By a peculiar construction of the scale and bridge on the sounding board, they are enabled to give nearly double the ordinary length of the string from the bridgs to where the hammer strikes the string, which produces most extraordinary effects. The power is greatly increased,

By this sudden bereavement we are called upon to mourn one whose private and social virtues have long endeared him to the community at large, as well as to the closer circles of family, relations, and friends. The deceased was gifted with a disposition p cultarly genta! and urbane, and ever displayed that winning equilibrium of temperament which slone can retain friendship after having won it. Though his demise will long be lamented by his large number of personal friends, yet it is his family -his wife and children-who must experience the greatest poignancy from such sorrow. No obituary can ever do full justice to the worth of a man, in either his public or private capacity, and in this case particularly do we feel how weakly we express feeling, and how much more grateful it is to affliction to retire into the silence of

Funorous cases of deafness, some of which have been for years standing, and very many affections of the Epr and Ear, when sight and bearing have been recriously obstructed, or almost entirely lost, have been successfully treated; and the profession has, from time to time, been astonished at my almost miraculous success, both medically and surgically.
