THE COMMON BELIEF that the hair cannot be reproduced on bald heads is erroneous, and at variance with the known principles which govern its growth. Each hair is a hollow tube, through which there is a constant circulation maintained by the blood, which circulates in minute veins to the glands or vescicles which secrete the hair. By this circulation the hair is nourished and held fast, its glossy color given and prepared, and each hair covered with the finest oil. Anything which diverts or takes away the blood from the scalp, or impedes its free circulation to the glands or the roots of the hair, will stop its growth, cause it to DAY. turn gray, fall off, and leave the head bald. Continuous mental exertion, trouble, and various kinds of disease, thus produce baldness or loss of hair. Knowing the cause, we can rationally attempt to counteract the evil by restoring the circulation of the blood through the scalp. This can be done by the application of a proper stimulant, when the hair will spring forth and grow lux ariantly. The most certain article for this purpose, and the only one which has gained and maintained its repuation, through a long series of years, is JAYNE'S HAIR TONIJ. This article does stimulate the scalp, causes a free circulation of blood through it, and does not injure the young hair as it springs through the scalp. Acting upon principles which can be understood by any person who will give the subject a thought, it recom mends itself to every one requiring an article of the kind. By a faithful application it will stop the hair from falling out or becoming gray, and in nearly every case reproduce new hair upon heads that have been bald Sold only by Dr. D. JAYNE & SON, 242 CHE STNUT Street. GEORGE STECK'S INIMITABLE PIANO FORTES, Grands and Equ are rapidly taking precedence of all others for their pow er, evenness of touch, and pure quality of tone. Non should purchase without examining them closely. The most eminent teachers are almost daily selecting Prices to suit the times. ocll-stuth40t SEVENTH and CHESTNUT. GREAT TRIUMPH! grand discovery in the manufacture of the Piano Forte By a peculiar construction of the scale and bridge on th counding board, they are enabled to give nearly double the ordinary length of the string, from the bridge to where the hammer strikes the string, which produces most extraordinary effects. The power is greatly increased, and the harmony produced is truly wonderful, giving an entire new quality of tone, which is deep, rich, sweet, and melodious, with a singing peculiarity to each note, unlike to any Piano ever manufactured heretofore. The music-loving public are respectfully invited to call at our Warerooms, No. 1021 OHESTNUT Street, where they can examine this great improvement in the Piano Forte. S-T-1860-X.
