THE CITY. The Thermometer.

NE....NE....NE N by W....NE NE PROCEEDINGS OF COUNCILS: A Municipal Hespital for Philadelphia-The Public Squares-Expenses of Departments-The Fire Department-The Tax Rate for

A stated meeting of both branches of City Councils was held yesterday a ternoon. SELECT BRANCH.

The Chamber met at four o'clock P. M., the President, THEO. OUVLER, in the chair. Communications Received. Communications Received Controllers of Public Schools asking for an appropriation of \$1,000, for repairs to the Washington public school, in the Second district; from owners of preperty for the opening and grading of Ontario atreet, Twentieth ward, and for the location of gas lamps on Seymore and Morris streets; from several departments of the city submitting esti-

The Erection of a Municipal Hospital. Mr. Baine, from the Committee on Health, submitted a bill relative to the erecti n and management of a muicipal hospital; providing for the appointment of a commission to constitute the board of managers; also, for the erection of a building upon such ground at may be selected by said commission for the purposes of a municipal bosnital for the treatment of small pox Cases.

Mr. CATHERWOOD moved to postpone the consideration Mr. CATHERWOOD moved to postpone the consideration of the ordinance until printed.

Mr. GINNODE was opposed to the bill in its present shape. As a matter emanation from Councils, he thrught the body should have more weight in carrying it out.

Mr. Wefferlil considered it independent to appropriate \$40 000, as required by the ordinance, from the proceeds of direct taxation. He thought the present deficiency devolving upon the tax papers of the city was sufficiently large, as d should not be augmented.

Mr. Ford coincided in the opinion of the previous speaker, and favored the postponement. speaker, and favored the postponement.

Mr. Ginnopo stated that the erection of a hospital for cases of small pox, &d, was extremely necessary, and though the expenditure of some thousands of dollars might be indispensable jet a preven ion of the spread of is fectious diseases would more than repay the outlay.

The motion to postone was withdrawn, when, on motion of Mr. annersong the ordinance was referred to the Committee on Heath. Poor, &c, with instructions to report on next Thursday week Expense of the Public Squares. Mr. Fox, chairman of the Committee on City Property, reported an ordinance to make a further appropriation to the Department of City Property, for the payment of the management of the pub is squares, providing for the appropriation of \$2,000 for the balance of the year 1862. Mr. WETHERILL desired on explanation. If the appropriation was intended to beautify the equares, at this propriation was intended to beautify the squares, at this late season, he was opposed to it.

Mr Fox stated that the appropriation last year for this purpose was \$6,000. It had been mane \$5,000 for the present roar, and the present increase was, therefore, requisits. The Committee on City Property was not requisite. The Committee on City Property was not chargeable with the crea ion of the annual appropriation to this department. The proposed amount was intended to defray expenses stready incurred, as well as for those yet to arise during the year. The expense made necessary for freding the deer and squirrels in the public squares had increased alarmingly, and would be likely to increase as these animals multiply. By reason of the occupation of the requires for patriotic purposes, such as attendating the entistment of soldiers, the expense of them would be greater. taking proser care of them would be greater.

Mr. WETHERILL opposed the appropriation. He said that the gates of the public squares might now be very properly closed, the officers known as superintendents being mere appernumeraries. He therefore hoped that further expenditure in this particular would be After further discussion, the ordinance was laid over

A Topographical Map. Mr. Davis submitted a resolution providing for a topo-graphical map of the vici its of the city, extending to such limits as may be cremed necessary by the military Authorities

The subject was referred to the Committee on Defence COMMON COUNCIL.

A communication, in answer to a resolution of inquiry, was submitted by the President from the Ohief Engineer of the Water Works, stating that the contract for the construct on of the turbine water wheels at Fairmount had not been complied with. Expenses of Departments. Mr. Landy, commissioner, sent to Councils his estimate of appropriations required to meet the expenses of the Highway Department for 1863. Total amount is \$28,924 93 John Devereux, president of trustees City Ice Boat, oil that the appropriation required for 1863 would be \$ 12 600 James McClintick, City Treasurer, estimates the expenses of his Department at \$12.500, as follows:
Salary of City Treasurer.....\$2,500 Salary of permanent clerks...... 5,100 Salary of temporary clerks.....

\$12,500 The Fire Department. David M. Lyle, Chief Engineer of the Fire Department, sent in his quarterly report for the term ending September 30th. 1862

The number of fires was 94. Of which number the State- House bell rang for 29 The estimated loss amounts to \$162,146
The insurance to 106,164

ooks and stationery.....

..... 1.500

Fuel, office and other expenses, including Govern-

ment stamps.....

Leaving a balance of loss over insurance of ... \$55.932 By, a recent visit of inspection, the apparatus of the different companies, composing the department, were found to be in excellent condition. Mr. Freeman submitted the following ordinance: SECTION I. The Relect and Common Councils, &c., do ordain, That the City Commissioners are bereby authorized and required to forthwith levy on the taxable made in the year 1862, (except such as marked rural.) a tax of \$2 20 on the \$100 on the assessed value thereof, and upon every taxable inhabitant of the city the sum of 25 cents. property returned by the assessors as the assessmen SECTION II. The said tax to be levied for the year 1863, as one city and county tax, and is hereby voted fo the following abjects for the same year, namely:

f filteen cents.

2 For the public schools, the sum of thirty-two cents. 3. For lighting the city, the sum of fourteen cents.

4. For the payment of interest on the funded debt and 3. For lighting the city, the sum of foureen cents.
4. For the payment of interest on the funded debt and for the subsing fund, the sum of one dollar and five cents
5. For the care of the public highways, the sum of sixteen cents.
6. For the remaining expenses of the municipality, the sum of thirty-eight cents.
7. The ordinance was laid on the table and ordered to be circled.
8. The returns are select in the latter ward, and rightfully, according to the facts of the facts of the case. In the Twentr-first ward, in the facts of the facts of the case. In the Twentr-first ward, in the facts of the facts of the case. In the Twentr-first ward, in the facts of the facts of the case. In the Twentr-first ward, in the facts of the case. In the Twentr-first ward, in the latter ward, and rightfully, according to the facts of the facts of the case. In the Twentr-first ward, in the facts of the facts of the facts of the case. In the Twentr-first ward, in the facts of the facts of the case. In the Twentr-first ward, in the facts of The ordinance was laid on the table and ordered to be printed.

From Select Council.

Resolutions of thanks to General McClellan and his army, were received from Select Council and concurred in.

The Chamber took up the consideration of the municipal code, as reported from Select Council, but adjourned after making one or two trifling amendments. THE FRANKLIN INSTITUTE LECTURES.

