THE PENNSYLVANIA HORTICULTURAL SO-CIETY .- To-morrow evening the monthly display of sylvania Horticultural Society takes place at their hall, southwest corner of Broad and Walnutstreets. Since the members of the Society have leased this new and commodious building, it has been open every Tucsday evening, and will so continue every lucasity evening, and will so commend throughout the year. The first Tuesday evening of each month is devoted to the discussion of horticul-tural topics of current interest; the second to the monthly display of fruits, flowers, vegetables, de-signs, &c.; the third to the stated business meet-ings; and the fourth and fifth to informal conversa-tional meetings; the reading of periodicals, and so-cial intercourse.

tional meetings, the reading of periodicals, and so-cial intercourse. The Pennsylvania Horticultural Society is the oldest existing horticultural society in the Uaited States, having been instituted in 1827. During the period which has since elapsed it has earolled over two thousand names on its list of contributing and States, having been instituted in 1827. During the period which has since elapsed it has carolled over two thousand names on its list of contributing and honorary members, comprising many of our most distinguished oitizens. It has held monthly and annual exhibitions and displays of horticultural products, some of which have never been equalled in this country in extent, magnificence, and patronage. It has distributed, in, premiums, over twenty, thousand dollars, to all classes of contributors, and has been the medium of introducing many new varieties, and species of plants, fruits, and vegetables, that would otherwise have remained unknown to the general public. Its large and valuable library, the most extension of its kind in this country, has been the means of disseminating a vast deal, not only of horticultural knowledge, but of information on other kindred topics of natural science. The social intercourse of its members, also, has served to diffuse a more correct taste and thorough knowledge of the art than had formerly prevailed. The discussion of horticultural subjects on one stated evening of each month is a new feature in the transactions of the society, and has been found to add much to its attractivenes and ugefulnes. The objects to be exhibited are such as ladies peculiarly excel in and spirited competition from lady amateurs. Contributors, whose means or facilities for cultivation are limited, are also provided for in the list, it being the desire of the society to offer encourse control the varied and to for encling a contribution of furtis, flowers, vegetables, or any objects of horticultural information for mains is open to all. The liberal action of the society in this freepect, and the varied and useful character of its meetings and liscussions, should induce all its contributors, whose means or facilities frequent to all, and to remere society to offer encourse of all the handsome prize offered should attract a full and spirited competition from lady amateurs. Contributors, whose means or faci

in the manufacture. MANUFACTARE OF WOOD INTO PAPER.— The manufacture of wood into printing material as at present done at the paper mills at Springville, Chester county, promises to meet with great success. The parties who are now engaged in the same, and who are the sole patentees of the process, experi-mented for over two years before their efforts met with encouragement. The wood, poplar being pre-ferred, is cut by machinery directly across the grain, into slices, half an inch thick, and thrown into a close boiler, where it is cooked, along with numer-ous chemicals, under a steam pressure of seventy pounds. This reduces it, in a couple of hours, to a pulp, resembling in color the cheapest brown sugar. A faucet being opened, the pressure of steam inside the boiler forces the pulp out into a vat, where it is rinsed by means of hose. This makes its color much lighter, being a pale ashen he. The liquid draining off is repeatedly tested, and, until it reaches a cer-tain stage of dilution, is preserved to operate on the crude wood again. The last process, previous to the ordinary operations of paper manifacture, is bleach-ing. This bings the pulp to a pure virgin white-ness, entirely differing from the brown, dirty-looking stuff at first produced. The paper made is principally of two kinds: one is called "pulp," being the pure wood paper, thick, and somewhat resembling blotting pad ; this is sold to be mixed with other material, and again manu-factured. The second variety is newspaper, con-taining 20 per cent. of hemp.

ARRIVAL OF THE MONITOR LEHIGH.— On Saturday, shortly before dark, the new monitor Lehigh, from Chester, reached this city. The trip was represented by the company of gentlemen on board as most satisfactory. Whilst the Lehigh was in the Delaware, her two guns were discharged. She takes in stores from Philadelphia. She is the last of the Ericsson steamers known as the "Monitors." She is by far the best of the iron-clads, the experience gained in constructing the others having suggested several points of improvement. Her length over all is 200 feet; mean length, 183 feet; depth of hold, 10 feet. She draws 9 feet 6 inches forward and 10 feet aft. She has been magnificently fitted up and sump-tuously furnished. When she joins her consorts on the coast, her worth will be trebly appreciable. When she came up, the band of music on board en-livened the event with a performance which was more than acceptable. ARRIVAL OF THE MONITOR LEHIGH .--

DISASTER TO THE SHIP TUSCARORA.—The ship Tuscarora, Captain Dunleyy, which arrived at this jort on Saturday from Liverpool, experienced very rough weather on the passage. The Captain reports that on the dth ult. lat. 43 deg. 40 min. Jon. 30 deg., the ship was struck by a heavy sea with such force that a spare main yard on deck, 20 inches in diameter, was broken in three pieces; it also car-ried away two boats and crushed another, washed off the galley-house, long-boat, &c., and swept over-board thirteen colored seamen, besides injuring Wesley Gaw, third mate, the boatswain, and car-penter. Mr. Gaw died on the 14th ult. The names of the seamen lost were George Townsend, Peter Gladdin, James Parker, John Lewis, Oharles May-hew, (of New Jersey); Ellis Scott, (of Massachu-setts); Parker Whitehead, (of New York); James Fanning, (of New London); James Rockett, John Robinson, (of Delaware); George Balley, Samuel Johnson, Kenry Handy, (of Baltimore.)

SOMETHING LIKE SUMMER.—Yesterday was something like summer. At least, such was the general remark. In the early morning, the sky, to be sure, was overhung with dun and dingy clouds. The atmosphere, soft, yet heavy in its breathings, united the warm and the cool just sufficiently to in-dicate that spring was "going, going," and all but "gone",-provided to night don't bring down a six-teen-foot snowdrift or a hard-hearted hall. April has become the synonym of fokleness. The poet says, "Frailty, thy name is yoman." Were the sea-mons invariably represented as females, this name would apply to April. Her laughter and her tears, her smiles and frowns, evince her variety of nature, and are in themselves the germs of summer's fecun-dity. The hours of yesterday were hours of rest and of screnity ; the city homes were clad with light, the landscapes wrapped in peace. SOMETHING LIKE SUMMER.-Yesterday
