J. W. BRADLEY'S

PATENTED DUPLEX ELLIPTIC STEEL SPRING SKIETS.

This invention consists of Duplex (or two) Elliptic Steel Springs, ingeniously braided tightly and firmly together, edge to edge, making the toughest, most clastic, fexible, and durable spring ever used, enabling the wearer, in consequence of its great elasticity and flexibleness, to place and fold the skirt when in use as easily and with the same convenience as a silk or muslin dress. It entirely obviates and silences the only objections to hoop shirts, viz: the annovance to the wearer as well as the public, especially in crowded assembles, railroad cars, church pews, or in any srowded place, from the difficulty of contracting them to occupy ing a small space. This entirely removes the difficulty, while giving the skirt the usual full and symmetrical form, and is the lightest and most stylish and graceted reas. A lady having enjoyed the pleasure, comfort, and great convenience of wearing the Duplox Elliptic Spring Skirt for a single day, will never afterward willingly dispense with the use of them. They are the best quality in every part, and by far the lightest, most durable, comfortable, and economical skirt made. Marchante will be supplied as above, and ladies in most first class retail stores in this city and throughout the different States.
