The Shakers.

The Shares A VISIT TO THE COMMUNIT IN MATHID, CONNECT-CUT-BHARM WORK AND RELIGION. (For the Springdol Republica.) Shakerville in Enfeld, Conn., is a quiet farming formunity of four families or households. These folgens: 24 men, 120 Women, and 36 children. Farm-ing is their general business, and the preparatives. They hold about 8,000 acres of land here in solid body, or 16% acres on an average each. They keep practical houses, workshops, and barns, and, barring connubial biles, are doublies contanted - and happy. Through the courtery of one of their leaders, we have looked in upon their homes, partaken of their satis and gathered, as we trust, some itoms of gene-ration and the courtery of one of their leaders, we have looked in upon their homes, partaken of their satis and gathered, as we trust, some itoms of gene-ration the courtery of one of their leaders, we have looked in upon their homes, partaken of their satis, and gathered, as we trust, some itoms of gene-ation to century's growth, originating from the Cha-kers in Manchester, England. They first came to the sentury's growth, originating from they deno-ties outring in 174, numeering ten persons, and set-tif denial is their cardinal virtue. They bolieve in Gods, Christs, beavens and heils duplicated. They are non-resistants, participate in no earthly go yersen, do on the mery, iver fugality and simply and onsider idlences simul. These who differ from they mether motions in worship, which exercise tother so in from Lebanon, N. in 1854 It is 40 by 90 feet in size, with a shigh and capacious manure cellar under the whole, and what is remarkable; the oulding is trussed up, so that in the cellar there is neither pillar nor post. The building stands on the side of a hill, the main drive-way is in the attic, and the bay is pitched down into bays on either side. Under the barn floor, and con-mecting with it by sontiles, is the feeding floor, and some eight feet lower are the catilo, while under all is a cellar at least twelve feet in height. Here are manufactured some 500 loads of, unaure annually. The walls of the cellar are of stone, quartied under the building.

The walls of the cellar are of stone, quarted under the building. ...The Shakars pride themselves on their stock, and justly. They "igst the best" and breed only from thoroughbred makes. They feed well, but carefully avoid waste. The first thing in the morning the cows have one or two fodderings of hay, then roots sprinkled with dry meal, then they are watered, them have hay and stocks, then roots and meal as before, and lastly hay. Their young stock is kept in shedded yards, and is divided according to age and quality. They all have wide mangers and gene-rally a nack behind, so that every spire of hay is saved.

and quality. They all nave when mangers and gene-rally a rack behind, so that every spire of hay is saved. Their horses are generally very good. We saw a fire bay breeding mare and four of her coits of ra-rious ages. Three were "Ashlands," and all sor-rel, and the youngest a bay Hamiltonian fully. The Shakers eat no pork, but raise a few hogs for the Gentiles. The Shakers are posted on vegetable raising. We learned that imported radish seed was considered best; also, home grown red and yellow cnion seed. Two-thirds of the crop will be sculitons if foreign seed is used. The onlon-maggot began to operate in Vermont and New Hampsaire 10 or 15 years ago, and has gradually extended to this lo-cality. Their remedy, which is partially effoctive, is half a barrel of saltpetre, one barrel of ashes, and one barrel of phosphate mixed per sore, sown upon the young orop. They sow onlone in drills 14 inches apart, with French fruits bagas between, and use four pound of onion seed to its sore. The remedy for the stripde squash bug is birch charooal dust. A better reimedy, suich by a gentleman of much experience in the agriculturs! trade in this oity, is alr-alacked line and yellow snuff in equal parts. Put it into a size and ray it gently when the dew is on the plant, and the bugs will leave instanter or sneeze to death.

is on the plant, and the bugs will is ve instanter or If is pleasant to have Shaker friends, to meet them on the street or at their homes, to see the meat, plain attire of the Shakers; to sit in their high backed chairs and carpetless rooms and enjoy their hospitality; but one cannot resist the convic-tion that this is not the best way to live. We be-lieve in families all our own. Still they point to the fact that they are the only people in the world who have maintained for 70 years a system of living, one of the fundamental principles of which is a com-munity of property. Who ever saw a Shaker drink, or smoke, or lie, or swear, or steal ? There is so much in their favor.

Several serious acodedats having taken place, by reason of the immoderate speed at which some of the steam fire engines are driven through the streets of our city, the special attention of the various steam fire companies is called thereto, as with then it is streets in future, by the instant dismissal of the engineer who permits, or the driver who performs an act on-trary to law, thus perilling, not only their own, but putting in jeopardy the lives and links of our fellow ditizers ; and as several applications have been made to the Board for relief from juries received whilst proceeding to fires, the front, up on fully discussing the matter, deem it but just and proper on this cocasion to say, that so far hs they are concerned, for the future, by fras hay the most full and conclusive evidence that thay attems were mot hor relief as such they must have the most full and conclusive evidence that the steamers were not hend they must have

astonded in their stempts to investigate the cause. Upon one occasion, at his request, a number of ouriously-inclined gentlemen watched him for forty-two days and nights consecutively, in order, if pos-sible, to arrive at the cause of the wonderful phe-nomenon. These gentlemen took turns with leach other in the progress of watching, so that if he should chance to sleep it would be observed. Some of the watchers became drowsy, and it was as much as be could do to awaken them. This singular man was sent to Fhiladelphis by order of the field surgeon. He was admitted into the hospital at Chestaut Hill on the 17th of Novem-ber last, suffering from chronic diarrhores and rheu-matism. He has nearly recovered from his physi-cal disability ihis appentie is good, but yet he does not sleep. He retires to bed, the same as other sol-diers, but he cannot sleep. He simply receives phy-sical rest. This brief narrative of a most wonderful phenomenon may seem fabulous, but the reader is assured that it is the truth.

