FLOATING around in the newspapers, we

the following paragraph in reference

to the man who is so to assume the care of

the and control of a destination of 10,000,000

of people.

General Grant rides a beautiful black

pony, taken from Dick Taylor's plantation

during the war. It is said to be his favorite

among his battle studs, and as he canter along

Pennsylvania avenue, Washington, with his

corporal behind him, everybody admires the

spirit of the horse and the ease of the rider.

This story is told, it will be observed, with

the utmost nonchalance. Gen. Grant did not

steal the beautiful black pony himself,

deber did the one who presented it to him!

Oh, my! it was only common sense, and common

sense you know, don't you mean stealing? There

is something in law which says that a person

can be guilty of a crime. This, of course,

has no reference to the stealing of a stolen

horse from another, knowing him to be such!

Our country has made rapid strides within the

past forty years, and in no way more than in

laying new granite on the words, rob-

ber and steal may appear loyal, and ren-

egade!

John Corbett, who represents the Westmore-

Charles at Washington. He is one of our

purest and most adored public men, but the

construction of grammatical sentences is not his

forte. He looks with disdain upon such old

fogies as Lindley Murray and Peter Bullion.

Do not, then, of our Corbett, or his immita-

ble sayings, although he was "left out in the

cold" in the recent Congressional election.