-The lectures at this institution commenced yesterday evening, and will be continued on Tu sday and Thursday evenings for twenty weeks The first course of ten weeks will consist of Tuesday evening, on Galvanism and Magnetism, by Prof. John F Frazer; Thursday evening, on Chemistry, by Prof. B. H. Rand. The arrangements for the second course will be published in due time. Each member on paying his annual contribu-tion, and each life member, will receive a season ticket tion, and each life member, will receive a season ticket for himself and a lady; also, tickets for his children, wards, and apprentices under twenty-one years of age, on the payment of one dollar for each minor. The terms of membership are: Annual contributions. \$3; life membership, \$25; with the additional charge of one dollar the first year for a certificate of membership. The fiscal year commences the first of October. Members elected after the month of January pay twenty-five cents per month to the first day of October next ensuing. Stock members pay \$2 per year, price of stock being \$10 per share. The stated meetings of the Institute are held on the first Thursday evening of each month, at which subjects connected with science and the ares are received Members not in arrears are entitled to the use of the brary and reading room, with the privilege of taking books out. They will also receive a season ticket for the ures and exhibition, and a ticket for a lady to attend the lectures and six, single admission tickets to the ex-hibition for ladies or minors. They will also be entitled to receive one copy of the Journal of the Institute at one half the subscription price, when paid in advance. The lectures of the Institute on Mechanics, Physics, and Science, commence the first week in Noven are confidued on Monday, Wednesday, and Friday eveare continued on Monday, Wednesday, and Friday evenings, for twenty weeks.

The Drawing School, for instruction in Mechanical and Architectural Drawing and Designing, commences in October, and is continued on Thesday, Thursday, and Saturday evenings, for twenty-four weeks, under the superintendence of a competent draughtsman.

The members of the Alumni of the Central High School, and the Gridgates of the University of Pennsylvania. The memoers of the Antoniof the Gentral High School, and the Gridates of the University of Ponnaylvania, are entitled to use the library, attend the lectures and metings of the Institute, and visit the exhibitions, on the payment of two dollars per annum, until they are twenty-one years of \$39. The library consists of ten thousand volumes of unchanical and scientific works; and both that and the reading-room are open from 8 A M. to 10 P. M., delty.

The usual monthly meeting was held last evening, at the Hall of the Frankin Institute in Seventh street, above Chestnut. Among the many interesting articles to which the attention of these present was directed were specimens of American jute Mr. Howson, who exhibited them, stated that, on a previous occasion, he had submitted specimens of a more crude character than those now before the meeting. The fibre constitutes the outer covering of the stakes of the North American perennial plant known as the "hibiscus moscheutos or palustris," and has received the name of "American jute," although the term may be considered inappropriate, for the reason that the "jute" of the East Indies is the production of the "cochorus olitorius," or "cochorus capsularis," neither of which plants has any relation to those of the order malvaceae, in which the hibiscus moscheutes has been classed.

The discoverer of the utility of the fibres of this plant is Mr.-W.J. Caniclo, who, during the last two or three years, has been eneaged in examining the peculiarities of neity plants, with the ways of discovering a fibre. pears, has been engaged in examining the peculiarities of native plants, with the view of discovering a fibre available as a substitute for linen rags, in the manufacture of paper, for hemp in the making of rope facture of textile fabrica.

A patent was granted, Mey 13, for the utilizing of the fibres of the hibiscus moscheutes, and this patent is now owned jointly, by Mr. Cantelo and Mesers. Stuart & Peterson, below ware manufacturers of this city.

These gentlemen, sided by Mr. Cantelo, have, during the last eighteen months, been engaged in investigating the subject, and prosecuting experiments with the view the subject, and prosecuting experiments with the view of determining the properties of the plant; the strength and value of the fibre; the requirements demanded for its proper cultivation, and the amount of fibre which can be obtained from one acre of ground.

The proprietors of the patent are now prepared to lay before the public the satisfactory and highly-important results of their very careful experiments.

The hibiscus moschentos is indigenous to the Northern States and grows in abundance in awampy lands of Pennsplyania. New Jersey, New Yerk, etc.; in the marches of Burlington county, New Jersey, it is especially abundant. cially abundant.

In its natural state stalks of the plant, when at their full growth, are from five to six, and even seven feet high, and vary from a quarter of an inch to five-eighths of an inch in diameter. The number of stake from one root vary from eight to sixty, and eighteen stakes will, on an average, produce four ounces of disintegrated fibre.

An sere of marsh land in the neighborhood of Burlington, N. J., was ploughed, and seeds of the "hibisous moscheutos" spread along the infrows on the 28th of April last On examining the land, in September, the ground was fourd to be thickly studded with seedlings, of which the drawing produced at the meeting represents a specimen. It should be understood that little or no care was taken to weed the ground and to give that alrenting the produced at the first growth. rention to the young plants which will be advisable during their first growth.

It had been discovered by previous experiments that on cutting one of the stalks one season, a dozen or more would take its place the next, and that the plants would require no attention after the first year's growth. As to any liability of the plants becoming deteriorated from the ravagge of insects, it was found that in no instance could any marks of insect depredations be observed on the stems, leaves, or roots of the plant.

The next point to be ascertained was the amount of fibre which could be produced from an acre of ground planted with the bibiscus moschestos. This has been determined by a cless observance of the plant in its natural state, and by weighing the fibre taken from a number of stalks of average dimensions. At a moderate calculation, and taking into account every probability of loss from unforeseen causes, three and a half tons of disintegrated fibre can be derived from one acre of ground. Another important point decided was the facility with which the fibre or bark of the stalks could be separated from the pith.

from the pith.

It was discovered that this could be done with ease

and rapidity, even without the aid of machinery, which can be readily applied to the purpose.

The bark, after being detached from the pith; is, at

The bark, after being detached from the Dithing aconce removed to a very simple apparatus, invented by Mr. Cantelo, when the bark is reduced in a comparatively short tine to the disintegrated fibrous condition shown by the specimens equibited, the fibre in this state

being ready for the market, either for conversion into perior than nor the market, ethics for contraston may rope, or for paper slock.

As to the value of the fibre, it has been declared by experienced rope manufactures to be superior to making help or jute, he specimens of rope exhibited being fully (qual in strength and pliability to ordinary hempen rope.
Two prominent paper manufacturers of this city have estimated the fibre to be worth from \$80 to \$100 per top, to be used as a substitute for linen rags in the manufacture of pares. ton, to, be used as a substitute for linen rags in the manufacture of paper.

The utility of the fibre as a substitute, or partial substitute, for cotton, woolen, or flax, in the manufacture of textile fabrics. has not been as yet fully tested. There can be no doubt, however, that it is well adapted to take its place among other fibres for the manufacture of coarse and probably fine fabrics.

