OUTOBER 28, 1862.

WNW...NW by N..WNW. WSW.....SE...... CIVIL SUITS .- Yesterday, in the Dis trict Court, Judge Hare, an action was brought by Mc-Masters vs. Ervin & Bonsall, on a feigned issue bond. The defence was that the goods were forthcoming to auswer the writ. The plaintiff had levied on certain goods under a judgment he had obtained against Bonsuli. They were claimed by Ervin as his property, and a bond was executed, as is usual in such cases, conditioned for the return of the goods in case they were determined to be not the property of Ervin. When the case was called for trial Bonsall suffered a nonsuit. The sheriff then returned that the goods had been eloigned. The defendant yesterday offered to prove that the goods had been delivered to the sheriff, but that he permitted the defendant on the execution, Bonsall, to retain possession and pay part of the judgment against him, and on his failure o pay the balance, it was then discovered that the goods had been eloigned. For this Ervin, the surety, claime that he was released from liability. The court rejected the evidence, on the ground that the sheriff's return could not be contradicted, and the jury returned a ver-

Henry Schenck vs J. L. Wentworth. An action on a promissory note. Verdict for plaintiff for \$517.59. Francis Mount vs. O. Petry. An action on a promissory note. No defence. Verdict for plaintiff for \$329.54. tons for 1861. The decrease thus indicated was principally on the receipts for freight on the Lehigh, Delaware and Hudson, and Schuylkill Canal lines. On the Pennsylvania Bailroad the increase of coal shipments this year over last has been 416,000 tone, and it has been in greater ratio each week since that time. The damages on the Lebich Canai were sufficiently repaired to admit of the passage of coal boats during the last week in September, and consequently there are seven or eight weeks of the season jet remaining to make up for the loss of time occasioned by the June freshets.

THE SUPPLY OF COAL.—The amount of coal consumed by the General Government in its military and naval operations has been very great. All the coal used is, with but few exceptions, shipped from this city, and produced from the mining sections of Pennsplvania. It is estimated that the annual quantity consumed for this purpose alone is about three hundred thousand tons. All the anthracite shipped to Beaufort, Port Boyal, and the various other naval depots on the Southern coast, comes originally from Philadelphia. Owing to the interruption to navigation, caused by the freshets last spring, the total exports of coal from the mines this year, up to October, was 127,336 tons less than up to the same period last year. This would, at first sight, appear to be a very large quantity, but when the total amounts are given it diminishes greatly in importance, for the total figures for the year make up 5.748.489 tone for 1862, up to October, against 5,875,825 Last year the supply of coal was 584,109 tons short that of 1860, and yet there was no corresponding increase in the price of the article similar to what there is this winter. The quantity of coal sent from the mines during the first week of this month was 81,112 tons, the amount last year for the corresponding week being but 56,905 tons, thus showing a large increase in shipments. In fact, there is but little doubt that before navigation is closed on the canals the shipments of coal this season will greatly surpass in amount those of any previous year; thus it would appear that the want of the regular supply at this season of the year is not the cause of the increase in price.

THE PHILADELPHIA CITY GUARD .-This fine organization now forming under the command of Colonel William Gray, is for the nine months' service, and will be counted in the draft. Each man receives in full \$315 as bounty money, also, a gum blanket, an article not given to any other regiment. The advantages of enlisting in this regiment are greater than those offered by any other organization. The headquarters, at No. 627 Chestnut street, are tastefully fitted with flags and streamers, and every night the whole place is brilliantly illuminated with transparencies, lanterns, &c. The rendezvous is well worth a visit. A committee composed of some of our most influential and prominent citizens have associated themselves together in order to look after the best interests of the regiment, which will be as well attended to as the Corn Exchange Regiment has been by our merchants, who were instrumental in raising it. This committee, composed of the Messrs. Bullock, Kennedy, Ludwig, and many other well-known citizens, having raised and contributed from their own Bishop, which occurred recently at Milwaukee, Wisficient to equip every man in a handfinest that have yet left our city.

