ASSAULT UPON AN OFFICER, A man, named Barney Millan, had a hearing upon a charge of larceny, and assault and battery upon a police officer. It was in evidence that on Friday afternoon the accused and another man entered a cigar store in West Philadelphia, and attempted to help themselves to some tobacco. An officer was called in by the proprietor, when the companion of Millan struck the officer violently in the face, entiting his lip open. In the confusion the perpetrator was canalod to escape, but he held on to Barney and lodged him in the station-house. The commodore of the navy wears a cap similar to that worn by the com-modore in the American navy. That part of the park overlooking the river was crowded with ladies and gentlemen spectators of the picturesque scene on the river before them. The review came off shortly before six o'clock. The barges were all in the best order, and their crews in their uniform presented a pic-ture unexcelled in beauty. The barges stretched from one side of the river to the other, and went through the drill at the com-mand of the commodore with the greatest precision. All the barges participating in the review at about six o'clock starfed in a race, at the command of the commodore, from Turtle Rock, opposite which they were drawn up in a straight line. The race could not be considered a fair trial, filther of barges or crews. It was not long enough to determine either, It was from the rock around the full at Girard avenue bridge, and back to the rock. Short barges with the facility of turning easily, had, of course, the advantage. The race was won by the Quaker City Barge Club, with their new gunnel boat. They were followed by the new outrigger barge or the Philadelphia club. Par-ticipanis and visitors were well pleased with the review. A regatia is talked of, to come off next month. The race then, it is said, will be around a buoy above Peter's Island, and return. THE PRESS.-PHILADELPHIA, MONDAY, AUGUST 28, 1865.

AMERICAN IRON AND STEEL Assocra-tros.—The next quarterly meeting of this or-ganization will be held in Philadelphia, on the third Wednesday in November next. This was decided at the recent meeting, held in the smoky city of Pittsburg. The Association has been considering the question of adopting 2000 pounds as a ton, instead of 2,240 pounds. This question certainly ought to be settled one way or the other, but it should not be for-gotten that the courts of law have already de-cided that 112 pounds make one hundred weight, and twenty hundred weight, one ton. This every school-boy learned. There can be no such thing as a "long ton," or a "short ton." excepting among ignorant retail coal-dealers. In regard to the iron interests, a re-port was submitted upon the adoption of two thousand pounds to the ton, from which we extract the following : In favor, 85 in Massachusetts, 1 in Vermont, 18 in New York, 5 in New Jersey, 47 in Penn-sylvania, 2 in Maryland, 9 in Ohio, 3 in Mis-souri, 18 in Wisconsin, 1 in Michigan and 1 in Illinois. Opposed, 18 - of which 2 are in Massa-chasetts, 8 in Pennsylvania, 8 in Ohio, in ad-dition, are 6 doubful replies, or, taking mem-bers alone, 59 are in favor, 14 opposed, and 4 are doubiful. The report states that the tend-ency of the replies show that the majority of the fron and steel manufacturers are in favor of the proposed uniform ton of 2,000, for the following reasons: 1. The simplification of calculations and accounts, and the economy of time, and decrease in liability to error, which will now therefrom. 2. That a ton, of deter-mined and recognized value, may be univer-sality employed, in offer to oloviate the mis-takes and misaprehensions that now occur from a failure to express the particular kind of ton to be used in a business transaction. There is, however, a stremous opposition to change in localities, for the following reasons: First. The labor and confusion incident upon labor and decide under the following reasons [Before Mr. Alderman Fields.]

Change in localities, for the following reasons: First. The labor and confusion incident upon the change from accustomed methods of calcu-lation, and the established schedules of prices to different methods and schedules. Second. The difficulty of reconciling those parties now disposing of values upon the basis of 2,240 fs per ton to receive the proportionate reduction in price off, or a ton of 2,000 fs. The report was referred to a special Commit-tee on Weights and Measures, composed of James I. Bennett, ESQ., of Pittsburg; J. Kin-zer, Cincinnati J. Y. Townsend, Philadelphia; A. B. Stone, Cleveland, and James Rogers, Es-sex county, New York. It as suggested that a legislative enactment will be required to legalize the reduction, and if the Legislatures of all the States do not agree to it, there will be endless confusion in the businges.
