This Life of Chero, in two volumes, first appeared in 1741, and, for want of a better, has repeatedly bein reprinted. It organic detect is that Middleton was very vio- lently prejudiced in favor of Chero, and did not bestiate, by the frequent suppression of trath and the occasional assertion of falsehood, to build up, in his book, a far better character for his hero than he deserved. The author who should write a bio- graphy of Napoleon Bonapatie, chiefly founded on what the exile of St. Helena wrote and said, in self- extenuation or against his enemies, would produce a very one-sided work, but would scarcely be more partial that Middleton, who bolieved all that Cheero has said of himself as well as all that he has gaid of his enemies, and also softened down those points in which the great Roman orator unintentionally bore evidence against himself. The biography by Mr. Forsyth is of a different and highly superior character. Mr. Forsyth, formerly a Fellow of Trinity College, Cambridge, is a mam- ber of the British bar, and so distinguished there as to be a Queen's counsel. Since 1827 he has pub- likhed several volumes upon legal subjects, among which " Horteneius, an Historical Essay on tho Duttes of an Advocate," published in 1849, and the "History of Trial by Jury," alone are likely to in- toresis the general reader. In 1853, Mr. Forsyth produced two volumes of the "History of the Osp- tivity of Napoleon at St. Helenas, from the Letters and gouble." This work, which was republished by Harpet & Brothers, New York, was an attompt to rescue " Sir Hudson Lowe, Sir Hudson Lowe, By name and oh by narves so," from the generally acordited obarge of having	 A dwelling hones in Frankford township, Cumberland county, was consumed by fire last week. Ambitious of distinction and thirsting for power, he won his honors through dishonor, and secured his sinful supremacy by sins of ever deepening dye, until he reached the extreme of disgrace

and the lowest depths of degradation. So has one bright name fallen, lowering day by day from honor to infamy, and the end has not yet come! The other name that has been ringing throughout our land is that of a rough, rude, stern old man, who, stung by injustice and oppression, supported by a high and holy purpose, but impelled by fanatic zeal, arose against the power of the law and the peace of his country. Both these men have been guilty of the same offence before the tribunal of justice, and both have been arraigned for like crimestreason, conspiracy, murder ! But before the Higher Power how differently stand JEFFERSON DAVIS and JOHN BROWN ! In the case of the old Kansas chieftain there was neither conspirators at home or abroad to defend or extenuate ; for neither the folly of his attempt, the failure of his design, or the purity of his principles, could lessen his guilt or diminish his cul-

JEFFERSON DAVIS, with all the prestige of rank and political power, carried into the camp of the enemy the secrets of the Government that he intended to destroy. Aided by powerful friends, drawing his ablest assistance and his amplest means from the nation which he hoped to overthrow, he inaugurated the most extensive scheme of treason, and pursued it with unremitting diligence. The warriors that the Union had educated were to be her conquerors; the statesmen she had trained her foes; the arms that she had made were to be directed against her life; and her own treasurcs were to undermine her power.

mighty work for which he labored. an hastened its accomplishment. That which he attempted so unadvisedly, and explated so sadly, was left to be accomplished by another hand.

JOHN BROWN, piously and valiantly. endeavored to liberate the slaves, but it was JEFFERSON DAVIS who completed the work! What the old Kansas chieftain failed to accomplish was finished by DAVIS and his slaveholding traitors.

The fanatic died the death, the cause was lost, the chains of the slave seemed but more firmly clasped than ever. The unrighteous power which had goaded him to defiance in far off Ossawatomie continued its dark deeds and filled the measure of its crimes. That question which his dying breath had urged upon the hearth and consciences of his executioners, and which his wisdom foresaw as their destruction, was, indced, to cause their ruin.

Two years had not nearly rolled away when the aggressions of the power, against which he had striven, and the treason of the very men who judged him, brought the end for which their victim prayed. And | no alternative but to bring in a verdict of those who had wondered at his folly, and jeered at his madness, went forth to struggle for the right, with his name for a battlecry. In the mysterious workings of Providence the traitor to Virginia became, in the last mail, that Earl RUSSELL had given

from treason. One of these men has assumed the honor of being the type of Southern aggression against the North; upon the memory of | ing state of the Civil War in America, and the other has been thrust the office of representing Northern aggression upon the time had arrived for ceasing to require senting Northern aggression upon the South. It has been written "by their works ye shall know them." The one is the proven abettar of all dastard schemes of injury to his former friends, the con-niver at the low sins of burglary and arson, the adviser of torture and destruction of helpless prisoners, the confederate of the murderers of peaceful citizens and the confi-dant of assassins; this has been the work of dant of assassins ; this has been the work of the Southern gentleman, while that rough old man enacted for the guidance of his | most plainly and unmistakably. followers the most stringent rules of humanity in the treatment of all prisoners, conjuring them to obedience by their "fear of the Almighty God." Such were the words of the traitor against Virginia, ard his deeds carried them into completest

practice. Honor, personal honor, has been the boast of the Southerners; but their representative dragged his in the dust. Old JOHN BROWN exerted his last failing strength, not in de fence of his life, not to escape a felon's death, but to vindicate that alone for which he cared-his honor-and, assured that his intentions and hopes were clearly proven, consigned himself freely to an ignominious death. The very men captured by him describe the grandeur of the old hero's attitude as he at once commanded his little garrison, encouraged the fearful, spoke words of kindly comfort and sympathy to his prisoners, and insured their safety by every precaution in his power. At the moment of his seizure so stood old John Brown, resting one hand firmly on his weapon, with the other clasping the stiffening fingers of his dying son, while the dead body of the other lay at his side-a type of courage, endurance, magnanimity, and generosity. Of the last scene of DAVIS' capture what remains to be said ! It must be left where it belongs,. trying to do so in the teeth of their persistto the pencil of the caricaturist, while over its rehearsal will ever peal