Judging, from the specimens of fibre, rope, &c., probe one of the greatest importance, as it opens new channels, duced, the dis overy or Mr Cantelo may be declared to for the exercise of manufacturing, mercantile, and agricultural pursuits, and toads to the utilizing of millions of acres of waste land.

Mr. Howson remarked, in conclusion, that the attention of Mr Cantelo bad not been confined to the above plant, but that, after a careful examination of, and experimenting with, the stalks of other plants, be had discovered that the abutilon avicenna, an annual, readily cultivated, and hitherto considered a useless weed, had a fibre of more silky quality than, and equally as strong as, that of the hibicus moscheutos.

The utilizing of the fibres of the abutilon, as well as those of other plants of mnor importance, is the subject of further applications for patents, as is also the disintegrating process above alluded to.

Mr. Howson exhibited a comera obscura, the inven-

tegrating process above alluded to.

Mr. Howson exhibited a camera obscura, the invention of Mr. G. F. Koib, of this city. By an arrangement of mirrors in the box, the images are thrown on the paper in an upright [position instead of reversed, as is usually in an upright position instead of reversed, as is usually the case it this class of instruments, thereby rendering them much more easily traced

Mr. H. also exhibited a machine for mixing substances, a patented by Mr. G. L. Witsel. It consists of a vessel in which are two spiral rods, which, by a rotary motion given them, thoroughly agitate and mix the contents of the vessel. The machine is especially applicable to churning, and other operations requiring the agitating or mixing of substances. nixing of substances.

G. S. Custer's patent coal oil lamp was exhibited. It

has a reservoir, containing water, placed below, the perforated att-chamber; the steam rising from the water mixes with the air, and inpinging upon the flame, renders it bright and clear, and also prevents any odor from the burning of the oil. the burning of the oil.

W. Bart's egs-beater was also exhibited. It is so constructed as to revolve with much more ease and rapidity than others of the same class.

A governor for steam engines, patented by Messrs Kvans & Jenkins, was exhibited; the peculiarity consists in so equalizing the action of the spring that it will act with an equal force at all times, rendering the action of the governor uniform under all circumstances. Mr. A. B. Davis exhibited and explained a weighing scale, for iron manufacturers, of his invention. By the arrangement, in a case, of a number of levers, each of which can be connected to the platform separately, the proper quantity of each logredient required in the maufac ure of the iron may be measured without altering the position of the weights upon the beams. The weights may also be secured to the beams in their proper posi-

tions, and the case locked, so as to keep secret from the workmen the proportion of the ingredients used; small pixs secured to the beams and projecting through slats pirs secured to the beams and projecting through slats is the case showing when the beams are raised.

Three patent lamps, manufactured by Messra. Warner, Miskey, & Merrill, were exhibited, one is tended for railway cars, as a substitute for the usual candle lamp, having Merrill's patent attachments.

Another is constructed for application to a lautern, and a third is applied to a portable hand, lamp.

The various patent lamps of Mr. Merrill were lighted during the evening, and attracted the attention of the members present on account of their simplicity and the brilliance of the flame.

Mr E S Wile exhibited a model of his retary cannon, to which he has given the term, of land monitor, for non, to which he has given the term of land monitor, for which he claims a number of advantages. Mr. Wills also exhibited a model of his hospital bed or litter. It is constructed entirely of wood, with the view of attaining the qualities of lightness, cheapness, and durability.

EXTENSIVE OPERATIONS OF RIVER THIFVES—THE NECESSITY FOR AN INCREASED HABBOR POLICE —Several bold and daring robberies which have recently been perpetrate on board of vestels of all classes lying at the [wharves and at anchor in the Delaware river, demonstrate the necessity for an immediate increase in our harbor police, which at present numbers only a dezen men—a number entir-ly too small to guard the whole city front from Bichmond to the Navy Terd. Among the vessels recently visited by the river pirates was the pleasure yacht War p, the property of J. H. Purdy, Fig., of the American Telegraph Company, lying at anchor on the Jersey shore, below the Camden and Ambay Railroad depot. During the temporary absence of the keeper, the vessel was cutirely stripped of its furniture, to the value of about \$125. Through the efforts of teut. Edgar, of the Harbor Police, and Coxwain B. Hyers, this robbery has been traced, the thieves deto ded, and the this robbery has been traced, the threves upto new, the two property recovered. On last Saturday morning, before daylight, Police Boat No. 1, Coxswain Myers, saw a boat on the Jersey shore acting rather suspicionally, and made towards it. The answers of the man in charge not being satisfactory, he was arrested and searched. Two pawn

towards R. Ine answers of the man in charge not being satisfactory, he was arrested and searched. Two pawn tickets were found upon him, which led to the discovery of a grobbery committed in May last, and to the storehouse of a large amount of stolen goods, at the Falls of the Schuylkill, including the property of Mr. Purdy. We understand that a petition is receiving numerous signatures. requesting the Mayor to recommend an increased force on the Delaware, and also a police force on the Schurlkill to intercept the thieves in their progress up that stream with their plunder. MORE TROUBLES IN THE TWENTY-FIFTH WARD.—Last year, the citizens of the Twenty-fifth ward elected a Select Councilman, Mr A. J. Carber-

fifth ward elected a Select Councilman, Mr A J. Catherwood (Breckinridger), for two years. A short time after his election he removed from the ward. The Ooksolidation Act provides that the Select and Common Council shall have the same qualifications as are required for members of the Senate; that is to say, the person selected shall be an inhabitant of the district for which he shall be chasen, unless be shall have been absent on the public business of the United States or of this State; and no person elected as aforesaid shall hold said office after he shall have removed from such district.

The National Union party, feeling that their interests had not been represented for a year, placed a candidate, Mr. B Jenks, on their ticket, on Tuesday's election. But the Democrate, at the eleventh hour, determined that they should not lose their Select Councilman. They accordingly very quietly placed upon their ticket the name of P. O'Bourke, who now claims the election by over three hundred majority. There is a prospect of trouble in the Democratic camp. Mr. Gatherwood manifests no disposition to yield; and, should his opposition provoke the wrath of Mr. O'Rourke, the prospect is that Mr. Barton Jenks will represent the ward during the coming year.

the coming year. A PABALLEL CASE.—In the Twentyfirst ward, a similar attempt to carry the Council ticket has been made as that which we spoke of yesterday in reference to the Twenty-fourth ward. The National Union party claim the election of Select and Common cincts, is as follows: Precincts. Jas. Greenwood, D. Chas. T. Jones, N. U.

