JOHN WHITE, So

run out by the rebellion having been put an end to, continues his piratical course, and is not likely to cease, until his career he closed by force of arms. No doubt, like SEMMES of the Alabama, (who used to call his crew to prayers on the Sabbath morn-before bearing down upon and destroying some unlucky merchant vessel,) this MAFFIT will show a light pair of heels when once one of our war-frigates is on his of Mexico-should seek emigrants is Southtrack. It appears obvious that he ought to ern Europe-among the French, Spanish, be pursued, captured, punished. That can and Italians. If large colonies of the best be done by a national vessel, but if our marine cannot spare a frigate for that purpose it should be done by private enterprise. Indeed, it is said that a project was in progress, at San Francisco, for fitting out and properly arming one of the Pacific steamers, owned by a private company, and send ing her to capture the Shenandoah.

There can be no doubt, moral or legal, that MAFFIT is now a pirate, and that, when caught, he ought to be punished as such. Piracy is robbery on the high sea, an offence against the law of nations. It is not an offence against any particular State, but against all mankind, and may be punished in any country where the offender may be found, or into which he may be carried, no matter where or how the crime was committed. A very high judicial authority expressly declares : " It is the essence of piracy that the pirate has no commission from a sovereign State, or from one belligerent State at war with another." The Shenandoah-British-built, British-owned, British-manned, and British-armed-may or may not have been commissioned by "the so-called Southern Confederation," but it is certain she never entered a Confederate port; and Mr. MASON, who is a credible witness, so far, declares that when the Confederate bubble burst, formal intimation thereof was duly sent to that vessel. That plainly told MAFFIT that his occupation was gone; any subsequent act of his against any vessel of any nation is rank piracy. We would recommend that, when captured, he be instantly tried by a naval drumhead court-martial, and "a short shrift and a long rope," pensile from the yard-arm of his own ship, ought to be the swift and summary finale of such a wretch.

JOHN BRIGHT. It is rumored that JOHN BRIGHT, whose name is a household word among us, is about visiting this country, and, indeed, may even now be on his way hither. Some forty years ago LAFAYETTE returned to us, for a short time, to witness the greatness of the nation which he had aided in her struggle for freedom, and his reception was an event in history. He was the nation's guest. If Mr. BRIGHT comes, it will be simply as a private gentleman, but the great heart of America will throb with gratitude and joy when he sets foot upon our soil. In the four years' war, which has no parallel in the world's annals, Mr. BRIGHT, one of the most distinguished and most eloquent of British statesmen, devoted his untiring energies to the assertion, defence, and maintenance of the great principles of human liberty, which, at last, are now triumphant. The Morning Post, a fashionable London paper, said to be chiefly owned by Lord PALMERSTON, which is so much the selfappointed organ of the aristocracy that it succes at manufacturers, however rich, and despises artisans, however laborious-the Morning Post ridicules the idea of Mr. BRIGHT visiting the United States, and predicts that he will be disgusted with the .country, its institutions, and its people, and will see the littleness of things here, "of which he has so often drawn bright imaginary pictures." Mr. BRIGHT took our part, manfully and ably, without having ever been among us. But he had a colleague, a dear friend, whose death was lately mourned by France as well as by England, who also was our champion in the British Legislature, and that great man took that side, after he had personally travelled true " blue blood," proud and haughty and largely through the United States. Rich-ARD COBDEN'S first visit here was made stern as it was, grew mad under the boundthirty years ago, and he was again here in | less riches, and the daring spirit that made

 correspondences of the resumption three provides the provide states of the resumption three provides three p tomed in Europe. The real region, there-fore, in which Southern States-particularly those bordering or near the Gulf people of these countries were trans-

mpress of Spanish power, or even where that has faded through the decay of the parent land, the names that remain still stand as witnesses that the country was once under her yoke, and that the Spaniard as eagerly sought the pale and precious ore in the bosom of the Sierra Nevada near the broad Pacific, as in the heart of the Sierra Marena of his native land. The rich argentine countries of South America contain many Spanish names; so do the wealthy silver lands of Mexico, and far northward along our own great mineral mountains occasional peaks and valleys still attest the fact that Spain, although claiming only an inferior station now among the powers of the earth, once outranked them all in extent and opulence. That wealth, which should have yielded strepgth and established her in uncontested supremacy proved her destruction. The

health of Bishop Upford being so feeble th he requires help in his labors. -General Schenck, in a recent speech

Ohio, said: "A rebel is a courageous Coppe-head, and a Copperhead a cowardly reber That is just it. -Hon. F. W. Seward, Assistant Secretary pr

State, has so far recovered that he will be ale to resume the duties of his office in a fw days.

## FOREIGN ITEMS.

- The more fully the particulars of the la Polish rebellion come to light, the greater and graver appears the struggle of that unfound nate race. In making up accounts, the Hs sian Government have now discovered he The Cholera. To the Editor of the Levant (Constantinople) To the Editor of the Levant (Constantinople) Heraid: Sin: During the prevalence of the cholers morbus in the different ports of Turkey, any remarks that may tend to the better know-ledge of the mysterious disase and its develop-ment may be acceptable, and I have, therefore, taken the liberty of addressing you the follow-ing, the result of my observations: Cholers can be communicated— 1. By persons direct, who carry the seeds of the disease (or visiated air) with them. 2. By clothes or other articles used by the sick\_ significant fact that the number of people inc left Warsaw to join the insurrectionary unds In 1862 and 1863 amounted to no less than, 128, out of a population of 216,000. Of the, 8 were children between 10 and 14 year old, 1,000 were between 20 and 25, 1,463 between 25 and 30, 869 between 30 and 35, 568 hetween 5 and 10, 376 between 40 and 45, 207 between 45 nd 50 110 between 50 and 55, 62 between 55 af 60, 43 between 60 and 65, 18 between 65 and 9 be-

tween 70 and 75, 4 between 75 and 80, 3 tweer 30CK. 3. By infected vessels or lazarettos, which, though isolated, are too near healthy towns, and these generating villated air, it soon pusces the imaginary boundaries of quaran-ting. 80 and 85. - The United States Consul to Port Cahon informs the States Department, underlate of August 12, 1865, of the spreading of the assian plague, and of the prevalence of the alera. In his despatch to the State Department, he

pusses the imaginary boundaries of quaran-tine. In proof of these assertions, I may remark— First. The cholera, in the present instance, was introduced into Arabia by pilgrims from India bringing with them the seeds of the dis-atimals sectificed, of every size, from a canel downwards, were left to putrefy. The efflu-vium, combined with the assent of the Holera is certily ad-downwards, were left to putrefy. The efflu-vium, combined with the assent of the Holera is certily ad-downwards, were left to putrefy. The efflu-vium, combined with the assent of the Holera is certily ad-downwards, were left to putrefy. The efflu-vancing to the West rapidly. My cocleance would not acquit me of criminal nest if I disease. At Dieddah it assumed a compara-tively mild form, only ten per cent. of the passage through Egypt, communicated the disease, which unfortunated proved to be of
