ANOTHER DASH BY THE ERBEL BAMS.
Deserters who came into the Army of the Jame terday report, but on no better authority than or, however, that the rebel rams are shortly to make another dash down the river. The damages they sustained in their last sally have all been repaired. The report seems probable for two reasons. In the first place, the continuous rains of the past fortnight have swellen the James to an unprecedented height; and it is now navigable in places where herebyfore many a vessel would ground. It will be recollected that the cause of the failure of the last naval fortier of the enemy was not the vulnerable. lity of their armor plating, nor any dread of our bat-teries on land or water; but solely the circumstance of getting aground in shoal water. The James river, it is thought, is higher to day than it was on that occasion, and if the rams hesitate to come forth a second time, it will only be beca dread an encounter with our iron-clad fleet. But again, it is to be remembered, that this is most likely the last chance they will have to gain distinction. When our fleet moves up the river, in co-operation with the army, the rame will be "bagged!" will be more heroic and historically comantic for their captains to invite an adverse fortune, when a prospect of evading it no longer exists.

The 8d Division of the 5th Corps, Gen. Crawford olsion that only witerans can display, and the line presented as fine in appearance as could be wished. The muddy condition of the ground, however, was unfavorable for much an occasion. Gens. Meade, Warren, and Crastford, and other prominent officers, were present, and expressed themselves please with the result.

At the instance of a gentleman of New York, who has devoted much attention to the subject of sword exercise, it is in edutemplation to hold a grand national sword formament at the headquarters of this army at an early day, for the purpose of deciding who is the best swordsman in the armies of the United States. One competitor from each military department will be delegated to attend. A purse of \$1,000 is now eing raised for the purpose of bestowing prizes on the winning parties. The first premium for the champion swords man will be a sword worth \$250. The second will be a purse of \$300, and the third a purse of \$200. The affair promises to be very interdelayed by the rin, which fell in torrents all yesterday, and is still falling this morning.

PETROLEUM NEWS THE CAMERON.

The excitement in stocks continues. During last veek the discovery of a well flowing two hundred barrels created a great excitement in the Cameren

were subscribed. There is a statement from reliale authority that the books of this company will ologe in a few days. The directors have entered upon the work of developing their property, and already over thirty wells are going down in the that the Cameron will be one of the best companie SLIPPERY BOOK. The Pittsburg Commercial has the following infor-

tion in reference to the newly discovered region macon in reservice to the newly discovered region on Slippery Rock Creek:

From every-quarter we hear of the greatest activity in the oil regions, and the confidence of those engaged in the development of the lands in their eventual success: is strong. Our correspondence brings us intelligence of new strikes on Slippery Rock, in Lawrence county, and on the Allegneny, in the neighborhood of Franklin. We have conflicting accounts of the yield of the Campbell Well, on Slippery Rock, formerly known as the Smith & Collins Well, some giving the daily yield at one hundred barrels. A specimen of the oil from this well has been shown us. It is a very fine green-colored inducting oil, of about thirty-five gravity.

Intelligence has been reserved that the Slippery Rock Well pumped yesterday two hundred barrels of oil and is gaining. Another big well has just been struck on Muddy Creek, a tributary of Slippery Rock, and the Olark Company have struck a fine show of oil handy to the town of Wirtemberg. The excitement is great on the Connequencesing Creek, it being a continuation of Slippery Rock, and many oil men think it is more favorable for oil than Slippery Rock. All the lands in this region are changing hands rapidly.

TYLER COUNTY.

A correspondent of the Pittsburg Commercial on Slippery Rock Creek : :

A correspondent of the Pittsburg Commercial writes the following in reference to Tyler county, West Virginia. This information will be of great west virginis. This information will be by great, interest, as we believe there is but one company in the Philadelphia market, "The Standing Stone," that has any interests in Tyler. The capitalists of Pittsburg, Cincinnati, and Chicago have large inerests here, and by reason of the facility of transpor tation have met with great succ MIDDLEBOURNE, Tyler Co., West Va., March 6, 1885.

MIDDLESOURE, Tyler Co., West Va., March 6, 1885.

