

mail (per annum in advance) at..... ... 53 00 ····· 506 Larger Clubs than Ten will be charged at the same

The money must always accompany the order, and in no instances can these terms be deviated from, as they afford very little more than the cost of the paper. Postmasters are requested to ast as Agents for

To the getter-up of the Club of ten or twenty. and intra copy of the Paper will be given.

forces. Kirby Smith is being reinforced with some of the best troops. The wheat crop in Arkansas is being havested. Corn is twenty-five cents per bushel, and floar three dollars per hundred weight.

Preparations for Speedy Enrolment-Three Hundred Thousand Men to be Raised-Opinion of the Sceretary of War on the Money Commutation-The Question Awaiting the President's Decision.

Washington, May 15. A draft for 300,000 men will shortly be ordered by the President for the purpose of filling up the old regiments. It is not the present intention to form any new regiments campaign. Recruits sent into old regiments will be more fit for field service in thirty days than they would be in six months if put into new regiments under green officers. It will be far better for the conscripts that they be assigned to the old regiments and placed among the veterans who have experience in the routine and duties of the camp, and who understand how to avoid many things that injure the health and cause sickness. The old bronzed warrings know how to cook, wash, sleep, camp, and march to the best advantage, and can teach, this valuable information to their new our addes.

ady printed. Each State will be credited with the time for

evenue measure, and that a man to carry a musked ust be produced for every name that is drawn from he box.

We have received from Captain J. L. Jurgens, a Danish officer of considerable inventive genius, the following communication, relative to a new model for war vessels, which he has devised, and the merits of which are now being considered by the Bureau of onstruction of the Navy Department. A subject of greater importance could not be presented to the attention of the Government, and, indeed, it is well worthy the consideration of the National Academy

The inventor offers the drawing and specification to the United States Government, providing the Government will promise never to use said vessels "in a hostile manner." against the Danish Govern-ment, "unless the Danes should be the aggressors." If the United States should ever use his plan, or ary of the renefied plays to now the inventor too
