J: W. BRADLEY'S

PATENTED DIPPEX ELLIPTIC STEEL SPRING

SKIRTS.

This invention consists of Duplex (or two) Elliptic Steel Springs, ingeniously braided tightly and firmly together, edge to edge, making the toughest, most elastic, flexible, and durable spring eyer used, enabling the wearer, in consequence of its great elasticity and flexibility, to place and fold the skirt when in use as saily and with the same convenience as a silk or muslin dress. It entirely obviates and silences the only objection to hoop skirts, viz: the anneyance to the wearer as well as the public, especially in crowded assemblies, carriages, railroad cars, church pews, or in any crowded place, from the difficulty of contracting them to occupying a small space. This entirely removes the difficulty, while giving the skirt the usual full and symmetrical form, and is the lightest and most stylish and graceful appearance for the street, opera, promenade, or house dress. A lady having enjoyed the pleasure, comfort, and great convenience of wearing the Duplex Elliptic Spring Skirt for a single day, will never afterward willingly dispense with the use of them. They are the best quality in every part, and by far the lightest, most durable, comfortable, and economical skirt made. Merchants will be supplied as above, and ladies in most first-class retail stores in this city and throughout the DUBLE ELLEPTIC SPRING SKIRTS.
