myl3-wemāt MOURNING MILLINERY, This work embodies a comprehensive and philosophical definition and illustration of the The Gentleman. Such a work, interesting and important at any time, is doubly welcome at the present hour, when nothing can be more desirable than a clear and emphatic exposition of the character of the Gentleman, as an incarnation of the justice, love, and honor, upon which rest the hopes and welfare of the nation. In this volume the author gives a full, forcible, frank, and fervent discussion of the Gentleman as legaries in history, in society, in domestic life, and in literature; and the whole treatise, while made genially attractive by playfulness and anecote, is pervaded by an earnestness born of strong conviction and deep sympathies.