business of recruiting for the navy continues dull without the expectation of a rise in the market. It is one of those branches of Uncle Sam's affairs that are either at a premium or below par. Last summer, the former was the case, as a consequence of an apprehended nightmare in the shape of a draft; but the frequent postponemen of that calamity have materially assisted in dampening the enthusiasm of our would-be Jack Tars; many of them preterring the fee of a substitute to an excursion before the mest. At present there are about six hundred newly-shipped sailors and landsmen on board the receiving ship. The vestel has been partially refitted and additional accommodations are afforded to recruits. The demand for seamen is not very formidable, consequently no disadvantage is immediately experienced, but with the sailing of a few thips of war now under repairs at the navy

INTERESTING TO LANDLORDS AND TE-NANTS.—In the District Court, before Judge Strond, a guit was brought by Maninis G Evans vs W. G Brenton, to recover for the two and occupation of a dwelling house. No. 807 Locust street, from October, 1860, to July, 1561. The defence set up was that the premises had, previous to the defendant's occupancy, been occupied by persons of bad character, and that the defendant and his family were annoyed so much by persons calling there and inquiring after the former occupants, that they were obliged to vacate the premises. The deposition of a boarder with Mr. Brenton was offered to show these facts, but the court overruled the evidence as irrelevant, and there being no other defence, the jury returned a verdict

A RABE CHARACTER.—During the recent hearing of appeals by the Draft Commissioners, one individual came forward and stated that he had given his age, to the deputy marshal who took the enrollment, as forty-four years. Since then he had been to see his mother, who lives in Montgomery county, and whom he had not seen for ten years. She told him he was in his forty-sixth year, and he wished to be exempt on account of this fact. We do not think that there is another man in the city of Philadelphia, who lives so near his mother, and who has not gone to see her for the long time of ten years. The commissioner, of course, refused to exempt this rare specimen, to doubt thinking that if he could live so long without seeing an aged parent, he could easily leave his wife and family for the short space of

IRON CARS. - 3 he Central Railroad Company is now having constructed several cars, all of iron, the invention of a French physician, who has become a citizen of this country. Its inventor claims that it is many tons lighter than a wooden car, and much stronger; that it will last much longer, and is almost entirely secure from accident. If it came in collision with another, was thrown off the track, or down an embankment, or through a bridge, it might be badly dented, but would remain whole. No loss of life could occur from splinters, the breaking out of bottom, or top, or sides. There might be a jam and a squeeze, but nothing

A small retort—say three feet in length and four inches in diameter-fixed into a cooking stove, is filled with pine or other wood, which, when reduced to charcoal, receives a quantity of water and petroleum oil, in the proportion of one gallon of oil to every four of water. This chemical combination generates a solid clear gas, equal to 500 cubic feet, the cost being from 20 to 50 cents per 1,000 cubic feet. The gas-holder can be made of a suitable size, according to the needs of the consumer, and can be kent in the celtar.

the anticipated absence of their pastor, Rev. J. B. Dales, D. D. in the Holy Land. Dr. Dales leaves the city on account of sickness in his family, and in the hope that the mild air of an Eastern climate will have a beneficial effect. The following preamble and resolution were adopted in reference to his

meparture:

Whereas, Having heard that, in consequence of family affliction, our esteemed pastor deems it his duty to be absent from the congregation for a season, in the hope that it may be the means of restoring health to his companion, and bolieving that his proposed journey to Egypt and the HelyeLand will be of great importance and benefit, not only to this congregation but to the church at large, therefore benefit, not only to this congregation out to the camera at large: therefore,

Resolved, That we deeply sympathize with our pastor in his silliction, and while regretting the cause of his absence, we deem it his duty to make the proposed journey, and, as a congregation, will unite in prayers for a safe and pleasant visit to him and his, and their return to us in due time in health and peace.

The meeting scjoursed to meet again on Thursday

evening next, when a farewell interview with their pasor will be held. Dr. Dales and family leave this city for New York on Friday morning next, whence he takes passage to Liverpool. It is proposed by the congregation to present him with some more substantial mark of SALE OF A PRIZE CARGO.—The cargo of the prize schooner Louisa was sold yesterday at pub ic auction, b; order of the U.