Sir KDWARD COKE, who was Chief Justice of England in the reign of JAMES I., and who suffered seven months' imprisonment in the Tower of London, when he was seventy-one years old, simply because he had resisted illegal and arbitrary acts of one of the worst of European monarchs, is remembered in these later years, not alone by his integrity as a judge, but by his great ard. This is laid down so clearly that ability as a jurist; and the lawyer, it cannot be misunderstood. If yielded American or English, who is igno-to gracefully, they will find him magnani-rant of his "Institutes," may be said mous metriciful and functional Indeed

and crinoline. For the waste of blood and treasure during the last four years, for the other disastrous consequences of the war. for all the evils it has created, JEFFERSON DAVIS is morally and legally responsible. That he and his fellow-traitors were influenced by noble and disinterested motives, we never can admit. They did not believe what they said and wrote. The people whom they had excited would probably

voring to escape in his wife'

have sacrificed them had they held back, when it came to blows. Latterly, when the Southern people saw the hopelessness of the contest, they would have given it up, but the leaders, hoping against hope, and knowing that they deserved no clemency from the Republic which they had betrayed, kept them up to fighting point. In the approaching trial it will be sufficient to prove that DAVIS was in supreme command, as chief of the rebels, in Richmond, when rebel troops, commanded by officers whom he has commissioned, made the raid into Washington county, in July,

1864. That proof made, an honest jury has "guilty" against the arch traitor.

He avowed, in the preface to that small volume, that his desire was "to infuse into an al-most literal version something of the spirit, as well as the simplicity, of the great original." The spo-cimen excited so much admiration that his Lordship was thereby encouraged to translate the remaining twenty-three Books. He commenced th

elf-imposed task in the autumn of 1862, and his preface to the published volumes is dated Oot 1864. For the first time, at the mature age of sixty-five, Lord Derby challenges public attention as an author. It should be remembered, too, that while executing this translation, he was angaged

The metre adopted is black verse-not that which Cowper used when translating Homer-but the metre in which Shakespeare's plays and Milton's greatest poem are given. As for his specific pur-pose, let us express it in his own words; "It has been my aim throughout," he says, 'to produce : Major General P. H. Sheridan is relieved from "Major General P. H. Froude's history of the last of the Tudor reigns England-those of Henry VIII., Edward VI., Mary 1., and Elizabeth-has excited more interest and caused more discussion and criticism than any work of that class published since the time of Gib-bon, with the exception of Macaulay's chif d'œuvre. Mr. Scribner will publish the entire work ; four volumes devoted to the reign of Henry, two to that of Edward and Mary, and two to that of Elizabeth. Before speaking of the history, let us mention a few personalities about its author. James Anthony Froude, who is now 47 years old, is son of the late Archdeacon Fronde, and younger

brother, by fifteen years, of Richard Harrell Froude who died in 1833, and the publication of whose "Remains" greatly accelerated, if it did not create, the Tractarian or Newman-Pusevite move ment in the University of Oxford. The Mr. Froude whose work we have to notice, distinguished him self at the University, and, purposing to devote himself to the Ohurch, was even ordained deacor at the age of 27. He soon abandoned the cierical for the literary profession, and his first work was a volume of serious tales. In 1849, he published "The Nemesis of Faith," which has gone through several editions, and from the opinions express in it (the reverse of orthodox), had to resign his Fellowship in Oriel College, Oxford, to which he had been elected twenty-one years before. After this, he wrote for Magazines and Roviews, and, in 1866, produced the first two volumes of his "History of England, from the Fall of Wolsey to the Death

future. Among other conclusions it reaches the following: "Taking all the chanches into consideration, we think that oil lands, and stocks in legitimate oil companies, are the best investment extant. The gentlemen who have large amounts invested in oil inde and stocks, of the quality we have described need have no fear as to the ultimate value of their property. It would seem to us, notwithetanding the high prices that have been paid, that the real value of really productive oil lands has not yet been reached. The present depresed state of the market is owing to causes that will only prevail tempora-rily. The development of the business, and the magnitude it has assumed, is so vast, that it pro-vents a great many from comprehending its true value. The financial affairs of the country, for the, past few months, have passed a trying ordeal, and now the prospect is as fair as any reasonable person could expect. In the oil region the de-struction in the country prevented miners from protoring the engines and material necessary to the prosecution of their work. The num-ber of wells approaching completion has been issee the development began. As a natural consequence, the supply has decreased. For inde system of mining is adopted, the number of new wells requisite to keep up even the present supply, will have to be largely increased and a de-present at any similar season of the year.
