STILL ANOTHER REASON.-There have been a number of cogent reasons given why the Florence Sewing Machine, sold at No. 630 Chestnut street, is preserable to all others in use. Another is—and one that cannot be too thoughfully considered by purchasers—that it is so simple that almost a single showing makes an efficient operator. Office, 28 MERCHANTS' EXCHANGE, Philadelphia, The District selected by this Company is one of great interest, and is only partially developed, but where developed the results are very gratifying. The wells at Burning Springs and Petroleum are producing largely, while those at Horse Neck and Campbell's Run (where our lands are situated) show that this is a great oil-producing district, being in close proximity to the following wells now producing largely, viz: The "Greer Well." on Horse Neck, produces 100 bearels per day, and increasing. The last great well in this neighborhood is on Kawson's Run, a feeder of Horse Neck, owned by Tack & Brother, of Philadelphia, and struck about three weeks ago. It flowed about \$30 barrels of oil in a single day. Its average has been, perhaps, 220 barrels a day. It is a shallow well 200 feet deep. Near this, Messrs. Tack & Brother have a well 280 feet deep, which yields from 26 to 50 barrels of oil daily. The territory secured to this Company has been selected with great care, having called to our aid parties well known in the oil regions, besides having the opinion of a celebrated geologist from our own city. The lands purchased by this Company lie in Wood and Pleasant counties, in West Virginia, at Horse Neck and Campbell's Run. five miles from the Ohio river by a good wagon road. Professor Thomas in his report says: "The borings at Horse Neck have developed the fact that in this region there are six formations of oil, each of which occars at different depths, and that it belongs to an overlying formation of the Pennsylvania region." At Horse Neck we have the following: 1. One-half interest in a lease of seventeen years in a tract of one acre, subject to one-eighth royalty, on which we have one well sunk 325 feet, with a twelvehore power engine tank, tubes, boring utensils, &c., and from which we have one well sunk 325 feet, and oil in the well 30 feet deep. We do not say that a hole cannot be got through chilled iron, but we do say it is more difficult and takes longer to grind a hole through chilled iron than any other metal now in use. We say further, that there never has been a two-inch Bank Safe robbed made under Lillie's patent. At the same time we admit that the 1½ inch Mercantile Safe may be ground through, giving scientific burglars thirty to thirty-six hours to do it. We say, also, that two hours is an abundance of time to get into the best common Bank Safe made on the principle of Exans & Watson's, with plates riveted together; that the outer and inner doors can be dissected and taken apart in less time than that even.

We will say further, that we will furnish a duplicate of the Safe opened at Miliford, if any responsible man, who is 'a gentleman,' will furnish one of Evans & Watson's best Bank Safes now in use, even the one furnished the Miliford Bank; and we will put up any respectable sum against an equal amount, that two men shall open the Evans & Watson Safe soner, and in a way practical for the burglar, than any two men can crind's hole through Lillie's Safe in front of the lock.