I have just returned after six weeks, thorough personal examination of a large portion of Wirt, Wood, Pleasants, and Tyler counties, West Virginia diregions, being accompanied by the oldest and most experienced oil explorer on oil Creek, Venango county, Pa. We traveled over parts of those counties through snow and mud on foot, which his by far the better way for eil hunters. In traveling over Wirt, Woods, Pleasants, and Tyler counties, and comparing the indications and external appearances, I shall not be surprised that richer developments will be made in this part of West Virginia than those of Oil Creek, in Pennsylvania. From the many surface indications and gas springs to be found in this (Tyler) county along filldie Island, and particularly along the streams of Big and/Little Buffalo Creeks and Pursely Lick Creek, I could not help but be struck with wender and astonishment.

not help but be struck with wender and astonishment.

I predict that contiguous to the Buffalo creeks will be found the best oil-producing region now known, and my friend from Oil City (who professes some knowledge of geology) agrees with me, and bases his opinion upon the wonderful geological formation of the country in this neighborhood, the teatures of which are so strongly marked all through Tyler county. In this county lands have advanced wonderfully. Three months ago forty and fifty dollars per acre was considered a high price. Now one hundred and one hundred and fifty dollars are asked and obtained. I heard of one small farm that sold yesterday at \$165 per acre. Many farmers now refuse to sell at any price, preferring to develop their lands themselves. Many derricks are going up, and many more will be commenced in a few days. Some dezen wells are going down now within from four to five miles from Middlebourne.

To-day forty-three oil-seekers from Pittsburg and further east, landed at Sistersville, a little town on the Ohio river, five miles distant from this point, and walked here—all, bent on securing good oil lands. Hotel-keepers, lawyers, and the County Recorder are just now reaping a rich reward, and greenbacks are as plenty as mosquitos in July.

Tyler county, in the neighborhood of Pennsylvania, on the borders of West Virginia, and with navigation on the Ohio river, has been heretofore neglected by Eastern oil men, although the pioneers of Chicago, Cincinnati, and Pittsburg have made large purchases in that neighborhood. The Standing Stone is atributary of the Kanawha, and is in the best part of the West Virginia territory. Oil was found here in 1790, and wells are now going down in all parts of that country.

The UPPER DELAWARE.

A Hartford gentleman, who was some years ago engaged in quarrying on the Upper Delaware river, remembers that white drilling a rook a disagreeable fluid flowed from the hole, and thay had to plug it up. He is now of the opinion that he then "struck ile," and he has gone out with a party to "trull out the plug".

iowa. The oil fever in lows is raging fiercely. The Joliet Signal says: "A coal oil sprine has been discovered on the farm of Frank Golst, four miles weat this city, on the Plainfield road. It is said to be quite rich, and has been bought by a company for \$10,000. There is no doubt that petroleum exists in abundance in the vicinity of Joliet,"

OHIO.

Petroleum has been discovered in an artesian well, in the city of Toledo, and an anterprising oltimizen has leased the well from the city for the purpose of developing it. The well has been cleaned out, and the surface of the water was found to be covered with a thick soum, composed of small greasy globules. Persons familiar with "oll indications" say the well promises to be a profitable one.

the well promises to be a prolitable one.

MARYLAND.

The oil fever is extending into Maryland in the neighborhood of Cumberland. Companies are organizing in various sections of that county, and as soon as the spring fairly, opens they propose to begin boring. In the George's Creek Valley, and in the neighborhood of Grantsville and Selbysport especially, the excitement is quite high.

A NEW PROUSES FOR REFINING PETROLEUM.

A SUCCESSIVILITAL Of a new system of Fedning A NEW PROCESS FOR REFIRING PETROLHUM. A successful trial of a new system of refining crude petroleum by chemical process was made in New Yorks few days since. Twenty gallons of orude oil were put in a cylinder with several apartments, and, after passing through filters, turned out seventeen gallons pure refined oil in three minutes. The gentlemen present pronounced it much swester than clarified by the old process of heat, and when burned was found also to smoke much less. The loss of oil by this process is only about twelve and one-half per cent, the naptha and the heavy oil being neutralized. The cost by the new system is about three cents, while in the old way it costs about ten cents, and the oil is better in every respect and the gravity more uniform.