Mr Jones will take his seat, however, as he holds the certificate, and Mr. Greenwood will become the contest

THE UNION REFRESHMENT SALOON. The Union Volunteer Refreshment Committee have re-ceived the following in sid of their institution: The Union Volunteer. Refreshment. Committee have received the following in sid of their institution:

Chas. Potts, \$5; collections by Wm. H. Pedrick, Pedricktown, N. J., 17 barrels sweet potatoes, 22½ bushels apples, I barrel cabbase, 200 pounds wheat flour, 60 pounds lard, 10 pounds butter, I bushel poppers; Samuel W. Ayers, \$5; Saml. J. Revers, \$10; Tyler. Stone, & Co., \$25; A. C. Oraig, \$5; Geo. F. Peabody & Co., \$25; F. Fearon. \$5; J. T. Lewis & Bro., \$10; Frederick Stokes & Co., \$25; Newbold, Son, & Aertsen, \$25; B. Spraigh, \$5; Ohas. Foster, \$3; proceeds of a fair held by Misses B. M.—Lambson, Louisa and Mary Warrick, Mavy Desborough, Salile De Haven, Masters George Lambson and Arnaud Lambson, Comden. N. J., \$7; ditto, held at Germantown by Masters William and Robert Troth, \$12 25; ditto, held by Misses Emma Smith, Maria and Emma Heiss, Anna Frazer, \$5; ditto, held by Misses Mary J. Linard, Carrie A. and Clariess E. Maynard, No. 22 N. Tenith street, \$50; ditto, held by Misses Isabells and Elm Stockley, Adelaide Baude, Mary McCann, and Master Rly Grover, at No. 1243 South Second street, \$18 56

FOR FORTRESS MONROE. - We paid a visit to the rendezvous of Company A. Roberts' Artillery, of which our old friend, Samuel Hazard, Jr., is captain. We were pleased to find him getting along so rapidly and so much to his own satisfaction. He is very careful in selecting his men. taking none but men of a certain height, sober, and able-bodied. Boberts has received permission within a few days to move each company to Fortress Monroe as fast as filled. Capt. H. hopes to be able to be in payrison there in a few weets company to the selection of the to be able to be in garrison there in a few weeks now to be able to be in garrison there in a few weeks now. He clothes his men as soon as they are mustered in, which is done the moment they present themselves. We have understood that some of the regiments that have been and are now recruiting here have done so without authority, and of course, having no mustering orders, they cannot muster their men. This is not the case, we can safely say, with this organization, as we have seen (as otters can see) the written authority of the Secretary of War, approved by Goy. Curtin, at the headquarters, northesst corner Eighth and Chestnut. We recommend our young men readers to join.

mend our young men readers to join. SPECIAL MEDICAL ORDERS.—Surgeon SPECIAL INEDICAL URDERS.—Surgeon
A K. Smith, United States army, has been ordered to
relieve Surgeon General E. Cooper, United States army,
medical purveyor in Philadelphia. The latter, on being
relieved, will proceed to the headquarters of General
Buell's srmy, and relieve Surgeon Robert Murry, United
States army, as medical director of that army.
Surgeon Robert Murry, United States army, on being
relieved, will repair to this city, and report to Surgeon
W. S. King as medical director of fransportation
Assistant Surgeon B. A Clements, United States army,
will report in person to the Medical Board in this city,
for examination for promotion.

THE TURF .- On Tuesday next, the first of a series of great running races under the management of John L. Caseady will commence at Suffolk Park Course. The first day will be the great post stake three-mile heats, purse \$1,400, for which the following horses will contend: "Idlewild," "Wagram," "Avalanche," and "Blackbird." The second day there will be two races. First, mile heats, purse \$200; second race, two-niles out, purse \$200. Third day, first race, one mile and a quarter, purse \$125; second race, two-mile heats, purse \$200.

MEETING OF RETURN JUDGES:-This morning, at 10 o'clock, the return judges from the various words are required by law to meet, in order to make up the efficial returns of the election of Tuesday. The Supreme Court. Boom is usually the place of meeting. For several years one or two judges have been absent, and it became necessary to send for them—a circumstance which causes a delay in the count, and its a great inconverience to all concerned. On this account we incorety hope no failure will occur in to-day's attendance. MILITARY MATTERS .- Recruiting for

the old Philadelphia regiments at Osmp Jefferson has been dull lately, owing to the election excitement. Now this is over, the recruiting will progress again. The ap-learance of the square is as lively and attractive as that presented at Camps Independence and Franklin. Regi-ments for nine months service are forming in our city. The refreshment saloons entertained the two regiments form New York which passed through here, going South, CHARGED WITH BEING AN IMPOSTOR. Charles F. Feniley was charged before Alderman Beitler, yesterday, upon the oath of Chief Detective Fras klin, with being an impostor, and collecting money under false pretences. He represented that he was discharged from the army and wanted funds to get to his home, in Pittsburg. He told another person he lived in Reeding, and yesterday admitted before the alderman that I e and his wife resided in this city. He was committed for trial.

LECTURES -A lecture on "Cuba" was yo terday afternoon delivered at the Boys' Zauestreet Grammar School The lecturer was Mr. John Collins, and the lecture was illustrated by a large number of paintings
Yesterday afternoon also, Professor Ennis commence lis course of lectures on geology, at the Scientific and Oliptical Institute. The subject of "Oreation" will form his principal theme, and the natural specimens and i lustrations will be yery rich and diversified. THE CRIMINAL COURT. -The Court of Quarter Sessions was in session yesterday, Judge Lud-low presiding. A number of trifling cases were disposed of Ann Derken; convicted of larceny, was sentenced to an imprisonment of four months. The poor woman cried urtil she went into spasms.

The Court of, Common Pleas Judge Allison and the United States Circuit Court, Judges Grier and Cadwala-cer, were in session yesterday morning, but transacted to furthers of importance.

BOARD OF UNITED STATES SUPER-VISING INSPECTORS OF STEAMBOAT. The Board of Supervising Inspectors are now holding the sleventh annual session since its origin by the ect of Congress, adopted in 1862, for the more perfect regulation and control of steamboat property, and especially for the preservation and safety of the lives of passengers or the lives of lives or the liv anguaged in travelling by this conversace, throughout the United States. Their, meeting commenced yesterday at the Continental Hotel; the Continental Motel:

The Beard is composed of nine members, who have the supervision of all the steamers running upon our lakes, rivers, and bays, and ocean, within the boundaries of the United States These, gentlemen are engaged in the inspection and examination of those vessels, looking into

rection and examination of those vessels, looking into-their sea-worthiners, the condition of their machinery, fire appreciate, &c., &c., The enriceers and pilots are examined and incensed by this Board, and by the local boards under them which are established in all of the principal ports throughout the country. The local in-epectors, are also appointed by the G vernment, and con-sist of an impector of boilers and an importor of hulls in each port. in each port.
The Surpervising Board hold an ennual meeting, at which time the members composing it bring together reports from all the local boards in their various districts, and from the same prepare an annual report, watch it laid before the Honorable Secretary of the Treasury, who sends it to Congress as matter of information and concideration concerning the workings and benefits of the United States laws bearing upon stamboat navigation. The session of the Board will continue, in all probability during some six or eight days. Thomas B Stillman, Eq., is the supervisor for this, the Second district, which includes the port of Philadelphia, New York, Boston, and Charleston, Portland, Me., and New London, Conn. Messra. Whapples and Zane are his local board for this port.

