It would seem that some of his more advances students, having found a most favorable opportunity to test this new philosophy, have already taken the necessary steps to practically and professionally experiment upon this new and wonderful science; I say wonderful, because, if successful, it was to open at once the most important Safes and vaults of the country to the whole burglar profession. The result of these, experiments will be shown by the following statements, which appears I The Press, July 14: also, other city papers. LILIE'S CHILLED HON'S REPEA BODD BUT UNSUGRAPHINE SATINGS FUND' has one of Billia's No. 2 Bank Safes, purchased of M. C. Sadler, Agent, in this city, some eighteen months since. The Safe was left in the office, on Market street above Broad, on Saturday afternoon, all right. On Sunday, at 12 P. M., the policeman tried the front door of the office, and found it unlooked. On examining the office he found the burglars had been at work at the Safe, but had left with their apparetus. There was a mortice made in the floor in front of the Safe for the support of the drill, and a number of holes further back for an apparatus to create a pressure, and everything done apparently to make the drilling perfect. A hole was found drilled, or ground, about half lan inch into the door, over the lock, in the manner so publicly described in sundry newspaper advertisements, and it would seem this was as far as they could go, as the iron became harder. Next the lock contre was thoroughly tried, but could not be driven in. Next the lock open the supplements of the driven in and placed behind the door hinges to pry off the door. This sedge was tried, and the knob some taken of, and the knob some taken of, and the knob some taken of, and the school-spindles were thoroughly tried, and they could not be driven in. St.	of Little's Safes can be drilled in the same way. It would seem that some of his more advances students, having found a most favorable opportunity to test this new philosophy, have already taken the necessary steps to practically and professionally experiment upon this new and wonderful science; I say wonderful, because, if successful, it was to open at once the most important Safes and vaults of the country to the whole burglar profession. The result of these, experiments will be shown by the following statements, which appears I The Press, July 14: also, other city papers. LILIE'S CHILLED HON'S REPEA BODD BUT UNSUGRAPHINE SATINGS FUND' has one of Billia's No. 2 Bank Safes, purchased of M. C. Sadler, Agent, in this city, some eighteen months since. The Safe was left in the office, on Market street above Broad, on Saturday afternoon, all right. On Sunday, at 12 P. M., the policeman tried the front door of the office, and found it unlooked. On examining the office he found the burglars had been at work at the Safe, but had left with their apparetus. There was a mortice made in the floor in front of the Safe for the support of the drill, and a number of holes further back for an apparatus to create a pressure, and everything done apparently to make the drilling perfect. A hole was found drilled, or ground, about half lan inch into the door, over the lock, in the manner so publicly described in sundry newspaper advertisements, and it would seem this was as far as they could go, as the iron became harder. Next the lock contre was thoroughly tried, but could not be driven in. Next the lock open the supplements of the driven in and placed behind the door hinges to pry off the door. This sedge was tried, and the knob some taken of, and the knob some taken of, and the knob some taken of, and the school-spindles were thoroughly tried, and they could not be driven in.
