THE BOUNTY BILL.

Immediately after the calling of the roll Mr.
BRIGHTLY (O.) said that, to his great regret, he
was absent at the last meeting of Councils, when
the bounty bill was brought up for consideration.
It was not passed, in consequence of the conduct of
several members of the Opposition, refusing to vote
upon the bill, and therefore left the chamber without a quorum. Mr. Brightly said that, being in
favor of the bill, he would therefore move a suspension of the rules in order that this bill might be
considered. The suspension of the rules was
agreed to.

THE COAL CONTRACT OF THE GAS TRUSTESS.

The joint special committee, to whom was referred the message of the Mayor relative to a proposed contract by the trustees, of the Philadelphia Gas Works for the purchase of 4,000 tons of coal, at \$11 per ton, for the use of the works after July, reported that they find, from the evidence taken before them, that there has been considerable misapprehension in regard to the real terms of the proposed contract. The committee find that the trustees have generally advertised for proposals for supplying coal, but till there have been many exceptions to this practice. The chief engineer was authorized at any time, whenever he found a cargo of coal offered much below the market rates, to purchase at his own discretion, and of course without previous advertisement, as high as 10,000 tons at a time. In 1861 the trustees also, without advertisement, extended two very large contracts from one year tythree years, for the annual supply of 50,000 tons. These contracts were with the Westmoreland Coal Company and the Penn Gas Company, and from the circumstances under which this extension was granted, the committee are of opinion that the trustees not only acted in the matter in the most perfect good faith, but their action was sagacious and beneficial to the trust.

It must be borne in mind in examining this

which for individuals would be enormous, but for the much greater needs of the Philadelphia Cas Works comparatively insignificant. The delivery of coal by Mr. Hayes was to commence on the expiration of the present contracts. His contract is also at the same price per ton as that now being paid to the Westmoreland and Penn Gas Coal Companies, which, at the present rates for freights and wages, is about \$11 per ton; but the coal to be furnished by Mr. Hayes is to be much superior in gasproducing qualities.

It was also shown that the present market rates are from twelve to fifteen dollars per ton; that the kind of coal required by the works has not been sold in this city since last July at a less price than \$12 per ton. There was not a particle of testimony inculpating the trustees or any member of the board in this contract or any other contract.

The committee attach to their report a series of resolutions declaring that the Board of Trustees, in making the contract with William B. Hayes, Esq., acted in good faith to the city, and that the gas trust has been managed by them in the most commendable manner, but that in the opinion of Councils where large contracts for furnishing coal are to be awarded proposals should be advertised for and received. The report was accepted and the resolutions adopted.

Mr. Ginnodo (U.) objected to the Item making an appropriation of \$10,000 to the repair of the streets occupied by city railway companies, and said that the Chief of the Highway Department had repeatedly told him that the passenger railway companies were obliged to keep the streets upon which their tracks were laid in order, and now the Chief has the effrontery to ask us for money to repair these very streets.

Mr. HOPODOM (U.) Said that unless some appropriation was made the Chief would be powerless in the matter.

Mr. Ginnodo (U.) further opposed the bill He

Mr. Ginnodo (U.) further opposed the bill. He said that an act of Assembly made it obligatory upon the railroad companies to keep the streets on which they run in repair, and that if they did not do it the Unief Commissioner should report them to Councils.

Councils.

Several gentlemen explained that this appropriation was merely to enable the Chief Commissioner to make what repairs were necessary upon these streets. Suit could then be immediately brought against the railway companies, and the money expended recovered.

After further discussion the consideration of the bill was postponed.
