and word both. We must now see the bottom of the perpetuation of slavery. In his own shrewd way, he has shown the absurdity of such an attempt, and it would be well if every white and black man in the South could read his words. But the President's avowal that he would permit those to be slaves who were mean enough to wish it, must not be taken as an absolute opinion. Slavery is a crime not to be condoned by the consent of the slave, and if there were men capable of such a meanness, they should be prevented for the honor of the human race.

DEATH OF A PROMINENT MERCHANT. -- Our men tile community has suffered a loss in the death of Mr. Thomas I. Potts, who expired on Thursday morning, in the fifty-ninth year of his age. Mr. Potte was well known as a prominent iron merchant, and as the president of the Swede Iron Works, and was a bright example of mercantile enterprise and hono He was noted for his strong Union principles, and was a leading member of the Union League and the National Union Club of this city. (Special Despatches to The Press, 1 WASHINGTON, March 17, 1865.

BENNETT AND THE FRENCH MISSION. The offer of the French mission to Mr. JAMES GORION BENNETT continues to provoke much com ment. The first announcement was received with incredulity; but it soon became apparent that the tender had been made, and in good faith, several months since. Some of those who have the best means of information believe that it is not yet certain that Mr. BENNETT will not accept the place, but rather that he will go out and remain at Paris during the summer, returning in the fall.

DIPLOMATIC AND CONSULAR APPOINT-MENTS.

The President has appointed JOHN BIGELOW, our present charge d'affaires at Paris, to be envoy extraordinary and minister plenipotentiary at the court of France.

He has also appointed the Hon. AMBROSE W. OLARK, late representative in Congress from the Twentieth district of New York, to be consul at Valparaiso, Chill.

RENEWAL OF CIVIL COMMISSIONS. Several members of the Cabinet were to-day engaged with the President on the subject of renewing but one were lost.

disappointment and irritation, and not unfrequent-ly to impair health, and consequently to mar the EASTON, March 17.—The Delaware inverts over twenty-six feet above low-water mark, and is still rising. But little damage has been done above, so far. There is a rise of about twenty-two feet of water in the Lehigh river. It is reported that the canals were materially damaged, but we have not yet received any reliable intelligence. peace and happiness of the family. All this, we have the best reasons for saying, can be avoided by making a moderate investment in one of the inimitable patent "Anti-dust" Gas burning Oook Stoves of James Spear, Nos. 1116 and 1118 Market street.

DAMAGE TO THE PENNSYLVANIA RAILBOAD. We have already, in more than one instance, DAMAGE TO THE PRNNSYLVANIA RALEGAD. HABBISBURG, March 17.—The damage to the Pennsylvania Railroad by the flood west of this place has been slight, and the trains are running scain regularly. East of this, in the violatty of Highspire, the track is still covered with water, and the extent of the damage cannot be ascertained, but the through trains will be run via Reading and the Junction Railroad, arriving and departing from the depot at. The following remarks concerning these celebrated stoves will not be un-interesting: In their construction Mr. Spear has achieved a great mechanical and scientific triumph, which every intelligent housekeeper will at once appreciate. Heretofore the great objections to flat-top GREAT FRESHET IN THE SUSQUEHANNA RIVER.

