command was routed, most of them figing to the woods, leaving sity men and horses, and a number of dead, in our hands. We captured five wagons here, with teams complete (all they had), with all the stores and private effects of the brigade head-quarters, besides official papers and a robal mail. We released eight Union prisoners and eighty con-scripts, who immediately soatsread; thence we marched, without molestation, through Monut Hope to the vicinity of Leighton, having made 182 miles in fity days and nights. From Leighton we came to Decatur, having been absent eight days (being the advance of the main body), and having marched during that period 265 miles. In the whole expedition we loss but three men, one killed and two wounded; captured two pieces of artillery complete, with horses and equipage; 220 prisoners, including one colonel, two captains, and eight lisutenants; destroyed nearly 300 pontoons and wagons, 800 stand of rarms; and captured 800 horses and 1,200 mules. The movement was spleididly managed, and its success is due actirely to the energy and generalship of Ool. Palmer, and to the valor and enthusiasm of those under his command. The rebel gunboats run up and shell the steamer occasionally, when our artillerisis open upon them. Both of them have been struck several times, and any attempt on their part to run up to Wilnington when the fort fails will be resisted. We have ten 30-pounder rifles in our batteries. Our storming party, three thousand strong, are now in the woods, within a mile of Fort Fisher. They report that the fort was reinforced last night by eight hundred men from Fort Gaewell. The sat-lors and marines from the fiset, two thousand strong, are also to join in the assault, and endeavor to scale the sea will of the fort. They are in high gles, this morning, and buckling on their armor with the alarity of veterans. Powhatan, and Colorado took position in line, and joined in the bombardments, which may be regarded as the grand final attempt to take the fort. 10.16 A. to say that, this time, at least, we "snostantially injured the fort. as a defensive work." General Terry had only a few more troops than we had, on the last occasion—when the enemy had only 150 men in the works. This time the works were fully manned, and contained about 800 men at the time of the assault. It is a matter of deep regret to me to see my gallant officers and men so out up; but I was unwilling to let the troops undertake the capture of the works without the navy sharing with them the peril all were and off meeting our brothers-in-arms in the work had the sailors been properly. supported. SUE MUNDY'S GUERILLAS. - We learn that Sue Mundy and her (or his) guerillas have adopted a new uniform recently. Sue wears a red mannel suit with a red cap, adorned with a long black reather fastened to its front, with a \$100 greenback bill pinned on with 'a magnificent dismond pin. The men are also dressed in red fiannel, with a black stripe two inches wide down their pants, but their caps unadorned with 'sathers'. All of them are "fush" with greenbacks, diamond pins and rings, and seem to "take things easy" in this world. Billy Magrader's men are about to adopt a similar style of dress.

There are evidently secrets in their style of housekceping which we have never mas-tered. So the eminent lawyer and financier, who is Gen. McClellan's next friend, and is popularly esteemed a millionaire, has only, it seems, \$10 000 a year, instead of the \$50,000 to \$80,000 which has been laid to his charge, while he iswyer who has proba-bly the largest admiralty practice in our city charges his elients so moderately that is income is barely \$2,514,per annum. The oil stocks were moderately active, and for Walnut Island there was considerable speculative inquiry, there being no less than 5,300 abares disposed of after 3% o'elock. The coal and canal stocks were very dull. There was a fair inquiry for bank ahares at last prices. There is much excitement here among the new oil companies. The panic, or as some of our friends would say, the "oil fever," is inling, and men of capital are

awakening to the necessity of developing the petroleum interest. The day when a few men around an office table can arrange an ell company and put it in the inarket to be gobbled up by a guilible public, is past. The people who have a little money to invest look eagerly and closely at the nature of every stock that is presented to them. It is true, we have no positive erdicence that the holders of our bond's in your country are among these who have given aid or countenance to our enemy, but it is also true that all the public expres-lions of sympathy in your country for our nation in this, its hour of trial, have come, with a few noble exceptions, from that class in your midst who are unable, from their position in life, to own public scurities of any bind. NOW THE MILITARY FOUGHT FOR THE FORT, AND HOW THEY SUCCEEDED.

The instincts of the people, as indicated in various ways, respecting the actual state of public affairs, are almost uniformly accurate, and often past compre-hension to the "statesmen," so-called. The popular songs, as they have ruled from time to. time during the progress of the war, have been of great signifi-cance. At the breaking out of the war everybody sang.

Popular Instinct. The World indulges in the annexed little essay on popular instinct, as expressed in the songs of the

cance: At the breaking out of the war everybody sang. "John Brown's body lies monidering in the grave, As we go marching on." After Pope's disasters, and the doubtful year that followed, when the calls for men were heavy, and the battles murderous and indecisive, we heard "When this orael war is over." After the fall of Vicksburg and the battle of Get-tysburg, the importance of those achievements were celebrated in "Babylon is fallen" The universal hope and desire for an early peace; i the belief that the time has come when it can be honorably made, permitting our brave soldiers to be withdrawn from the field, new find utterance to the joyous potes of

ers of the Government, but not yet negotiated. The bonds were sent abroad for a contingency in our diplo-macy, which did not occur, a year or fifteen months ago. Meanwhile the limit of the old 5-20 loan was filled up on this side. The bill also proposes to refund about \$00,000 for preliminary deposits made with Se-sretary Gobb in October, 1850, on five per cent. loan of 1571. Certain takers in New York declined to take np ite last instalment of the loan on account of our first se-cession troubles in November and December of that year. The 10 do loan declined at the Board to 103%, the 'Bla to 111%. The 5-208, however, were firm, and for certifi-
