The cach of these fine of the season of the GEN. SCOTT'S AUTOBIOGRAPHY! The property of the Company consists of 1st. A tract of 100 acres in fee simple, situated in Pleasant county, West Virginia, upon Bawson's Run, near the celebrated "Tack" wells. Upon this track there is a new engine just arrived, with which it is intended to proseente the development of the property with vigor. It is within one mile of Horse Neek, which is conceded to be in the heart of the oil territory, new wells being struck nearly every week. It is eltuated upon the great upheaval, now proven to be the best indication of oil territory in that region. Horse Neek, Burning Spring, and the oil territory in Ohio, are all upon the upheaval. It is a well-proven fact that it is pecessary to strike a "fissure" in the rock in order to obtain a paying well, although in passing through the rock a show of oil may be obtained. It is this fact which makes a volcanic upheaval of importance, as it cuases many fissures or breaks in the strata.

COAL COMPANY PATENTED DUPLEX ELLIPTIC STEEL SPRING SKIETS.

This invention consists of Duplex (or two) Elliptic Steel Springs, ingeniously braided tightly and firmly together, edge to edge, making the toughest, most elastic, flexible, and durable spring ever used, enabling the wearer, in consequence of its great elasticity and alexibility, to place and fold the skirt when in use as easily and with the same convenience as a silk or muslin dress. It entirely obviates and silences the only objection to hoop skirts, viz: the annoyance to the wearer as well as the public especially in crowded assemblies, carriages, railroad ears, church pews, or in any crowded place, from the difficulty of contracting them to occupy up a small epace. This entirely removes the difficulty, while giving the skirt the usual full and symmetrical form, and is the lightest and most stylish and graceful appearance for the street, opera, promenade, or house dress. A lady having enjoyed the pleasure, comfort, and great convenience of wearing the Duplex Elliptic Spring Skirt for a single day, will never alterward willingly dispense with the use of them. They are the best quality in every part, and by far the lightest, most durable, comfortable, and economical skirt made. Merchants will be supplied as above, and ledies in most different States. is acknowledged to be one of the best-producing farms in the whole region.

The following remarks are taken from the financial columns of the Philadelphia Press of Nov. 15, 1864:

"The excitement in oil stocks is still increasing, and the price of some of the producing companies has materially advanced. We notice the companies situated on the Hyde and Egbert Farm, which is considered one of the best on Oil. Creek, having rapidly advanced within the last few days. This is-owing to some large wells having been lately struck on this property, one flowing about a thousand barrels per day. And one flowing two hundred barrels per day. The entire yield of this farm is now between fitteen hundred and two thousand barrels per day, and some of the companies located on the Maple Shade, 'Hyde Farm,' Rock,' Egbert,' and 'Miceval,' have had their incomes doubled by the above new wells going down on this farm, on one of which the largest oil crevice yet found is said to have been struck. The following extract is from an editorial of the Public Ledger, Novomber 19, 1864:

"One of the most remarkable features about the present oil excitement is that, while the territory known to posses oil its so rapidly extending in area, the older settled portions, where most oil has been drawn off are daily raising in price. The price, too, of the oil is higher than ever, being eleven dollars and a half per tarrel at the wells now. Yet, all around oil Creek new axess have been added of far greater extent than those before known. The whole of Cherry Run may be said to bave come into the market since the beginning of the year, and is now centifiered the most valuable territory pay where to be found. Wells are supposed never to fail on it."

The Company are now receiving, from the producing interests, \$\textit{Riy}\$, four (64) barrels of oil daily, which will enable them to pay a handsome and prompt dividend on its capital; also, an interest in ciphters wells in various stages of completion.
