It has been the object of the FLORENCE SEWING-MACHINE COMPANY to supply a machine free from the objections attached to other first-class machines, and after the patient, untiring labor of years and a liberal expenditure of capital in securing the first mechanical talent, their efforts have been arowned with success and they are now offering to the public the MOST PEBEFEGT SEVING MACHINE IN THE WORLD. Among its many advantages over all other machines, may be mem-tioned: Ist. It makes four different stitches on one and the same machine, each stitch being perfect and allke on both sides of the fabric. 2d. Changing from one kind of stitch to another, as well as the length of the stitch, can readily be done while the machine is in motion. 3d. Changing from one kind of stitch to another, as beenty. 4dh. LETTER OF 'ME GECRETARY OF THE TREASURY TO MR. HUNTER. The Sentinel '0' gesterday publishes the following letter from Sec. "Stary Memminger to the Hon. R. M. T. Hunter up to the subject of the currency: TREASURY DEFARTMENT C. S. A., BIOBMOND, August 24, 1863. Hon. R. M. T. Hunter, Liogds, Va.: Siz: In reply to you't inquiries about the finances, I send you a condense of statement of the issue of treasury notes, and of the funding operations of the treasury notes is still within the limits of the de-preciation which I reported to Congress at the last setsion. My report then estimated the zmount of circulation which the country could probably bear at 515,000,000. The statement now made shows first the outstand-ing treasury notes, used as general currency, arount almost exactly to the etimes this amount. But, when it is considered that a very ingre portion of these notes are across the Missisepti, it will be ap-parent that in the Atlantic State Edw stimate of the scottent as renow added, which will keep-down the excess from new issues-manely: the taxeo down the scess from new issues-manely: the taxeo is notion of estimating the value of the currency. fields-from manhood, in its sternness and sacrifice This obvious, from this statement, that the popu-lar notion of estimating the value of the currency by a comparison with gold, is altogether fallacious; for, while the actual volume of currenly has only been increased threefold, its proportion to gold rates at more than double that amount. The fact is, as-you well know, that situated as we are, gold is as much a commercial commodity as platina or tin, and its price is governed by the law of demand and sup-ply. As I have already shown, in the report referred to, wheat and corn afford much more reliable stand-ards of value, when their price is not controlled by some local obstruction; and, by referring to these, it will be seen that the currency has maintained itself at the ratio which the outstanding issues indicate. You will perceive, by the statement, that, uniting all the various appliances for funding; there has been funded in bonds \$252,401.670; to which, ac-cording to estimate, there is yet to be added about \$302,000,000 more, which fare yet in the hands of the treasury officers to be funded; making, ill all, succur \$302,000,000 which rawn from the currency. This result is certainly very favorable, and shows that the measures adopted by Congress have been quite as successful as any of us had anticipated. It is somewhat remarkable that the Yaakee Govern-ment should have adopted exactly the same measure for withdrawing their circulation, and, according to a statement published in Huur's Merchands' Maga-zine for July, they have funded, in call loan and bonds, not more than \$200,000,000. These figures show that there is no reason for dis-trust as to our currency; and if, when Congress meets, you will address yourselves vigorously to measures which will restrain its further increase, we shall be fully able to maintain our cause. I would suggest to you two measures for considera-tion : One is, the export duty which I proposed; and the other is a renewal of the call loan for all treasury notes, upon the same principle with the last session. It is worth t It is obvious, from this statement, that the popu-ar notion of estimating the value of the currency -from woman's tears and sobs, and from childhood's walls and infancy's plaintive moans, there come voices of cursing and of censure upon your infamous Nor can they be hushed. Tearragemendance of the We Mission Charles I VICKSBURG, August 14, 1863.—The very sight of this city as you approach it from the north is enough to make one despair of our ever taking it by force-of arms. It rises out of the surrounding swamps and plains, a frowning mountain bristling with can-non and bayonets, and furrowed from the foot to the-summit by formidable earthworks. The daring that could plan, no leas than the endurance and skuit that could plan, no leas than the endurance and skuit that could execute this great feat, will make the army of Tennessee memorable to all future ages. I do not wonder that the rebels were so confident. They had seen, and knew the place, and I suppose, thought it strange enough that we should even dream of trying to take it. They, undoubtedly, think it stranger still that we have taken it. It is very easy to form in the imagination an idea of Vicksburg, but no such idea can come anywhere near the truth. It appears to be positively impregnable.
