Address, with orders. T. B. PETERSON & BROTHERS,

TO THE DISEASED. Nearly five years ago Professor C. H. BOLLES located aimself in the city of Philadelphia, at No. 1220 WAL-UT Street, and announced his great discovery in the pentic application of Magnetism, Galvanism, and ther modifications of Electricity for the cure of the most obstinate, acute, and chronic diseases. In appounding to the mublic a discovery so intimetals unected with the well-being of our race, it may be eemed proper to make a few prefatory remarks to prepare the mind of the reader for the reception of evinces and facts too incredible for belief. This discovery is the result of more than ten years hard and scientific investigations. It develops not only

PHYSICAL ILLS OF MAN.

The object of the following advertisement is to set forth

a reliable system for the diagnosis of disease, but the only efficient and reliable means of cure. Its great superiority over all other systems for the cure of disase has been practically tested for more than ten years, and for five years in Philadelphia, where twelve thousand invalids have been treated, suffering from almost tions of our country, who, after treatment by the most eminent medical men in Philadelphia, Boston, New York, and other cities, had been given up as incueen effected.

Many of the most obstinate of the above cases treated have been warranted by special contract, and not a failure has been made in any warranted cage. As indubitable evidence of the foregoing statement, we have adduced in the following advertisement testimonials rom citizens of Philadelphia, who had suffered from a complication of diseases for four, ten, and even thirty years, and had availed themselves of the best medical skill in this and other cities, and were given up as inmrable, but afterwards were fully restored to health y a few applications of Electricity.

Such an array of evidence as will hereafter appear in this advertisement is not merely to show that Professor BOLLES has made an important discovery in the application of Electricity as a therapentic agent, but emphatically to show that nearly all diseases which have been considered incurable in all past ages, and are so considered at the present time by the most eminent nedical men, can be speedily and permanently cured by the different modifications of Electricity, when applied in harmony with his discovery of the action of Electricity through the cerebro-spinal axis. The London Times selects this extraordinary work for special review, in consequence of "the closeness with which nature has been adhered to," and the true genius which it displays. The notice extends over three and a half of its broad columns, and, after commenting with some severity on the extravagances of the sensation novels of the day, the reviewer remarks.

"The close study of the human character, so indispensable to a good work of fiction, has given way before the random style of modern sensation writing. In dissecting the work, the reviewer finds, in one part, a "fine undercurrent of satire—true satire—masterly in its covert approaches, quiet and unobtrusive in its application, but caustic to the core." Another part, he considers to be "full of vigor and facility of composition."
