THE conductors on the Central Railroad of New dersey will, in a few days, put on a beautiful uniform of blue. The buttons on the coat or loose blouse are brass with the name of the company engraved thereon.

FAILED TO RON.—About 11 o'clock on Wednesday night an attempt was made to enter the residence of Mrs, Fink, 146 North Eighth street. The thieves were, however, driven away before an entrance was effected.

THE RAINBOW .- The Rainbow Boys gave their new steamer another trial yesterday at the canal and in Penn Square. The boys seem to be highly pleased with it. A stream was thrown a distance of 260 feet, through a H inch nozzle.

PHLIARDS.—Match games of billiards were played on Wednesday night at D. P. Lash's saloon, between Frank Dennison and aman named Geary, both of New York, which resulted—the first game—in favor of Dennison. The second was won by Genry,

THE READING INSURANCE BUILDING, Court sweet, near Fifth, is rapidly going toward completion. It is four stories high and makes a handsome appearance. It is to be used as offices, and we learn that Mr. Rosenthal is to have a portion of the same for his printing office.

Police Intelligence. - John Bradley was arrested yesterday by officer Goodhart .-John was very drunk, and was found lying on the sidewalk. He had a hearing this morning,-paid \$2.25, and was discharged. Twelve lodgers found shelter under the roof of the station house last night.

NEARLY COMPLETED .- The new building of Mr. Charles Breneiser, at the corner of Eighth and Penn streets, is nearly completed on the outside, and presents an imposing appearance, and is an ornament to that por tion of the city. The hall on the third floor will be one of the finest in the city.

Quir Ir .- Young men, don't stand in front of the church doors on Sunday evenings gaping at ladies as they come out. It don't look well. We know that some ladies are curiosities to look at, the way they dress, but it shows impudence and ignorance to gape at them like a lot of baboons. Quit it. (to home t

A Horse attacked by Dogs .- Yesterday afternoon a number of dogs attacked a horse in a field near the new rolling mill, and had not the dogs been driven away, no doubt, they would have killed the animal. The horse was almost run to death, not having enough strength left to lift his head, which was hanging to the ground, and the blood flowing quite freely out of his nostrils. The dogs had also bitten his legs and other parts of his body. It was with much difficulty that the ferocious curs were driven away, as it was also dangerous for a man to get near them, but clubs and atones were brought into requisition, which checked their thirst for blood. It is a pity that powder was not

THE READING RELIEF SOCIETY .- The annual meeting of this Society will be held at the Odd Fellow's Hall, on Monday evening next, Nov. 23d, at 71 o'clock. A report of the operations of the Society for the past year will be read by the Secretary, and an address will be delivered by John S. Richards, Esq. Several other gentlemen will also address the Society, and a Board of Managers for the ensuing year will be elected. The public are invited to attend, and it is hoped all will take a lively interest in this laudable object. This Society for the past year has done much towards alleviating the suffering of the poor of our city, and as another cold and dreary winter is upon us, and an especial levy will be made upon the Society, our citizens should come forward and give it all the encouragement possible.

Young Men's Reading Room. In accordance with a call, a meeting was held last night at the office of J. S. Richards, by a number of young men, for the purpose of instituting a "Young Men's Free Reading Quite a number were present, but no business was transacted. Another meeting is to be held at Library Hall on Monday evening, November 30th. We hope this project will be pushed forward, and that the young men will receive the co-operation of our citizens in this laudable object. Such an Institution would undoubtedly be very beneficial to the young men of our city, and especially to those who now seek pastime on the street corners, and in saloons. This project has been started once before, but for the want of co-operation on the part of our citizens and our clergy, it failed. Reading is behind hand in this respect, as smaller towns have excellent reading rooms, where many pleasant hours can be spent among newspapers, books and magazines.