BRIE COUNTY. A number of the printers of Eric City have secured the lease of a lot in that city, adjoining the Morton and Althoff wells, and have formed a company to be known as. "The Nonparell Oil Company," with a capital of \$40,000. The books were opened on Friday evening last, and in twenty-four hours thirty six shares, or nearly one-half of the proposed capital, was taken. The printers are confident of success, and will immediately proceed to develop their territory.

HARRISBURG. THE LEGISLATURE AND THE STATE JUDICIARY HARRISBURG, March 10 .- The Governor has vetoed an act of the Legislature proposing important changes in a judicial district of this Commonwealth. Executive Chamber,

Harrisburg. March 10, 1865.

To the Senats and House of Representatives, &c.:

GENTLEMEN: I herewith return to the House of Representatives, in which it originated, Bill No. 184, extitled "An set relative to the Fifth Judicial district of Fennsylvanis," with hip objections to the same. It is with much regret that I feel compelled by my cath of office to withhold my signature from this bill on account of its being in violation of the Constitution.

There on this question requested the opinion of the attorney General, a copy of which I transmit with this message and as part of it, and I entirely agree in the conclusion at which he has arrived. On all subjects, especially in a matter so vitally important as the Judiciary, I conceive to be necessary to abstain from any action that may clash with the meaning and spirit of the Constitution. Whatever may be the result, I feel lound by every obligation that can bind a maristrate, personally and officially, to do what I conceive to be my duty in this regard.

THE OFINION OF ATTORNEY GENERAL MEREDITH.

My opinion is requested by the Governor on the question whether say of the provisions contained in the bill estitled "An act relative to the Fifth Judicial District of Pennsylvania" are uncensitutions.

This bill proposes to annex Washington county to the Fifth Judicial District of Pennsylvania" are uncensitutional.

This till proposes to annex Washington county to the Fifth Judicial District of sections of the second section of the bill provides that the judge of the Court of Common Pless. ict Court, or the assistant is worm in the court of common Piezs of Washiston county. This section county is the first and the county in the first and the county in the county of the district. There are asts providing for the holding of special sourts by the President Judge of another district, where the President Judge of another district, where the President Judge of the proper district is six qualined to sit. And such acts are supported from the necessity of the case to prevent a total failure of instites. But to allow a President Judge morn his judicial functions (as this bill proposs) you could in my opinion, he a breach of the fundamental principles of the Constitution, which provide for the judicial power, and for the appointment or election of judges to exercise it.

A COLD-BLOODED VILLAIN.—D. L. Bivins, who, it will be remembered, some time ago murdered his father, mother, and wife, at 'Woodstock, Mich., takes exceptions to the sale of photographs of himself by a business-man at Hudson, because, as he alleges, they were taken over a year ago, with his uniform on, and do not resemble him now. He publishes a card as follows:

Editor Cleveland Plaintedeltr:

Please announce in your paper that the photographs taken and being sold by D. H. Spencer, Endson, Mich., see taken and being sold by D. H. Spencer, Endson, Michigan are not genuine ones, as they were taken with my finiform on, and do not resemble me now; but there will be some immediately before the public that are genuine ones, and taken with my clotheson at the time the deed was done, and such as wish to putchase will do well to wait and obtain the genuine D. L. BIVINS.

The Detroit Tribune says he is in the habit of circulating among the crowds who visit his cell cards containing the name, as follows: "D. L. Rivins, the murderer."

FOUR CENTS.

THE CITY.

MILITARY. HANCOCK'S CORPS.

The gigantic enterprise of recruiting for Major General Hancock's Veteran Army Corps, as inaugurated by Chief Franklin, is on the increase. Mr. Franklin desires it to be distinctly understood that all veterans must be credited to the Congressional district in which he or his family resides. This important fact he will not allow to be set aside by any scheme that may be entered into by any man or men. It is likely that a veteran camp may be organized somewhere near the city, which would expedite the business of recruiting tenfold. There are many squads of veterans—four or five in one place, a dozen in another, and other squads, ranging up to as high as forty and fity, in other sections of the country—who are ready to come to Philadelphia as soon as Chief Franklin makes the request. These men are soldiers, and a few reginents of them in our streets on some pleasant day would present a most imposing military spectacle, such as has not been seen since the commendement of the rebellion. HANCOCK'S CORPS.