The following are the officers and members constituting the Board:

President—John Shalloross. Louisville, Ky.

tuing the Board:
President—John Shalloross. Louisville, Ky.
Secretary—James N. Muller, Beltimore, Md.
First District—Wm. Burnett, San Francisco, Cal.
Second District—Thomas B. Stillman, New York.
In hird District—James N. Muller, Baltimore. Md.
Fourth District—John J. Witzig, St. Lonis. Mo.
Fifth District—Oharles L. Stephenson, Galena, Ill
Sixth District—John Shalloross. Louisville, Ky
Savanth District—Reward M. Shield. (Qincinnati, O Feventh District-Edward M. Shield, Cincinnati, Oh Eighth District—Alfred Guthrie. Chicago, Il Nimh District—— Bemis. Buffalo, N. Y.

LIBERALITY. - We were informed yesterday, by a person cognizant of the fact, of a quiet but most substantial act of liberality, by the men em-ployed in the foundry of Stuart & Peterson, in this city. It is well known to most of our readers that the ladies of the various churches have organized hemselves into societies for the purpose of funishing relief, in every form, to the sick and wounded soldiers, who are, to a great extent, a secred trust in our hands, i Among the most efficient of these societies is that of Trinty M. E. Church: the results of its operations have been v great, and many soldiers have left the city bearing free testimony to their generous kindness.

The men in the foundry alluded to collected among themselves, and forwarded to these ladies, a few days since. themselves, and forwarded to these ladies, a lew days since, about one hundred and fifty dollars. No one o uld fall to be satisfied if they could winess the amount of real comfort furnished to our brave suffering soldiers by the judicious expenditure of such a sum as this. Such an

HONORABLY DISCHARGED .- Yesterday afternoon, James! W. Blaylook master joiner at the Navy Yard, had a final hearing, before United States Commissioner Hearlitt. The defendant was charged upon the oath of an ex-employee in the joiner's depart-ment, with manufacturing articles for his own use, out of Government material, and in Government time Three separate hearings were had before the Commissioners during which some ten witnesses were examined, but the evidence eticled did not implicate Mr. Blaylock in the least. The case, yesterday, was therefore dismissed, and the defendant honorably acquitted. Mr. Blaylock, in vindication of his own character, has pre-ferred a charge of perjury against the individual upon whose oath the suit was commenced.

STABBING AFFAIR AT BRISTOL - A difficulty occurred at Bristol, on Wednesday eventure, between two men, named James Buchannan and John Scollin, during which the former was severely stabbed. It seems there has been, for some time back, an animosity existing between the two men and they have had several fights, in one of which Scollin was considerably worsted. It was in consequence of this that Scollin attacked Buchannan on Wednesday night, with a large kuife. The latter was stabbed through the left cheek and through the left hip. None of the wounds are considered dangerous. Scollin was arrested, and committed by Justice Pennington to answer. Pennington to answer.

CAN'T AGREE. The District Court. Judge Sharswood, was in sersion yesterday morning, but was unable to get a single case on trial. The list was called several times without success. In one case, which was put on trial on Wednesday, and concluded and left with the jury at the hour of adjournment, Judge Shars-wood was obliged to discharge them yesterday morning, because two of the jurors left the court room at the hour of adjournment without waiting to deliberate on a verdict. Jornsel for the parties would not agree to their making

SAILED.—The United States sidewheel steamer Keystone State sailed from the navy yard yestirday morning for Hampton Roads and Port Royal. She carries eleven guns and is a swift and commodious steamer. The Keystone State arrived here on the 1st the dry dock at the navy rard and received a thorough overhauling. Her list of officers are the same that commanded her during her trip to this port.

PROMOTIONS IN THE CORN EXCHANGE BEGIMENT—Lieutenant Lemeul L'Orocker, and I ieu-tenant John B. Hunterson, of the Corn Exchange Begi-ment, sre we learn about to be prometed to the positions of captains to fill vacauties. Captain Passmore has re-signed his command in the same regiment. Quarter-master T. H. Addicks tendered his resignation, which was accepted.

ALDERMEN ELECTED .- The following ditional aldermen were elected at the election held on Twenty-second Ward—Joseph King Union, re-clected; Benjamin Taylor, Union, and Robert Thomas, nien. Twenty-fourth Ward—Benjamin F. Warren, Union, and James Allen, Union.

SERENADES .- Mayor Henry was on Wednesday night serenaded at his residence on Nicewhen the pear Frankford. The Mayor replied by the fit though with his usual elequence. The serenalers were composed of between one and two hundred citizens of Frankford, and first proceeded to the residence of Mr. Edw. G Lee, Bepresentative of that district, Franklin street, in Frankford, at d serenaded that gentleman.

EPISCOPAL HOSPITAL.—ACKNOW-LEDGMENT OF RECEIPTS—The Managers of the Episcopal Hospital acknowledget he receipt of a quantity of apples and vegetables, for the sick and wouded seldiers now in the institution at Front and Lehich avenue, from Mr. Black, of Jerkintown: also, twenty bushels of pota-George Blight, Erq, of Township Line, Phi-CAPTURE OF THREE OF THE ANDER-

t ON TROOP.—We learn that privates Oakford, Wells, and Allen, of the Anderson troop, and formerly of this city, were captured upon the field of battle at Perrysville, Kentucky, on Wednesday, the 8th lest. They were percied by the enemy, and were sent to Camp POLICE APPOINTMENT. - Mr. John W. Brown has been appointed a detective by Mayor Henry, in place of Samuel Wrigley, who is away as captain in the army. Mr. Brown was formerly lieute nant of police at Manayurk, and resigned that post to fill a clerkship in the Post Office, which latter place he also

eft, in order to accept his present position. NEW AMBULANCE - Yesterday, the Cohocksink Hose Company paraded a new ambulance, for the conveyance of sick and wounded presented to them by Messre Wilson & Obilds, carriage manufacturers. The apparatus is painted red, and is splendidly fitted up.

