THE DUPLEX ELLIPTIC (OR DOUBLE) STEEL SPRING. I. I. & J. O. WEST, No. 97 CHAMBERS STREET, NEW YORK, Are the owners of the patent and exclusive manufac-turers of this, turers of this,

J. W. BRADLEY'S

PATENTED DUPLEM ELLIPTIC STEEL SPRINGSKIRTS. SKIRTS.

This invention consists of Duplex (or two) Elliptic Steel Springs, ingeniously braided tightly and firmly together, edge to edge, making the toughest, most electic, flexible, and durable spring ever used, enabling the wearer, in consequence of its great clasticity and flexibility, to place and fold the skirt when in use ascasily and with the same convenience as a silk or muslin dress. It entirely obviates and silences the only objection to hoop kints, viz: the abnovance to the wearer as well as the public, especially in crowded assemblies, carriages, rairoad cars, church pews, or in any crowded place, from the difficulty of contracting them to occupying a small space. This entirely removes the difficulty, while giving the skirt the usual full and symmetrical form, and is the lightest and most stylish and graceful appearance for the street, opera, promenade, or house dress. A lady having enjoyed the pleasure, comfort, and great convenience of wearing the Duplex Elliptic Spring Skirt for a single day, will never afterward willingly dispense with the use of them. They are the best quality in every part, and by far the lightest, most durable, comfortable, and economical skirt made. Merchants will be supplied as a bove, and ladies in most first-class retail stores in this city and throughout the different States.

DUBLE ELLIPTIC SPRING SKIRTS vernment securities or in notes or bonds payable in Go-Convertible into a Six per cent. 5-20 In addition to the very liberal interest on the notes Inquire for the DOUBLE ELLIPTIC SPRING SKIRTS. BRADLEY'S DUPLEX ELLIPTIC D. EKIRT.
