by the Rev. Dr. Newton. Testimonials of the first and second grade were presented to fourteen pupils. Missos Moore, Melcher, Dobbin, Souder, Griffin, Taylor, and Jayne. received testimonials of the first grade. A gold medal was awarded to Miss E. Moore, daughter, of Hom. H. D. Moore, State Treusurer; Miss E. Taylor was awarded a premium for French; Miss E. Souder, premium for Mental Arithmetic, and Miss E. O. Roberts a premium for exemplary deportment.

MILITARY HOSPITAL VISITORS.— VISItors entering a ward of a military hospital should not distribute oranges or other delicacles to the immates, unless
they have enough to give to all. Surgeons and nurses
say that it is no less painful to them than to the slighted
ones, to see a distinction made among men who are
equally brave and deserving. Sick and wounded soldiers
are naturally sensitive. Away from home, with nothing
to engage their attention but their own sufferings, their
thoughts naturally run on the friends, the affections,
and the comforts, which they sacrificed for the sake of
their country. They therefore see and feel a slight
where none may have been intended. If you have anything to give, and cannot trent all alike, it is better to
give it to the nurse or surgeon, to be added to the general stock, out of which all will be supplied alike, as their
necessities may require. ecessities may require.

She was present at the death of her husband, in Cairo, Ill., and came to the city with his remains. Her death resulted mainty from exhaugtion and grief, on account of the death of her husband.

ADVANCE IN COAL.—It is feared that the late severe flood in the coal region has very seriously affected the price of coal. The mines have been danged as, well as the canals, and the consequence is the price of coal has advanced at the mines as much as \$1.15 per ton within the last ten days. An advance of \$1 has been made by the dealers in Phonixville. It is said that

This is a flue opening to any one who desires employment, and no doubt the Board will receive numerous applications. RAILROAD ACCIDENT .- An accident

The engine and tender were thrown over an embankment, and the engineer Henry Pettit, and the direman, Harry, Andrews, were killed, by getting under the tender. MANY EFFORTS HAVE BEEN

Made to preserve the form and features of the
dead, without the usual mode, se repugnant to the feelings, of placing the body in ice. This difficulty has
been overcome by Good's air-tight PATENT BOXES.
Gold air is the medium used—acting as a preservative—in
the warmest weather, and for any length of time required.
Likewise, bodies may be conveyed huadreds of miles with
perfect safety, and in a good state of preservation.