DEATHS AT THE ARMY HOSPITALS .-The following deaths were reported yesterday at the various sumy hospitals:

West Philadelphia — Chas. H. Beed, D, 18th New Broad and Cherry -Wm. Foster, I, 81st New York. DISCOVERED DEAD .- Yesterday, in

the Twenty fourth ward, a man was found dead, and was subsequently recognized to be of the name of Starrs. Also, at her residence, yesterday morning, in the Twentieth ward, 1535 Cabot street a woman named THE ORDINATION and installation of Mr. W. L. Cheffin as pastor of the Second Unitarian Society of this city will take place this evening. Dr. H. W. Bellows and other distinguished clergyman are to take part in the exercises. FAIR.—A fair for the sick and wound-

ed soldiers will be opened at Carpenters' Hall, Chestnut reet, below Fourth, on Tuesday evening, 21st instant. he young managers are Rebie Roberts and Sallie PARDONED. Governor Curtin has pardoned James Gorman, sentenced to ten years' impri-comment in the Peritentiary, for killing a sailor in Pine alley, in February, 1861. He was released from his con-

MEDICINAL. S-T-1860-X.

Lar our possessions be what they may marble pa-laces, broad lands, magnificent plate, or cashets of " precious stones."—they all sink in the balance as against Heaven's great boon. HEALTH, and they cannot be enjoyed without it. The language of nature attests that whoever would enjoy the pleasures of food; the beauties of flowers and landscapes, the joys of companionabil the richness of literature, or the honors of station and renown, must preserve their health. And yet, how little is it valued, and how carelessly preserved! The stomach from which all parts of the body derive their sustenano When foul, injurious food enters the stomach, acute sympathy disorganizes all other organs, and disease, more or less painful, must follow. The faws of natura cannot be violated with impunity. Night revelry luciurious living, irregularity of meals, and a disordered appetite, will gradually destroy the power and activity of the stomach. How many ladies and gentlemen eat and drink disease at late suppers, and arise in the morning with headache, loss of appetite, feeling languid, unrefreshed; feverish, low spirited, weak and incapacitated to perform any mental or physical duty, and dream not this is the beginning of that horrid

which assumes a thousand shapes, and points towards s miserable life and premature decay? There can be no medical remedy that will turn lead into food, or polsoned drinks into nourishment, but medical science can assist nature, supply exhausted fluids, and, to a great extent, correct the effects of disease, when the habits are The Medical Faculty has exhausted its research for generations in creating appetizers and overcoming stomachic derangements, Certain ingredients were well

established as possessing beneficial qualities; among these were CALISAYA BARK AND ST. OROIX BUM. But still components were wanting, and regularity could not be obtained. An invalid physician, sojourning in the tropical island of St. Oroix, observed the habits of the natives, and gathered from them the receipt for the final accomplishment of this most important end. Its component parts, largely incorporated in the vegetable diet of that island, produced the effect without a proper knowledge of the cause. The article was first made and used as a private medicine. Its effects were so salutary that it is now being produced and consumed in immense quantities under the name of

DRAKE'S PLANTATION BITTERS. OLD HOMESTEAD TONIX. They act with the power of a medicine, and are taken by old or young with the pleasure of a beverage. The sale of these bitters was at first confined to our extreme Southern cities, but they are now becoming well known throughout the world, and are recommended with the most unbounded confidence, for all complaints origina ting from a disorganized or diseased stomach—such a Dyspensia, Liver Complaints, Nervous Affections Loss of Appetite, Intermittent Fevers, Diarrhea Sour Stomach, Headache, Fever and Ague, Weak-As a morning Appetizer, and after dinner tonic, they are held in high estimation, and should be found upon th

zideboard of every family. They are also much relied upon in the Tropics for lorofula, Bheumatism, and dropsy. IMPORTANT CERTIFICATE. "ROCHESTER, December 28th, 1861. " Messrs. P. H. DRAKE & CO.-GENTLEMEN: I have een a great sufferer from Dyspepsia for three or four

years. I have tried many, if not all, the remedies re commended for its cure. Instead of relief, I became worse, had to abandon my profession, and suffered greatly from everything I ate. My mind was much affected, depressed and gloomy. About three months ago I tried the Plantation Bitters. They almost imme-

and that we use is selected with great care from th

estates of a few planters in the interior of that island. CALISAYA, OR KING'S BARK. was unknown to civilization until the middle of the seventeenth century. The natives of Peru are generally supposed to have been long previously acquainted with its most wonderful medicinal qualities. Humboldt makes favorable mention of the febrifuge qualities of this ofticle as an antidose to FEVER AND AGUE, Intermittent and Malarious Fevers, in his extensive South American traveis.

The Countess, wife of the Vicercy of Peru, having in her own person experienced the beneficial effects of the bark, is said, on her return to Spain, in the year 1840. to have first introduced this remedy into Europe. After its introduction it was distributed and sold by the Jesuits, who are said to have obtained for it the enor. mous sum of its weight in silver. From this circumstance it was called JESUIT'S POWDER, a title which it retained for many years. In 1658, we are told that an Englishman by the name of Sir John Talbot employed it with great success in France, in the treatment of Feve and Ague, Dyspepsia, Nervous Affections, Loss of Appetite, Weakness and Debility; Palpitation of the Heart, Diarrhoss, &c., &c., under the name of English Pawders; at length, in the pear 1679, he sold the secret of its origin and preparation to Louis XIV., by whom it was divulged. It is now a standard remedy, and is omployed in the preparation of the Plantation Bitters.

CASUARILLA BARK s another important ingredient. It was known in Ger nany as early as 1790, and much used as a substitute or Peruvian Syrup. It is employed as a gentle stime lant and tonic, in Dyspepsia, Chronic Diarrhosa, Colic Dysentery, and diseases of the stomach and bowels. DANDELION is used for inflammation of the loins and spleen, in cases

of biliary secretions and dropsical affections, dependent upon ebstructions of the abdominal viscera, and derangenent of the digestive organs generally. CHAMOMILE FLOWERS, sed for enfeebled digestion and want of appetite. WINTERGREEN

s a medicinal plant of very great efficiency, and is e pecially valuable in Scrofula, Rheumatism, and No fretic affections. LAVENDER FLOWERS. n aromatic stimulant and tonic, highly invigorating in nervous debility, generous to the palate and stomach. n sromatic carminative, creating fiesh, muscle, and

milk. Much used in nursing. 8-T-1860-X Another ingredient, of remarkable and wonderful vir tues, used in the preparation of these Bitters, is a netty of Brazil, and as yet unknown to the commerce of the vorld.: A Spanish writer says: * * * * * "adcinistered with St. Croix rum, it never fails to relieve Nervous Tremor, Wakefulness, disturbed sleep, &c. Spanish, and Peruvian ladies to heighten their color and beauty. It imparts cheerfulness to the disposition, and rulliancy to the complexion." We withhold its name rom the public for the present. To the above are added Clove Buds, Orange, Carrawa Coriander, and Snake Root. The whole is combined by a perfect chemical process, and under the immediate