GREAT FERSHET IN THE SUSQUEMANNA RIVER. HABERSBURG, March 17.—The Susquehanna river is now the scone of a great: and destructive freshet. Three bridges up the stream are reported to be car-ried away, and coming down this way. A number of families who reside on the island, in front-of this city have been forced to leave their homes. The water is so deep that the Harrisburg Water Works cannot pump the banks fronting on the river. The streats are filled with citzens and strangers. The Pernsylvania Railroad track near Middletown and Columbia is under water, and many other roads are in the same condition. The damage to properly is very great, but no lives have been lost as far as taken place since 1847. The water is now beating against the timber of the Cumberland Valley Rail-road bridge, which is usually fifteen feet above the cook stoves have been that they would burn the bread at the top, and not bake it at the bottom; also, their small size of oven, and the constant burning out of the grates, brick, and centre pieces, gether with the accumulation of dust and dirt in the flues, without any adequate means of cleaning them out; also, the collection of sches under the grates, causing them to melt out frequently, and thus rendering the stove worthless. In the Spear "Anti-dust" Gas burning Cooking Stove all these objections are entirely overcome, and, in our judgment, it approximates more nearly to perfection than any other stove extant. It not only possesses the admirable qualities already described, but for vaid bridge, which is usually fifteen feet above the level of the river. DAMAGE IN NEW YORE. UTICA, N. Y., March 17.—The water in this vi-clinity is three feet higher than ever before. The gas works are effectually stopped, their fires being put out, and no gas can be furnished for days to come. The iron bridge across the river, built by the Utica and Buffaio Railroad Company, was carried away about 1 o'clock. Little Fails was the farthest point reached to-day. There are about two miles of telegraph poles and wire down. The extent of the damage east of Little Fails is un-known. ROCHERTER, N. Y., March 17.—There is the creatthemselves at all times. DOWNINGTOWN, August, 1009. Mr. James Spear: DEAR SIE: Your "Anti-dust" is the most com-pletely arranged Cooking Stove that I have ever seen. Our draft is not very good, and I was afraid it would not do on that account, but it does admira-bly. I can bake three ovens full without touching the fire. Respectfully, W.O.E.

Known. ROCHERTER, N. Y., March 17.—There is the great-est flood in Rochester and its violative ever known. The water in the river fills all the arches under the aqueduot, and overflows the railroad bridge. It is several feet deep, and flows across Emifalo street near Arcade, filling all the cellars, and covering the ground floors of many of the principal stores. No trains have left left east on the Central or Genessee Valley Eallroad since yesterday. The water is still rising and the railroad bridge has been and is still rising and the railroad bridge has been and is still in danger, but unless the water rises more it will be safe. To-day the body of an unknown woman was found floating in Exchange street, having been washed down the river. THE HUBON RIVER BALLEOAD.

having been washed down the river. THE HUDSON BIVER BAILROAD. POUGHREEPSIE, N. Y., March 17.—The gale of Thursday night seriously obstructed travel on the Hudson River Ralitoad. There have been no down trains on that road to-day. Several hundred feet of track between Stuyvesant and Albany are sub-merged, and the telegraph poles in that vicinity are washed away.

SECURITY FOR LIFE AND PROPERTY .- THE latest of the many useful inventions introduced in this city is the Universal Safety Match, for sale only to dealers at the office of the Florence Se fachine Company, No. 630 Chestnut street. Daily fires occur from the careless use of common matches. Rats and mice set buildings in flames by carrying matches into their hiding places. Large fires frequently occur by matches being trodden upon in shops and factories where there is combustible maerial. Fire Marshal Blackburn, in his last annual

report, mentions twenty-nine fires as having oc-One important feature of these splendid Stoves is curred in this city during the year 1864, from children playing with matches. This would not have hapthe fact that they sift their own ashes, by which process all the coal, even to the smallest particles, pened had the Safety Matches been in use, as they is saved for consumption, which, at the present high rates of fuel, is a valuable consideration. Indeed, can only be ignited by being brought in contact with the prepared surface on the box. No amount of it can be demonstrated that these celebrated Stoves rubbing on the walls, or even on sand paper, will cause them to ignite. They emit a pleasant odor when lighted, no sulphur or phosphorus being a part of their composition. They are quite as cheap as the common matches, as there is no waste; every more than pay for their cost in the saving of fuel in less than three years' use. Besides this, the supematch sure to ignite when brought in contact with the box. These matches are endorsed and recom mended by the Chief Fire Marshal, and by all the Presidents and Underwriters of the Fire Insurance Companies, who have tested their merits.