Another Narrow Escape.-Every day there can be seen, between the new depot and the new rolling mill, twenty or twentyfive boys and girls picking coal from the rail road tracks. Yesterday we observed a little girl get on a coal train while it was in mo tion, and steal coal and then Jump off. She got on again, and in the meantime an up in time, she hung on to the side of the car, standing on the edge of the axle. When the selection of paper, and the train had passed she jumped off, and was to place under 12 per cent. much vexed because the passing train had taken off a portion of her dress. Her dress not being as strong as her hold upon the car, dragged under the cars and torn into atoms.

How to Judge Pourry. - As "Thanks, giving" is approaching rapidly, the following hints in regard to the selection of poultry may be regarded as "seasonable:" young turkey has a smooth leg and a soft bill, and the eyes will be bright and the feet moist. Old turkeys have scaly, stiff feet. Young fowls have a tender skin, smooth legs, and the breast bone yields readily to the pressure of the finger. The best are those that have yellow legs. The feet and legs of the old fowl look as if they had seen hard service in the world. Young ducks feel tender under the wing and the web is transparent. The best are thick and hard on the breast. Young geese have yellow bills, and the feet are yellow and supple; the skin may be easily broken by the head of a pin; the breast is plump and the fat white. An old goose is unfit for the human stomach.

PLATINUM COATING FOR METALLIC SUR-FACES.—A process for coating brass and copper with a bright surface of platinum thas recently been published in the foreign papers. A nearly neutral solution of chloride of platinum is made by carefully adding carbonate of soda to the acid solution so long as there is effervescence. To this solution is added a little glucose and some chloride of sodium, without which latter substance the platinum would be deposited black. The articles to be coated have only to be immersed in this mixture; but when it is wished to coat a number of small objects, such as pins, it is recommended to place them in a sort of zine sieve and immerse the whole in the solution, heated to about 160 degrees Fahren. heit. The coating of platinum is deposited almost immediately, and the articles have then only to be well washed and dried in warm sawdust.

TAKE CARE OF YOUR BOOTS AND SHOES,-

Boots and shoes are expensive items nowadays, therefore a word or two of advice in regard to their preservation will not be amiss. In the first place, do not expose your shoes or boots to extreme heat. destroys the vitality of the leather, and renders it liable to crack and break. This is especially the case with those made of patent leather. Wearing gum overshoes is decidedly detrimental to leather. The heat and dampness caused by them destroy the life of the leather shoes over which they are worn. Never use blacking or polish that contains varnish. Many persons ruin their shoes by using cheap blacking, of which vitriol forms a principal ingredient. Vitriol blacking destroys the oil in the leather if used for any length of time. To obviate this difficulty, shoes that are regularly polished should be washed once a month with warm water, and, when half dry, a coat of

Weather Prophets.—At this time of the year there are any amount of weather prophets, and they are always sure to see had signs for the future. We have lately heard of these persons predicting an extremetly severe winter before us. How they can tell we are unable to say. Some will state that a sure sign is when the birds disappear so early in the season; others that the leaves have fallen before the time in previous years, and theories of a like character are given to prove the prediction. They may be correct; and we may have commenced a season that will be terrible. But, he that as it may, we have no faith in these weather wise prophets. As far as our recollection carries us back, the same proofs advanced as to load and nearly the same proofs advanced as to load and nearly the same proofs advanced as to load and nearly the same proofs advanced as a Budday Excursion Train will leave Reading to Liounday, and 10.10 P. The only harm, however, that these predictors can do, is to create an anxiety among those who are illy prepared for the snows and blasts of winter, and thus cause them unnecessary trouble. E. Mishier & Co., Reading, Pa.—Dear Sirates
It affords me pleasure to speak of the wonderful offects of your "Pain Curo," in my own-case. In June last, I was attacked with Neuralgia in my abdomen and side. After suffering—intensely for nearly two weeks, I was induced to try your remedy, and after all application, to my utter surprise, I was relieved in a few seconds. So sudden was the relief that I could scarcely believe pay own senses. From my knowledge of the preparation, I firmly believe that it will stop in from nearly every cause and almost instantly.

Respectfully, yours

Respectfully, your A. DUDLEY.