upervision of a skilful and scientific Pharmaceutist. DRAKE'S PLANTATION BITTERS, OLD HOMESTEAD TONIO. are put up in Patent Bottles, representing a Swiss cottage

and are an ornament to the side board. SEA SICKWESS. Travellers by ratiroad or upon the inland rivers, where the great change of water is such a prolific cause of incipient disease like BILIOUS, INTERMITTENT. AQUE, AND OHILL FEVERS. may feel a certain reliance if they pro with these Bitters. The muddy water of the Western rivers, filled with decayed vegetable and animal matter tidote, such as is found in the Plantation Bitters. WHAT IS SAID OF THE PLANTATION BITTERS. " PHILADELPHIA, 1st month, 16th day, 1862. "ESTREMED FRIEND: Wilt thou send me another cas of thy Bitters? Nothing has proven so beneficial or

agreeable to my invalid wife and myself as the Planta-"Thy Friend. N. B.—The secret of the immense sale of the Plantaon Bitters is their tested purity. The St. Croix Rum and every article used is warranted perfectly pure. It is the intention of the Proprietors to sustain the Be careful that every bottle bears the fac-simile sime ture of the Proprietors, P. H. DRAKE & Co., New York. Drake's PLANTATION BITTERS are sold by all Druggists, Grocers, Hotels, and Bestaurants. P. H. DRAKE & CO., No. 202 BROADWAY. se24. wfm15t

A YER'S CATHARTIC PILLS.-A The sciences of Chemistry and Medicine have been taxed their utmost to produce this best, most perfect purgative which is known to man. Innumerable proofs are shown that these PILLS have virtues which surpass are shown that these FILLS have virtues which surpass in excellence the ordinary Medicines; and that they win unprecedentedly upon the esteem of all men. They are safe and pleasant to take, but prevent to cure. Their penetrating properties etimulate the vital activities of the body, remove the obstructions of its organs, purify the blood, and expel disease. They purge out the foul humors which breed and grow distemper, atimulate sluggish or disordered organs into their natural sotion, and impart healthy tone with strength to the whole system. Not only do they cure the every-day complaints of every-body, but also formidable and dangerous diseases that have besiled the best of human skill. Whilethey produce powerful effects, they are at the same time, in diminished doses, the safest and best physic that can be employed for children. Being sugar coated, they are pleasant to take; and being purely vegetable, are free from any risk of harm. Cures have been made which surpass bolief were they not substantiated by men of such exalted position and character as to forbid the suspicion of untrath. Many eminent clergymen and physicians have lent their names to certify to the public the reliability of our remedies, while others have sent me the assurance of their in excellence the ordinary Medicines, and that they dies, while others have sent me the assurance of their dies, while others have sent me the assurance of their conviction that eur Preparations contribute immensely to the relief of my affilted, suffering fellow-men.

The Agent below named is pleased to furnish gratis our American Almanac, containing directions for the use and certificates of their cures, of the following complaints:

Costiveness, Bilious Complaints, Bheumatism, Dropsy, Heartburn, Headache arising from a foul stomach, Nau sea, Icdigestion, Morbid Inaction of the Bowels and Pain a ising therefrom, Flatu'ency, Loss of Appetite, all Diseases which require an evacuant medicine. They also. a using therefrom, Flatuency, Loss of Appetite, all Diseases which require an evacuant medicine. They also, by purifying the blood and stimulating the system, care many complaints which it would not be supposed they could reach, such as Deafness, Partial Blindn as, Neu ralgia and Nervous Irritability. Derangements of the Liver and Kidneys, Gout, and other kindred complaints arising from a low state of the body or obstruction of its functions.

functions.

Bo not be put off by unprincipled dealers with some other pill they make more profit on. Ask for AYEB'S PILLS, and take nothing elso. No either they can give you compares with this in its intrinsic value or curative powers. The sick want the best aid there is for them, and they should have it.

Prenent by Dr. T. powers. The sick want inc uest and micro is not already and they should have it.

Prepared by Dr. J. C. AYEB & CO., Lowell, Mass.

MEDICINAL. TAS PROF. BOLLES' DISCOVERY
in the application of GALVANIAM, MAGNETISM, and other modifications of BLECTRICITY. received general favor among the most liberal Medical Tism, and other modifications of ELECTRICITY, received general favor among the most liberal fiddical Men of the Old Schools, and is Prof B's system now being trought rapidly into public favor? Yes, verily, and if you doubt it; read carefully the following extraots of letters, and electopinions of some of the most eminent Medical Men of this and other States, who have been traveling and lecturing, teaching and applying the different modifications of Electricity, as taught them by Prof. BOLLES:

BEAD THE FOLLOWING FROM EMINENT M D's.

The testimony or a Medical Man of the Old Schools, thirty years—fifteen years in the Allopathic School and fifteen in the Homeopathic—and has for two years since, being qualified by Prof. B., made Electricity a 'peotalty, has cured thousands never benefited by medicines:

Some five months ago I was attracted by modified the Professor Bolies, No 1220 Walnut street, Philadelphis, claiming a discovery that he had made in the use and application of the various forms and modifications of Electricity for the cure of all c trable diseases. I called on this gentlemen, and after listening to his theory of the Electrical laws governing life, health and disease, and his discovery in the application of Electricity in accordance with the polarities of the brain and nervous system, I was impressed that he hed something new and at onone applied for instructions on the subject. I now speak from experience, as I have remained in his office for two months, watching the result of his operations and having mysel—the charge of one of the treating rooms for nearly the whole time, and treated from tweive to fitteen cases daily, comprising nearly every kind and grade of onronte BEAD THE FOLLOWING FROM EMINENT M D's. mysol- the energy of one of the treating rooms for nearly the whole time, and treated from twelve to fitcesn cases daily, comprising nearly every kind and grade of out-nic disease. Although my expectations were high, I must confess they have been fully realized. I have seen a great number of patients who had availed themselves of the best medical skill and remedial agents for years—cases I well knew to be inourable by all other known remedica—permanently cured by a few applications of Electricity; and what has surprised me most, was the rapid improvement and cure of many cases pronounced pulmonery consumption by their physicians, because I had been instructed by Dr. Paige to avoil all such cases, as the treatment tended to injure. I feel impelled by a sense of duly to caution the public against the indiscriminate use of Electricity, as I have known injury to result from its use, in the hands of the ignorant. I would here remark that I have never in my whole experience, or observation from books, pampilets, or intersourse with men, read or heard of the general or special application of Electricity to the cure of diesse, as taught by Protessor Bolles, and, therefore, conclude it is original with him.

I yould say to those tanapering with this mighty agent.

Protessor Bolles, and, therefore, conclude it is original with him.