OITT FATHERS TO BE INDICTED... In the course of the proceedings of the courts a fife and drum completely prevented the hearing of a word that was said. Mr. Mann told the jury to be patient, as the noise of a drum or the ratiling of a carl prevented the hearing of any witness in this room. During the past fire years it had been proposed to get a different room to hold a court, but now it was contemplated to indic (tiry Coun-cille for not furnishing a proper room. If anything but justice was being transacted in this room it would be a mere farce to attempt business, but being justice, it was a holy thing. If 60 for 60 Councilmen were brought in and convicted, perhaps a better room might be far-nished. phenomenon may seem houlous, but the reader is assured that it is the truth. STATE LUNATIC HOSPITAL. The annual report of the trustees and superin-tendent of the State Lunatic Hospital has been presented. It sets out that since the opening of the hospital on the first day of October, 1851, nearly 1,850 persons have participated in its benefits. Of this number 360 have been discharged, "restored," capable of again entering into the business, dis-charging the duties and partaking of the enjoyments of life. Between 420 and 430 have been improved, and their condition greatly ameliorated. On the first of January, 1864, the number of patients in the hospital was 231-wiz: 148 males, and 133 females. Received during the year 135 patients-wiz: 77 males and 58 females. Discharged do., 135 patients, 74 males and 61 females. Died do.; 29 patients, 74 males and 61 females. Died do.; 29 patients, 74 males and 61 females. Died do.; 29 patients, 74 males and 61 females. Died na 130 females. The management of the garden and farm has been satisfactory. The former not only supplies an soun-dance and variety of excellent vegetables, but is a source of amusement to some of the patients, who find pleasant and soothing occupation there. The farm also gives to them agreeable and invigorating employment. The grounds, under the judicious management of Peter Schillinger was convicted of stealing some tools valued at \$12. The swidence was that the things ward taken from a place where he worked. Bentenced to sig months in the county prison Adjourned.

MAINTAINING A NUISANCE. Chas. A. Anderson, John MoDevitt, and John Philips were arraigned yesterday on the charge of maintaining a nuisance. These men, with others, were in the habit of congregating in front of the building occupied by P. S. Pelenson & Co., thereby exceedingly annoying the firm and grievonsily interfering with their business. Most of the crowd were common Jaws, speculating in gold in a small way, as is verily believed. Upon complaint made to Mayor Henry a warrant was issued, and yes-terday effect plate took three of the party lato custoff. They were bound over in the sum of \$300 each to be of future good behavior. CONCEALED DRADLY WEAPONS. A soldier, giving the name of Jeune Kenneble, was arraigned yesterday on the charge of carrying con-cealed deadly weapons. The prisener made his appear-ance on the stretes on Monday night, and discharged the weapon wanoly in the street. It seems to be a common habit of soldiers who obtain heaves of absence at the hospitals to take a strole about the city, to early

employment. The grounds, under the judicious management of the superintendent, are yearly becoming more beau-tiful and attractive, and afford delightful walks for

the patients. Unceasing efforts are made to afford them suita-ble recreation and exercise. They have frequent opportunities to ride, walk, &c. They enjoy the ten-pin alley, the gymnasium, and other inno-cent and healthful sports and pastimes. Those who are disposed to read have access to the library. Many newspapers, and a few other periodicals, are

COLORED PEOPLE IN THE CARS.

COLORED PROPLE IN THE CARS. The resolution passed by the Fifth and Sixth-street Rassenger Hailway Company allowing color-ed people to ride in the cars, on said railway; has been repealed, for reasons set forth in an official f advertisement in another part of this day's Press. A resolution was also adopted appropriating if every fith car to the use of colored people. Whe-ther white people may ride in such car is not stated in the resolution. Some of the companies have adopted the plan in use in other cities, that "color-is made in conspicious lettering on the sides of the Gar. While colored persons are admitted, the quee-tion is left open for white persons to get in or stay out. The appropriation of a car to the exclusive use of colored people essentially prevents white folks from riding in it, and might result at times in personal collision. SNOW, RAIN, AND FRESHET.

A very heavy snow storm prevailed during yester-day, and shortly after nightfall it was succeeded by a drenching northeast rain storm, thus introduc-ing the preliminaries to heavy freshets in the Dela-ware, Schuylkill, and tributary streams. FATAL ACCIDENT.

A man, named Richard Bayne, residing at Twen-ty-first and Wood streets, fell from a cart which he was driving, yesterday, and was instantly killed. The wheel passed over his neck.