THE DRAWT.

A meeting of delegates from the several wards was held at the County Court House, on Saturday, evening, with a view of equalising the ward bounties. John Price Wetherill, Esq., presided, and Dr. Joseph R. Coad acted as secretary. Various propositions were suggested, one for a general ward bounty of \$100, and others for bounties of \$50 and \$25. The Convention adjourned without action, but it is believed that fifty dollars will be settled upon as the ward bounty hereafter. The Convention wards were represented.

Recruiting still continues active, and there is every reason to hope that the draft will be entirely superseded by recruiting. The following order ought to stimulate the efforts of ward committees, and especially of draited men, to keep their provest marthals fully occupied with the examination of recruits. THE DRAFT.

The new Union League regiment will give a fresh stimulus to recycliting, and thus aid, largely in postponing the enforcement of the draft; the practical effects of which may be entirely avoided by energetic action in the various wards. During the past week warrants for the payment of the city bounty were issued to 590 men. During the provious week 512 warrants were issued, showing an increase of 75 leat week over the week previous. On Saturday warrants for the payment of the city bounty were issued to 109 men, of whom I was on itsed for three years, 2 for two years, and 106 for I year. COMMENCEMENT OF THE COLLEGE OF PHAR-

MACY.

The annual commencement of the Philadelphia College of Pharmacy took place on Saturday evening, at the Musical Fund Hall. The very large and intelligent audience which assembled on that occasion must have been gratifying to the class and the institution; long before the hour the room was filled to its capacity.

After the degree was conferred on twenty-nine young gentlemen. Professor E. Parrish delivered the valedictory. We have not space to give it to our readers, but it was full of excellent advice. The institution is appreciated, as its present prosperous condition will testify, and the class is about as large as previous to the war. Several of our professors in the medical colleges have filled the chairs of this college. The list of the graduates was published in The Press of Thursday last.

INSURANCE AGAINST ACCIDENT.

We would call attention to the advertisement of the Travellers' Insurance Company of Hartford. This company, formed for the purpose of insuring against accident of every description, has been in existence less than one year, and yet we are informed its business has been unsurpassed in the history of insurance. This arises from the fact that the Travellers' Company makes provision for all classes, from the poorest to the richest. What laboring man is there, for instance, but what can spare the small sum of three dollars per year, or a saving of twenty-five cents per month, to secure to his family the comfortable sum of five hundred dollars in ease of his death from accident, or in oase of temporary injury three dollars a week as long as he is prevented from work? We are pleased to learn from the agent, Mr. Wm. W. Allen, that he has been doing a large business for the company, which is increasing every day. We would advise our readers to call at the office of the company, No. 404 Walnut street, and obtain full information and books containing tables and embracing the whole subject. Subject. The following are the receipts of flour and grain at his port to-day:

BUSINESS is about to commence, the Allegheay being in fair navigable order, and what is more, boats have already made the round trip to the oil regions and inck. We have received 350 barries already, and plenty more to come. The first boat made the trip was the Lecisir. She lended at the wharf on Thursday moraing, with between five and six hundred barrels of oil. She was followed by the Eco Bo. 2, with some seven hundred barrels. Next came two flats for Captain Stockdalag containing seven hundred and firy barrels. Considerable activity was manifested on the landing on the arrival of steamers with the first oil There seems to be a wide difference between the views of the various parties, as a natural consequence, of conflicting interests; holders have set the price of Ornde at 30@35c; buyers were shy at those rates. The difference of views aresuch that one or the other must rive way before large sales can be effected. From all we could learn the receipts for the note sales as follows: 475 buts but kee, 300 bhis 35c; packages returned; 100 do, 50c, same condition; 100 do, 10 arrive, 30c; 324 do, 25c, bbis suchanged, and 50 bhis 35c, packages included.