I vould say to those tampering with this mighty agent of life and death to beware lest you strike a blow at the citadel of life, and hever think of applying it to the living organism until you understand its nature, and when, where, and how to apply it.

I would here take occasion to recommend my professional brethren throughout the country to turn their attention to this important egent as taught by Professor Bolles, who has certainly, in my opinion, discovered the only reliable mode of its application, and thus rendered an important service to the healing art, and a lasting blessing to suffering and diseased humanity.

JAMES P. GREVES, M. D.,

206 Pine street, Philsdelphia.

206 Pine street, Philadelphia.
Since then Dr. Greves bas been qualifying his brethren in the medical profession, who, to a man, endorse the discovery of Professor Bolies

W. B. Wells, M. D., Buffato, N. X., after a year's practice, writes to Prof. B. as follows:

I think my feith fully comprehends the fact that Electricity, correctly applied, according to your discovery, is abundantly competent to one all curable diseases. My experience and success, after extensive practice, fully warrant this assertion. Were I sick with a fatal disease, I would far sconer trust my life in the hands of a skilful Electrician than all the "pathies" on earth besides

BUFFALO, N. Y. W. B. WELLS, M. D. PROF. BOLLES: I am fully satisfied that Electricity, when understood according to its polarities and their re-lations to the fixed laws of the vital economy, as taught by you, is the most powerful, manageable, and efficient agent known to man for the renef of pair and cure of disease. I would further state that I have for the past offense. I would further state that I have for the past few weeks used Electricity in my practice, to the exclu-sion of nearly all other remedies, and have been emi-nently successful, and consider it a universal therapeutic DATTON, Ohio.

D. MCCARTHY, M. D. PROF. BOLLES: For the last nine months I have made Electricity a specialty, and my faith is daily increasing in its therapeutic effects, and I believe, when applied according to your discovery, it will cure all curable diseases, smong which are numerous cases never cenefited BUFFALO, N. Y. P. W. MANSFIELD, M. D. What I have now to say is from actual observation, a what I have now to say is from actual coservation, as I have spent most of my time for the last two months with Prof. Bolles, and have witnessed the effects of the Electrical agent on from litteen to twenty-five parients a day, soffering from almost every form of chronic disease; and as strange as it may appear, in a majority of cases a perfect ours was effected in from five to fitteen days. And I will here remark that most of his patients were afflicted with long standing complaints, considered increable by

with long-standing complaints, considered incurable by all other known remedies. H. G. KIRBY, M. D. all other known remedies. CINCINNATI, Ohio. Prof. Bolles: I believe your discovery to be a reliable therapeutic agent, and feel it my duty to recommend it. Since I have received instruction from you, I have applied it in cases of Aphony, Brenchitis, C.rea, Amenorrhesa, Asthma, and Congestion, and find that I have the same success that you had when I was under your instruction. I invariably recommend medical men to avail themselves of an opportunity of becoming ac-quainted with your new methor of applying Electricity. Detroom, Michigan. David TRUESTON, M. D.

PROF. BOLLES: A great revolution in my mind and practice has taken place since I became acquainted with your new discovery of applying Galvanism, Magnetism, and other modifications of Electricity as a curative agent. Il have found by many experiments that Electricity is a sefe therapeutic agent in all acute and chronic cases when applied according to your discovery. I desire that medical men should become conversant with your discovery. CLEVELAND, Ohio. MARVIN GODDARD, M.D. BOCHESTER, N. Y., September 10, 1859.

PROF. BOLLES—DRAR Sir: The more I investigate this system of practice, the more confident I am that it is all powerful to meet the ten thousand diseases to which flesh is heir.

You, who first discovered Electricity to be a reliable therapeutic agent, should be considered a great benefactor of the race, for it is the only reliable system of cure for the woes and ills of suffering humanity. It is strange that a heavy becomes or wedded to that great when the tabusticians have becomes or wedded to their eaverally. that physicians have become so wedded to their several systems, brought up from the darkness of plat ages, that they will close their eyes against the light now beaming forth through this system of practice. All other systems I regard as the morning star to the rising sun.

P. SHEDD, M. D.

PROF. BOLLES: The nearer I conform to your system of epplication, the more successful I am, and as I have examined all the guides and works published upon the subject, and seen nothing in reference to your theory, I do not hesitate to say I believe it to be original with you, and the only reliable system extant for ouring disease.

Respectfully yours,

TORONTO.

CHAS. RANDALL, M. D. TORONTO. The opinion of a medical man, after thirty years practice, fifteen in Allopathy and fifteen in Homes-PROF. BOLLES-DEAR SIR: I never have, since you PROF. BOLLES—UEAR SIR: I never have, since you gave me instruction in your new discovery of applying Electricity, and God forgive me if I in the future ever do, practice either Homeopathy or Allopathy. I have been strictly governed by the philosophy you laid down, and for the best of reasons—namely: That I am generally successful; and I frankly say to you that I am done with medicine forever.

My success has been great since I have been in Newark, N. J.

JAMES P. GREVES, M. D., 206 Pine street, Philadelphia. AXFORD FEMALE SEMINARY.

N. B.—In addition to the above extracts, Prof. B, could furnish over one the usand, fully showing that he is well known to the medical and scientific world as the discoverer of all that is reliable in the therapoutic administration of Electricity, and that all other operators now in the different cities (except those qualified by him) are using Blectricity at hazard, and Prof. B. takes this occasion to cention the community against charlatens.
Office 1220 Walnut Street, Philadelphia.
N. B.—Medical men and others who desire a know-ledge of my discovery can enter for a full course of isotures at any time.

MARRANT'S BEFERVESCENT SELTZER APERIENT.

This valuable and popular Eledicine has universally re-ceived the most favorable recommendations of the MEDICAL PROFESSION and the Public as the most eppidient and agreeable SALINE APERIENT. It may be used with the lost effect in Bilious and Febrile Diseases, Costiveness, Sick Headache, Nausea, Loss of Appetite, Indiges-tion, Acidity of the Stomach, Torpidity of the Liver, Gout, Rheumatic Affections, Gravel, Piles,

AND ALL COMPLAINTS WHERE A SENTLE AND COOLING APERIENT OR PUR-It is particularly adapted to the wants of Travellers by Sea and Land, Residents in Hot Climates, Persons of Sedentary Habits, Invalids, and Convalescents; Captains of Vessels and Planters will find it a valuable addition to their Medicine Chests. It is in the form of a Powder, carefully put up in bottles to keep in any climate, and merely requires water poured upon it to produce a de-lightful efforcesoing beverage.

Municipus testimonials from professional and other gentlemen of the highest standing throughout the country, and its steadily increasing popularity for a series of years, strongly guaranty its efficacy and valuable character, and commend it to the favorable notice of an intelligent public. Manufactured only by
TARRANT & CO.
