For the last seven- teen years no intelligence whatever had been re- ceived from him, and his parents and friends had settled down in the belief that he was dead. He re- turned to this country as Secretary of Legation from the Peruvian Government, and on Saturday left Allentown for Washington to assume his duties. SKELETON FOUNDOne day last week, seve- ral boys were crossing the Lehigh river, near the Les- high Yalley Iron Works, and about half way across the stream they discovered adhering to some rubbish what they supposed to be the bones of a dead horse. They draged them to the shore, when it was found that the bones were the sheleton of a human being. It was undoubtedly the remains of some poop person who was drowned in the great freshet of last sum- mer. The coroner of Lehigh county had them de- cently interred. If Dr. Mackenzie, or some other of your Philadelphia literati, would come here and establish such a Sunday paper; its success and stability would certainly more than counterbalance those of that new Philadelphia daily paper which some of our New York quidnunces are insidiously planning to INM UDON YOU: THE UTAMIDER OF COMMENTER through its committee appointed for the purpose, reported yesterday against two sections in the new bill "to prevent and punish frauds upon the re- venue." The committee object to the seventh section, which empowers the collector to take sum- mary possession of any merchant's books and papers where fraud is suspected; and to section 13, which takes away the merchant's right to hold the collector responsible for his acts. The committee are greatly disgusted with the idea of the "in- alienable rights" of merchant's whole business may be brought to a standstill by the seizure of his books, and he is left altogether without reparation in case he proves his innocence, what security can commerce have against the rapacity of corrupt officials, and the revenge of discharged employees? HABEAS CORPUS is supposed to be the "bulwark from behind which we take all kinds of vicious liberties," though it is much offener the bulwark from behind which we take all kinds of vicious liberties with justice. Not long ago, a gentleman of this city found that his only son, a lad of eighteen, had fallen into habits of gross dissipation, and was sinking even to a lower depth of infamy under the wiles of a daughter of shame. As threats and exposultations proved useless to turn the youth from his evil ways, the grieved parent finally took him on board the receiving-ship North Carolina, and there had h	<ul> <li>method the second second</li></ul>	sicamer Harriet Lane (recently captured off Galves- ton, Texas), was built, and by whom? Very respectfully, A SUBSCRUMER. [The Harriet Lane was built at the Philadelphia navy yard in 1857, for the Revenue service, and car- ried four guns. She was built, we believe, under the direction of Mr. Naval Constructor Hoover. Under Capt. John Faunce, she was engaged in the Para- guay expedition ; was designated as the vessel of honor to convey the Prince of Wales to Mount Vernon, up the Hudson river, and elsewhere. When the rebellion broke out she was transferred to the Navy Department, and joined the Potomac flotilla. Last spilling sho was ordinated to the Gulf and an- shifted in. the suptime of Galveston, where the trans- clad steamboats.—ED. PRESS.] <b>PERNSULVANIA</b> . A LONG-LOST SON RETURNED.—Mr. Sa- muel Krause, eldest son of Mr. John J. Krause, Sr., of Allentown, returned home unexpectedly last week from Lima, Peru, in South America, after an ab- sence of twenty-seven years. For the last seven- teen years no intelligence whatever had been re- ceived from him, and his parents and friends had settled down in the belief that he was dead. He re- turned to this country as Secretary of Legation from the Peruvian Government, and on Saturday left Allentown for Washington to assume his duties. SKELETON FOUND.—One day last week; serve- ral boys were crossing the Lehigh river, near the Le- high Yalley Iron Works, and about half way across the stream they discovered adhering to some rubbish what they supposed to be the bones of a dead horse. They dragged them to the shore, when it was found that the bones were the skeleton of a human beling. It was undoubtedly the remains of some por person who was drowned in the great freshet of last sum- mer. The coroner of Lehigh county had them de- cently interred. DEATH OF AN OLD CITIZEN.—We learn from the Tamagun <i>dutincic Journat</i> , that Coeptian had this taken fire, it is likely that the whole town would now have been in ashes. There is still a little discharge from the wound, which ap- pears as if the period of exfoliation was not yet over. The 28th of last month I drew out with the pincers another splinter of bone larger thats a pea. I continue locally the use of the injections, to facili- tate exfoliation. Instead of the fixed bandage, I have for the last three days substituted an elastic one, which the General bears very well, and which, in our case, answers better than the fixed bandage. I have for the last three days substituted an elastic one, which the General bears very well, and which, in our case, answers better than the fixed one. The rheumatism, which for some time had left him, has returned, though in a much more mild form, fix- ling light hills this fall fill lifts. Infits, infits, otherwise, hill generate the laws in the warm spring sunshine, and, on the 24th, he went out, in a boat, fishing. I hope that when the period of exfoliation is over the cure will proceed rapidly, and, if the rheumatism does not re- turn to disturb the regular walk of the patient, in about a month he will be perfectly well.—H. Alba- nees." "It is more than probable," adds the writer, "that General Garibaldi will visit England during the spring." In a letter, dated January 19, to a gentleman in London, Garibaldi's son, Ritocioti, says: "I am instructed by my father to write to you, to say that he will not be able to come to England just yet, because he can scarcely go on crutches. A trial was made yesterday, which proved. successful, papa having walked across the room several times." The importations of foreign merchandise at the port of New York, for the week ending Fobruary 25, amounted to \$1,255,509, to which add the importations of dry goods, \$466,346, and the aggregate imports for the week will foot up \$1,751,655. Against this: we exported \$4,151,750 of specie, amounting together to \$5,653,745. To this may be added some half a million dollars' worth of American securities sent abroad for sale, which would swell the export aggregate to over six millions of dollars. Making due allowance, therefore, for the fact that our importations are invoiced at their currency value, while our exports are invoiced at their currency value, there will still remain, on the trade of the week, a sub-stantial balance in favor of the port.
